Attachment tables

Attachment tables are identified in references throughout this chapter by a '16A' prefix (for example, table 16A.1) and are available from the website at www.pc.gov.au/rogs/2018.

This chapter reports on the performance of child protection services across Australia.

Further information on the Report on Government Services including other reported service areas, the glossary and list of abbreviations is available at www.pc.gov.au/rogs/2018.

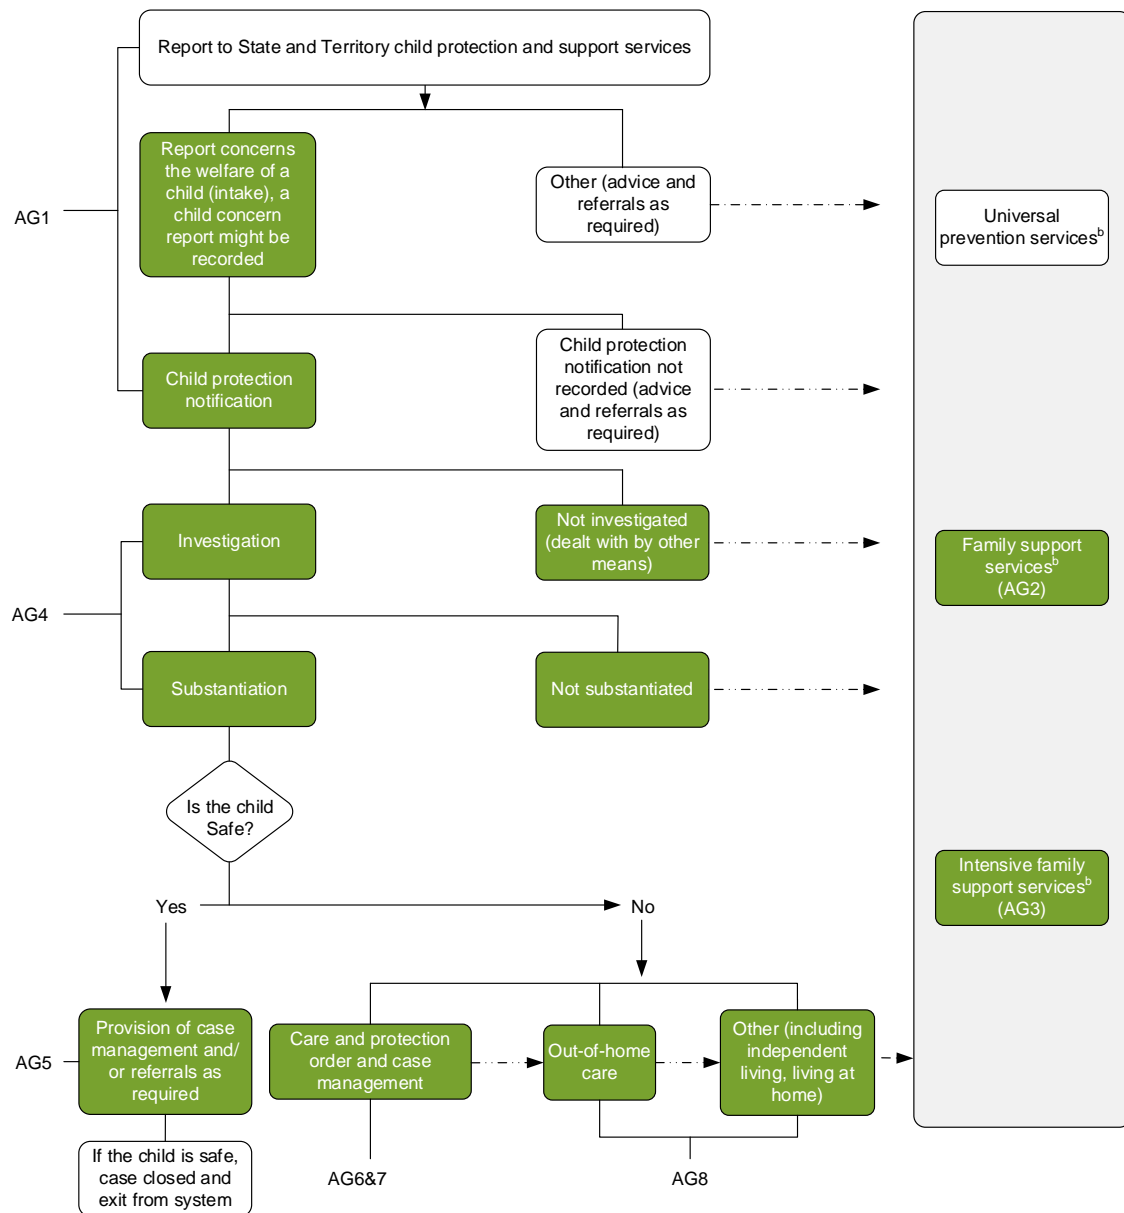

16.1 Profile of child protection services

Service overview

Child protection services provide supports and interventions to promote child and family wellbeing, and to protect children and young people aged 0–17 years who are at risk of abuse and neglect within their families, or whose families do not have the capacity to provide care and protection.

Figure 16.1 is a simplified representation of the child protection services system, depicting common pathways through the system and referrals to support services.

Figure 16.1 The child protection services system^{a, b, c, d}

^a Dashed lines indicate that clients may or may not receive these services, depending on need, service availability, and client willingness to participate in voluntary services. ^b Support services include family preservation and reunification services provided by government and other agencies. Children and families move in and out of these services, and might also receive protective intervention services while receiving support services. ^c Green shading indicates data are reported. ^d AG = Activity Group. See section 16.4 for detailed definitions.

Source: State and Territory governments (unpublished).

Roles and responsibilities

State and Territory governments have responsibility for funding and/or providing child protection services in Australia. Each jurisdiction has its own legislation that determines the policies and practices of its child protection system, and while this legislation varies in detail, its intent is similar across jurisdictions.

Other government service systems can have a role in child protection, including:

- mandatory reporting responsibilities for particular occupations in some jurisdictions
- education and child care services, which in some jurisdictions includes education on protective behaviours
- health services and mental health services, which support the assessment of child protection matters and deliver general medical and dental services as well as therapeutic, counselling and other services
- police services, which investigate serious allegations of child abuse and neglect, particularly criminal matters, and may also work on child protection assessments
- courts, which decide whether a child will be placed on an order.

This chapter reports on services provided by State and Territory governments to promote family wellbeing and to protect children, specifically: family support services; intensive family support services; protective intervention services and out-of-home care services (see section 16.4 for definitions).

Size and scope

Nationally, the following number of children aged 0–17 years received protective intervention services and out-of-home care services during 2016–17 (tables 16A.1 and 16A.2):

- 233 795 children were the subject of *notifications*, the equivalent of 42.6 notifications per 1000 children in the population
- 112 164 children were the subject of a *finalised investigation*, the equivalent of 20.4 finalised investigations per 1000 children in the population
- 49 315 children were the subject of a *substantiation*, the equivalent of 9.0 substantiations per 1000 children in the population
- 54 666 children were on *care and protection orders*, the equivalent of 10.0 children on care and protection orders per 1000 children in the population
- 47 915 children were in *out-of-home care*, the equivalent of 8.7 children in out-of-home care per 1000 children in the population.

Children can be the subject of more than one notification, investigation and substantiation (table 16A.3) and around one in five children admitted to a care and protection order has

been admitted to such orders before, though this proportion varies across states and territories (table 16A.4). The majority of children in out-of-home care are on care and protection orders (table 16A.5).

Aboriginal and Torres Strait Islander children are overrepresented in the child protection system (tables 16A.1 and 16A.2). For further details see the performance indicator ‘disproportionality’ in section 16.3.

Funding

Total recurrent expenditure on family support services, intensive family support services, protective intervention services and out-of-home care services was \$5.2 billion nationally in 2016-17 (a real increase of 8.5 per cent from 2015-16) of which out-of-home care services accounted for the majority (59.5 per cent, or \$3.1 billion) (table 16A.6).

In 2016-17, real recurrent expenditure on all child protection services per child aged 0–17 years in the population was \$959 nationally (figure 16.2).

Figure 16.2 **Total real recurrent expenditure on all child protection services, per child (2016-17 dollars)^a**

^a See table 16A.6 for detailed footnotes, and caveats.

Source: State and Territory governments (unpublished); table 16A.6.

Differences across jurisdictions in the calculation of child protection expenditure are listed in table 16A.7.

16.2 Framework of performance indicators

The framework of performance indicators for child protection services is based on shared government objectives (box 16.1).

Box 16.1 Objectives for child protection services

Child protection services aim to promote child and family wellbeing by:

- enabling families to care for, and protect, children and young people
- protecting children and young people who are at risk of abuse and neglect within their families or whose families do not have the capacity to provide care and protection
- supporting children and young people in the child protection system to reach their potential.

To achieve these aims, governments seek to provide child protection services that:

- are responsive, ensuring that notifications are responded to, and investigations are completed, in a timely and appropriate manner
- are targeted to children and young people who are at greatest risk
- support and strengthen families so that children can live in a safe and stable family environment
- provide quality care for children and young people aged 0–17 years who cannot live with their parents for reasons of safety or family crisis, with an emphasis on safety, stability and permanency in children's living arrangements
- meet the needs of individual children and young people in the child protection system.

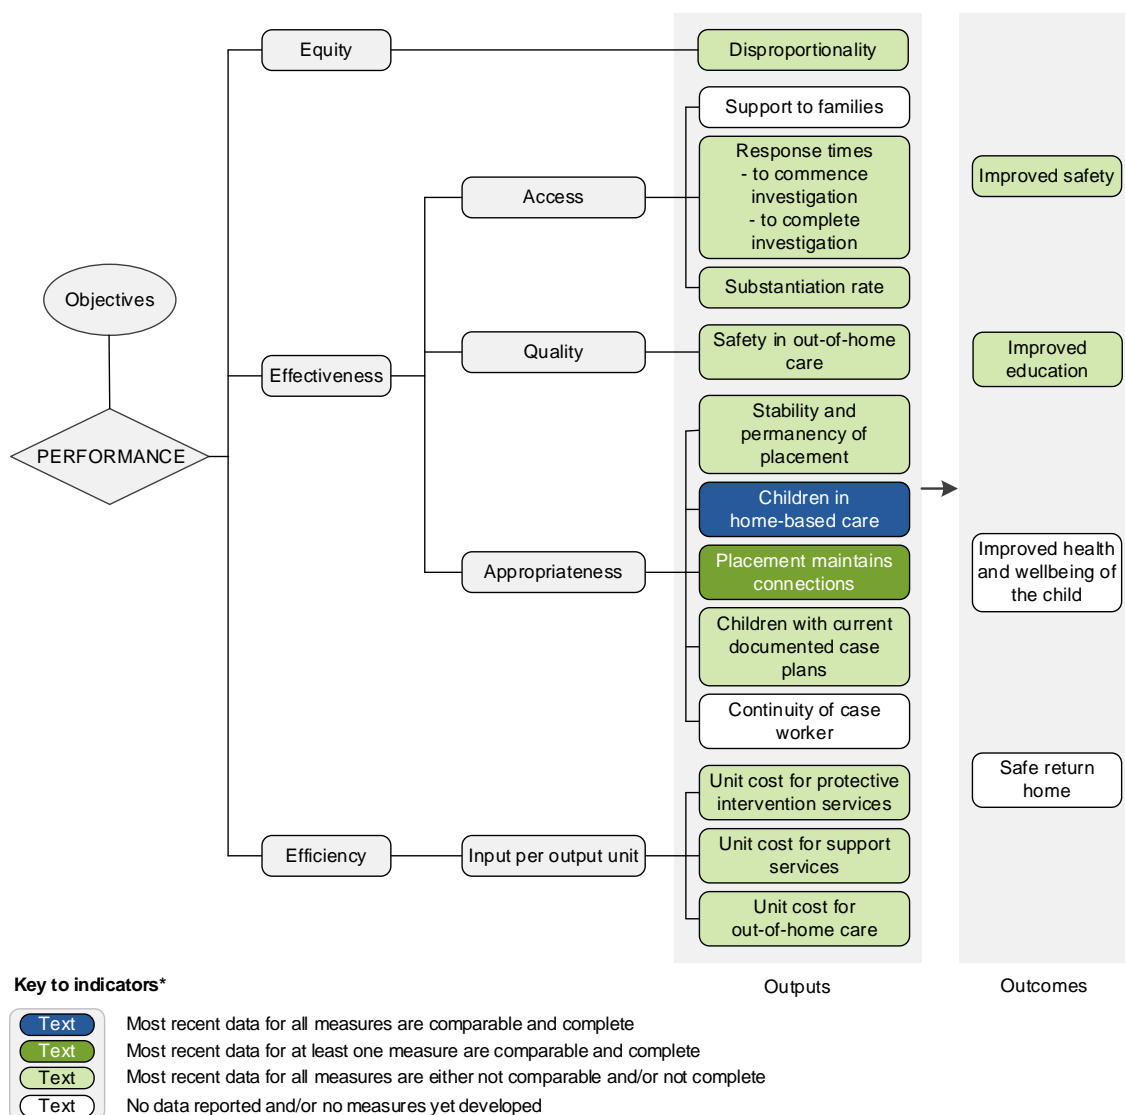

Governments aim for child protection services to meet these objectives in an equitable and efficient manner.

The performance indicator framework provides information on equity, efficiency and effectiveness, and distinguishes the outputs and outcomes of child protection services (figure 16.3).

The performance indicator framework shows which data are complete and comparable in the 2018 Report. For data that are not directly comparable, text includes relevant caveats and supporting commentary. Chapter 1 discusses data comparability, data completeness and information on data quality from a Report-wide perspective. In addition to section 16.1, the Report's statistical context chapter (chapter 2) contains data that may assist in interpreting the performance indicators presented in this chapter. Chapters 1 and 2 are available from the website at www.pc.gov.au/rogs/2018.

Improvements to performance reporting for child protection services are ongoing and include identifying data sources to fill gaps in reporting for performance indicators and measures, and improving the comparability and completeness of data.

Figure 16.3 Child protection services performance indicator framework

16.3 Key performance indicator results

Different delivery contexts, locations and clients can affect the equity, effectiveness and efficiency of child protection services. Performance indicator results may differ from similar data included in jurisdictions' annual reports due to different counting rules applied for jurisdictional reports.

Outputs

Outputs are the services delivered (while outcomes are the impact of these services on the status of an individual or group) (see chapter 1). Output information is also critical for equitable, efficient and effective management of government services.

Equity

‘Disproportionality’ is an indicator of the governments’ objective to provide child protection services in an equitable manner (box 16.2).

Box 16.2 Disproportionality

‘Disproportionality’ is defined as the extent to which a group’s representation in the child protection services system is proportionate to their representation in the child protection services target population (0–17 years). Disproportionality for Aboriginal and Torres Strait Islander children is calculated by dividing the proportion of children in the child protection system who are Aboriginal and Torres Strait Islander children by the proportion of children in the target population who are Aboriginal and Torres Strait Islander children.

The disproportionality ratio is calculated as follows:

$$\left[\text{Ratio} = \left(\frac{\text{Aboriginal and Torres Strait Islander children in the child protection system}}{\text{All children in the child protection system}} \right) / \left(\frac{\text{Aboriginal and Torres Strait Islander children in the target population (0–17 years)}}{\text{All children in the target population (0–17 years)}} \right) \right]$$

If the group’s representation is proportionate to their representation in the target population, the disproportionality ratio will equal 1.0. For example, if five per cent of all children in the child protection system are Aboriginal and Torres Strait Islander children and five per cent of all children in the target population (0–17 years) are Aboriginal and Torres Strait Islander children, then the disproportionality ratio will be 1.0.

This measure comprises six ratios for components of the child protection services system (see figure 16.116.1 for a simplified representation of the components):

- notifications
- receiving intensive family support services
- investigations
- substantiations
- care and protection orders
- out-of-home care.

(continued next page)

Box 16.2 (continued)

Disproportionality provides an indication of the extent to which government's child protection policies and practices result in differences in the supports and services delivered based on a group's characteristics. A group's representation should be proportional to their need for supports and services. Higher need may result in necessary disproportionality (that is, a ratio greater than 1.0). If risk factors and need are the same across groups, then neither overrepresentation or underrepresentation is desirable (that is, the disproportionality ratio should be 1.0). Both overrepresentation and underrepresentation can have undesirable consequences.

Disproportionality can reflect the uneven distribution of structural and relative disadvantage throughout the population, in addition to risk factors including economic and social factors, and can indicate a greater need for appropriate supports and services. At the same time, disproportionality can reflect biases in the system that should be avoided.

The six disproportionality ratios might fluctuate because of policy, funding and/or practice changes, such as increased investment in intensive family support and services to divert children from care, better targeting of investigative resources and the introduction of mandatory reporting. Increased community awareness and willingness to notify suspected instances of child abuse, neglect or harm can also influence these ratios.

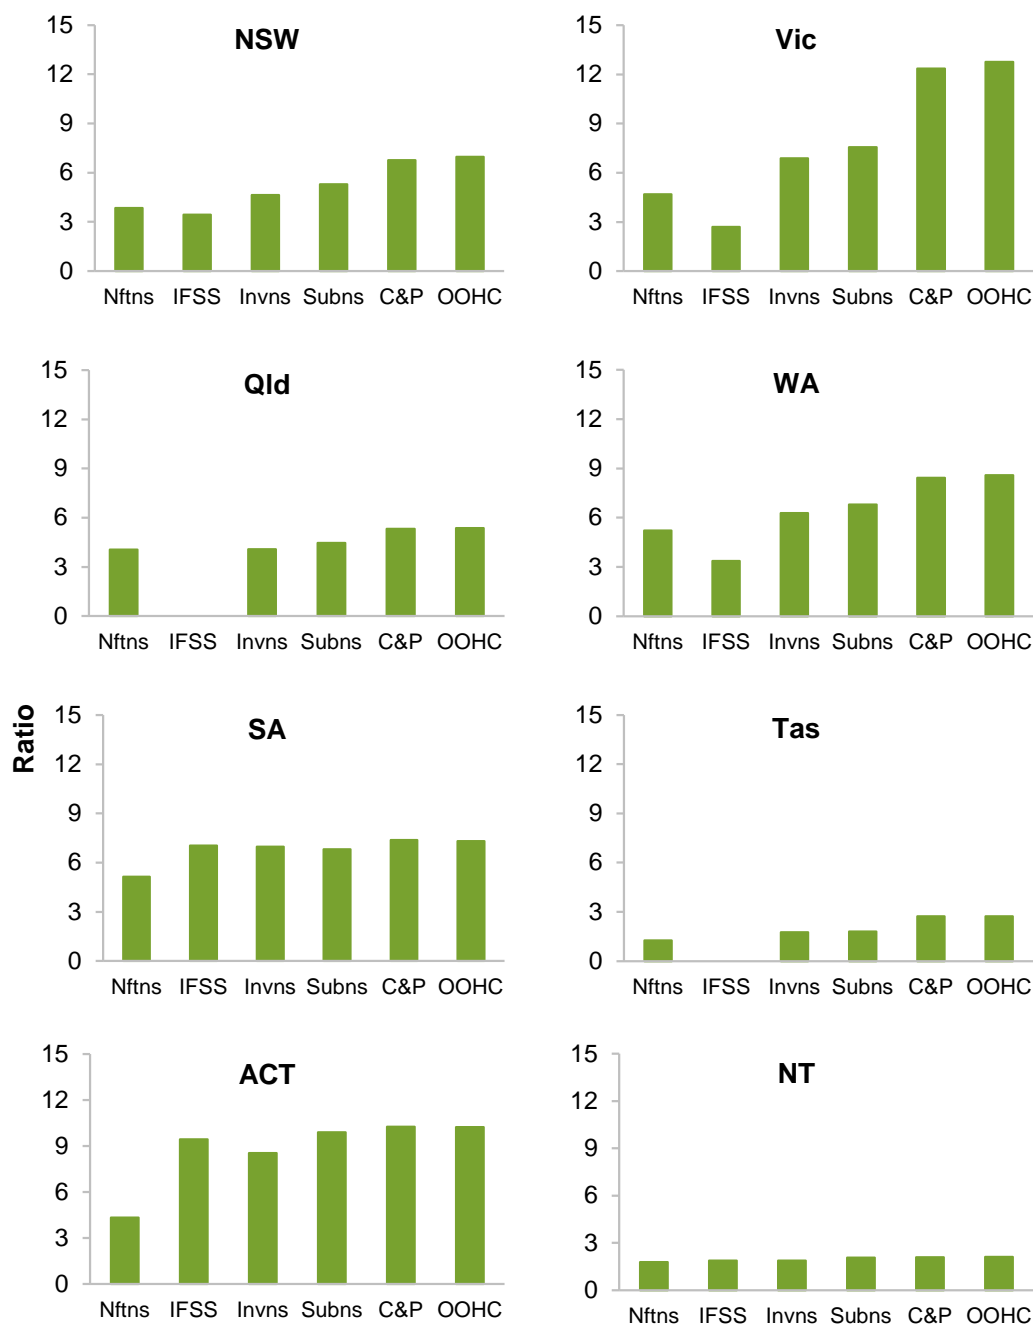

Identification of Indigenous status may lead to data quality issues for this indicator, in particular underidentification of Indigenous status is likely to result in disproportionality ratios understating Aboriginal and Torres Strait Islander children's representation in the child protection system. The disproportionality ratios should be considered in conjunction with data on the proportion of children for whom Indigenous status is not stated, which varies across states and territories (refer to tables 16A.1–2; 16A.31 and 16A.38).

Data reported for this indicator are:

- comparable (subject to caveats) within jurisdictions over time, but are not comparable across jurisdictions (see caveats in attachment tables)
- incomplete (subject to caveats) for the current reporting period. Intensive family support service data for Tasmania and Queensland were not available.

The 2016-17 disproportionality ratios for Aboriginal and Torres Strait Islander children vary within jurisdictions across each of the six service types (figure 16.4 and table 16A.8).

Figure 16.4 **Disproportionality ratios for Aboriginal and Torres Strait Islander children receiving child protection services, by service type, 2016-17^{a, b, c, d, e}**

^a **Nftns:** Notifications; **IFSS:** Intensive Family Support Services; **Invns:** Investigations; **Subns:** Substantiations; **C&P:** Care and Protection Orders; **OOHC:** Out-of-home care. ^b Intensive Family Support Services data by Indigenous status were not available for Tasmania. ^c Intensive Family Support Services data were not provided by Queensland. ^d Ratios for Family Support Services are not included in the chart as activity data were not available for NSW, Vic, Qld, SA, Tas, ACT or NT. ^e See box 16.2 and table 16A.8 for detailed definitions, footnotes and caveats.

Source: AIHW data collection (unpublished); tables 16A.8.

Effectiveness

Support to families

‘Support to families’ is an indicator of governments’ objective to support and strengthen families so that children can live in a safe and stable family environment (box 16.3).

Box 16.3 **Support to families**

‘Support to families’ is defined as the proportion of families identified as requiring support who receive support.

A high or increasing proportion of families who have been identified as requiring support and who receive support is desirable.

Data are not yet available for reporting against this indicator.

Response times

‘Response times’ is an indicator of governments’ objective to provide child protection services that are responsive, ensuring that notifications are responded to, and investigations are completed, in a timely and appropriate manner (box 16.4).

Box 16.4 **Response times**

‘Response times’ is defined by two measures:

- response time to *commence* investigations, defined as the proportion of investigations commenced within specified time periods, where the length of time (measured in days) between the date a child protection department records a notification and the date an investigation is subsequently commenced
- response time to *complete* investigations, defined as the proportion of investigations completed within specified time periods, where the length of time (measured in days) between the date a child protection department records a notification and the date an investigation is completed (that is, the date an investigation outcome is determined).

A higher and increasing proportion of investigations commenced and completed in shorter periods is desirable.

The length of time between recording a notification and commencing an investigation indicates the promptness in responding to child protection concerns. The length of time between recording a notification and completing an investigation indicates the effectiveness of responding to and conducting investigations in a timely manner.

(continued next page)

Box 16.4 (continued)

Data reported for these measures are:

- comparable (subject to caveats) within some jurisdictions over time, but are not comparable across jurisdictions
- complete (subject to caveats) for the current reporting period. All required 2016-17 data were available.

Response times to commence and complete investigations varied across jurisdictions in 2016-17. Nationally, 63.1 per cent of investigations were commenced within seven days of notification (figure 16.5(a)) and 39.1 per cent of investigations were completed in 28 days or fewer — around one in five investigations (20.8 per cent) took longer than 90 days to complete (figure 16.5(b)). These patterns are broadly consistent with available time series data (tables 16A.9–10).

Figure 16.5 Proportion of investigations commenced and completed, by time taken, 2016-17^a

^a See box 16.4 and tables 16A.9–10 for detailed definitions, footnotes and caveats.

Source: AIHW data collection (unpublished); tables 16A.9–10.

Substantiation rate

‘Substantiation rate’ is an indicator of governments’ objective that child protection services are targeted to children and young people who are at greatest risk (box 16.5).

Box 16.5 **Substantiation rate**

'Substantiation rate' is defined as the proportion of finalised investigations where abuse or neglect, or risk of abuse or neglect, was confirmed.

The substantiation rate provides an indication of the extent to which services are targeted to those at greatest risk, thereby avoiding the human and financial costs of an investigation where no abuse or neglect had occurred or was at risk of occurring.

Neither a very high nor very low substantiation rate is desirable. A very low substantiation rate might indicate that investigations are not targeted to appropriate cases, with the undesirable consequence of distress to families and undermining the likelihood that families will voluntarily seek support. A very high substantiation rate might indicate that the criteria for substantiation are unnecessarily bringing 'lower risk' families into the statutory system.

The substantiation rate might fluctuate because of policy, funding and practice changes, such as better targeting of investigative resources and the introduction of mandatory reporting. Increased community awareness and willingness to notify suspected instances of child abuse, neglect or harm may also affect the substantiation rate.

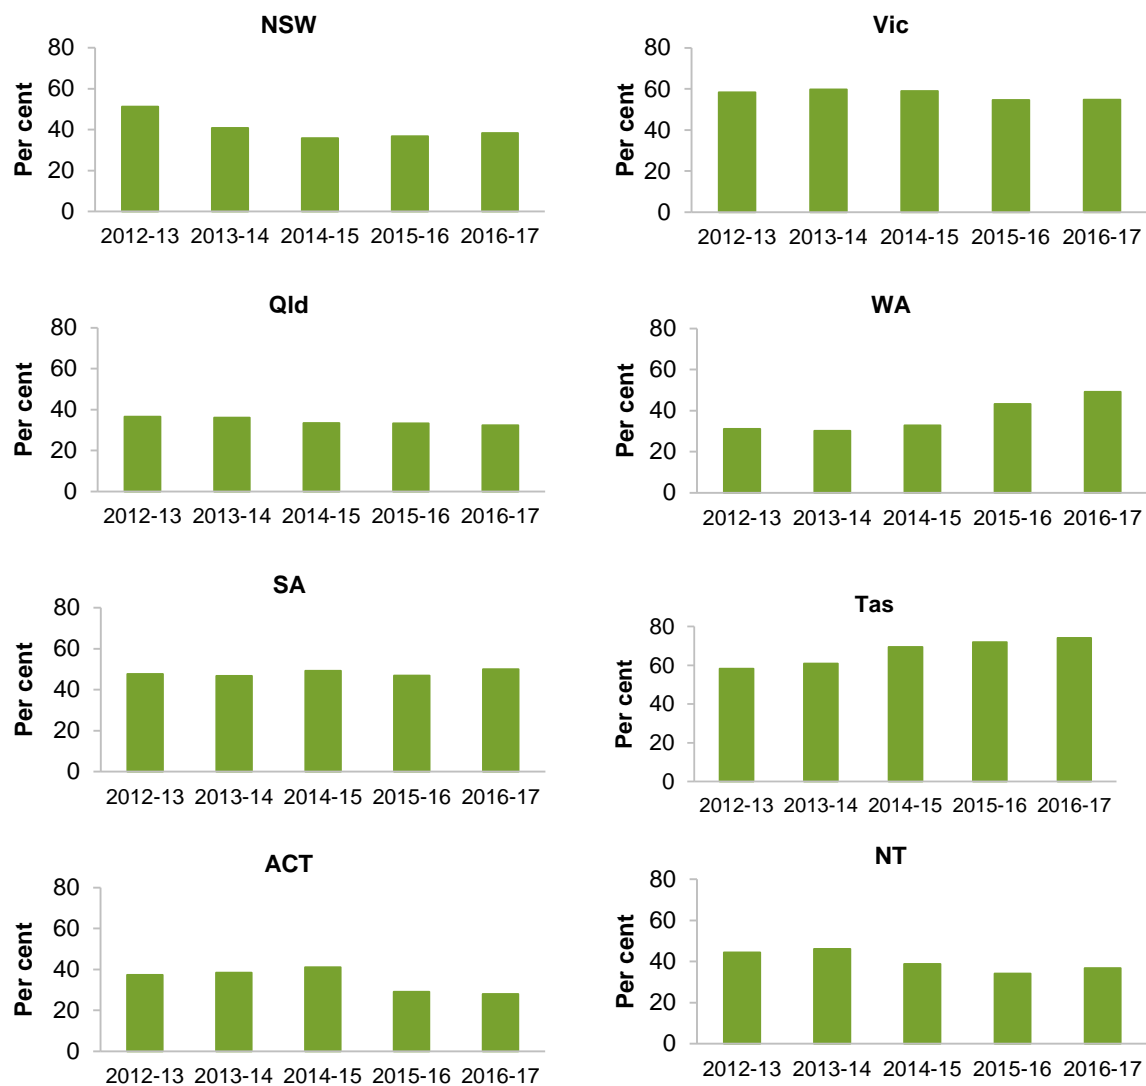

Varying thresholds for recording a substantiation across jurisdictions should also be considered when interpreting data for this indicator (see section 16.4).

Data reported for this indicator are:

- comparable (subject to caveats) within some jurisdictions over time, but are not comparable across jurisdictions
- complete (subject to caveats) for the current reporting period. All required 2016-17 data were available.

The proportion of finalised investigations where abuse or neglect, or risk of abuse or neglect was substantiated varied across jurisdictions and over time (figure 16.6 and table 16A.11).

Figure 16.6 Proportion of finalised investigations that were substantiated^a

^a See box 16.5 and table 16A.11 for detailed definitions, footnotes and caveats.

Source: AIHW data collection (unpublished); table 16A.11.

Safety in out-of-home care

‘Safety in out-of-home care’ is an indicator of governments’ objective to provide quality care for children and young people aged 0–17 years who cannot live with their parents for reasons of safety or family crisis, with an emphasis on safety, stability and permanency in children’s living arrangements (box 16.6).

Box 16.6 Safety in out-of-home care

'Safety in out-of-home care' is defined by two measures:

- the proportion of children in out-of-home care who were the subject of a substantiation of sexual abuse, physical abuse, emotional abuse or neglect (data for this measure are experimental)
- the proportion of children in out-of-home care who were the subject of a substantiation of sexual abuse, physical abuse, emotional abuse or neglect where the person responsible was living in the household providing out-of-home care.

For the first measure, the person responsible can be anyone who encounters the child while the child is in out-of-home care (that is, not limited to a person living in the household). For the second measure, the person responsible is limited to someone in the household providing out-of-home care.

A low or decreasing proportion of substantiations for both measures is desirable. Care should be taken when interpreting these data as the threshold for substantiating abuse or neglect or risk involving a child in care is generally lower than that for a child in the care of his or her own parents. This is because governments assume a greater duty of care for children removed from the care of their parents for protective reasons.

Data reported for this indicator should be interpreted with caution. Jurisdictions employ different data systems and record keeping methods, which vary in scope (for example, whether data are collected on all, or only particular, out-of-home care settings) and detail collected (for example, whether the perpetrator is recorded and whether an incident resulted in a substantiation or equivalent). These differences affect the comparability of these data across jurisdictions.

Data reported for these measures are:

- comparable (subject to caveats) within some jurisdictions over time but are not comparable across jurisdictions
- incomplete for the current reporting period. All required 2016-17 data were not available for Victoria (who did not provide data for the first measure), and Queensland, Tasmania and the NT (who did not provide data for the second measure).

The proportion of children in out-of-home care who were the subject of a substantiation of abuse or neglect was less than 6 per cent across all jurisdictions (table 16A.12). The proportion where the person responsible was living in the household was less than 3 per cent across all jurisdictions (table 16A.13).

Stability and permanency of placement

'Stability and permanency of placement' is a partial indicator of governments' objective to provide quality care for children and young people aged 0–17 years who cannot live with their parents for reasons of safety or family crisis, with an emphasis on safety, stability and permanency in children's living arrangements (box 16.7).

Box 16.7 **Stability and permanency of placement**

'Stability and permanency of placement' is defined as the proportion of children who had one or two placements during a period of continuous out-of-home care, by length of care (less than 12 months, and 12 months or more).

A high proportion of children who had one or two placements per period of care is desirable, but must be considered in conjunction with other placement indicators.

Children can have multiple placements for appropriate reasons (for example, an initial placement followed by a longer-term placement) or it may be desirable to change placements to achieve better compatibility between a child and family, or to achieve a permanent care arrangement for the child. It is not desirable for a child to stay in an unsatisfactory or unsupportive placement. In addition, older children are more likely to have multiple placements as they move towards independence and voluntarily seek alternate placements.

Data are only for children who were on orders and who exited care during the reporting period. There are limitations to counting placement stability and permanency using a cohort of children on exit from care rather than longitudinally tracking a cohort of children on their entry into care. An exit cohort is biased to children who stay a relatively short time in care and thus are more likely to have experienced fewer placements. From the 2014-15 period onwards, the counting rules for this indicator were modified to exclude placements lasting less than seven days. In addition, the data do not distinguish between long and short-term orders. Long-term orders can indicate legal permanency of placement, though a child may still experience multiple placements while subject to a long-term order.

Data reported for this indicator are:

- comparable (subject to caveats) within some jurisdictions over time but are not comparable across jurisdictions
- complete for the current reporting period. All required 2016-17 data were available.

Nationally in 2016-17, 87.8 per cent of children on a care and protection order who exited care within 12 months experienced one or two placements (figure 16.7(a)), while for children who had been in out-of-home care 12 months or more this proportion was lower at 49.0 per cent (figure 16.7(b)) (table 16A.14). To assist with the interpretation of this indicator, table 16A.15 details the length of time children spent in continuous out-of-home care for all children in out-of-home care, while table 16A.16 details the length of time in continuous out-of-home care for children who exited out-of-home care.

Figure 16.7 Proportion of children on an order exiting care who had one or two placements^{a, b}

^a See box 16.7 and table 16A.14 for detailed definitions, footnotes and caveats. ^b Data were not available for WA for 2012-13 and 2013-14.

Source: AIHW data collection (unpublished); table 16A.14.

Children in home-based care

‘Children in home-based care’ is an indicator of governments’ objective to provide services that meet the needs of individual children and young people in the child protection system (box 16.8).

Box 16.8 Children in home-based care

'Children in home-based care' is defined as the proportion of children in out-of-home care who are in home-based care.

A high or increasing proportion of children in out-of-home care who are placed in home-based care is desirable.

Placing children in home-based care is generally considered to be in their best interests, particularly for younger children. Children will generally make better developmental progress in family settings than in residential or institutional care environments.

Data reported for this indicator are:

- comparable (subject to caveats) across jurisdictions and over time
- complete for the current reporting period. All required data for 30 June 2017 were available.

Nationally at 30 June 2017, 93.2 per cent of children in care were in home-based care — 97.3 per cent for children aged less than 12 years, and 85.2 per cent for children aged 12–17 years (table 16A.17). Proportions were similar for Aboriginal and Torres Strait Islander and non-Indigenous children, and have been consistent across available time series data. To assist with the interpretation of this indicator, table 16A.18 details the type of out-of-home care placement for children, by Indigenous status.

Placement maintains connections

'Placement maintains connections' is an indicator of governments' objective to provide services that meet the needs of individual children and young people in the child protection system (box 16.9).

Box 16.9 Placement maintains connections

'Placement maintains connections' is defined by four measures:

- *placement with relatives or kin* – the proportion of all children in out-of-home care who are placed with relatives or kin who receive government financial assistance to care for that child
- *placement in accordance with the Aboriginal and Torres Strait Islander child placement principle* – the proportion of Aboriginal and Torres Strait Islander children in out-of-home care who are placed with the child's extended family, Aboriginal and Torres Strait Islander community or other Aboriginal and Torres Strait Islander people
- *local placement* – the proportion of children in out-of-home care attending the same school that they attended before entering out-of-home care
- *placement with sibling* – the proportion of children who are on orders and in out-of-home care at 30 June who have siblings also on orders and in out-of-home care, who are placed with at least one of their siblings.

(continued next page)

Box 16.9 (continued)

High or increasing rates for all four measures are desirable, though a placement decision needs to consider all factors regarding the child's safety and wellbeing and therefore may involve weighing up the measures separately. Placing children so that connections with family, kin and/or community can be maintained or enhanced is generally the preferred out-of-home care placement option due to the increased continuity, familiarity and stability for the child, and the association with improved long-term outcomes. However, placements with family, kin and/or community may not always be the best option.

The measure 'placement in accordance with the Aboriginal and Torres Strait Islander child placement principle' should be interpreted with care as it is a proxy, reporting the placement outcomes of Aboriginal and Torres Strait Islander children rather than compliance with the principle.

Identification of Indigenous status may lead to data quality issues for this indicator, in particular high rates of Indigenous status not stated are likely to affect the results.

Data for the measures 'local placement' and 'placement with sibling' are under development and are not available for this report.

Data reported for the 'placement with relatives or kin' and 'placement in accordance with the Aboriginal and Torres Strait Islander child placement principle' measures are:

- comparable (subject to caveats) across jurisdictions and over time
- complete for the current reporting period. All required data for 30 June 2017 were available.

Nationally at 30 June 2017, the proportion of children placed with relatives or kin was 49.5 per cent, with the proportion slightly higher for Aboriginal and Torres Strait Islander children (50.1 per cent) than for non-Indigenous children (49.2 per cent) (figure 16.8).

The proportion of children placed with relatives or kin has increased 4.5 percentage points since 30 June 2008, though has decreased 4.7 percentage points over the same period for Aboriginal and Torres Strait Islander children (table 16A.19).

Figure 16.8 **Proportion of children in out-of-home care placed with relatives/kin, by Indigenous status, at 30 June 2017^a**

^a See box 16.9 and table 16A.19 for detailed definitions, footnotes and caveats.

Source: AIHW data collection (unpublished); table 16A.19.

The Aboriginal and Torres Strait Islander child placement principle comprises five domains; prevention, partnership, placement, participation and connection (SNAICC 2013; DSS 2015). The placement domain specifies the following priorities:

- placement with Aboriginal or Torres Strait Islander relatives or extended family members, or other relatives or extended family members
- placement with Aboriginal and Torres Strait Islander family-based carers.

If the preferred options are not available, the child may be placed with a non-Indigenous carer or in a residential setting. If the child is not placed with their extended Aboriginal or Torres Strait Islander family, the placement must be within close geographic proximity to the child's family. All jurisdictions have adopted the Aboriginal and Torres Strait Islander child placement principle in both legislation and policy.

Nationally at 30 June 2017, 52.3 per cent of Aboriginal and Torres Strait Islander children in out-of-home care were placed with relatives/kin (this proportion differs to the first measure as it excludes those in independent living). A further 15.3 per cent were placed with other Aboriginal and Torres Strait Islander carers or in Aboriginal and Torres Strait Islander residential care. Proportions varied across jurisdictions (figure 16.9). Nationally, the proportion of Aboriginal and Torres Strait Islander children in out-of-home care who were placed with relatives/kin, other Aboriginal and Torres Strait Islander carers, or in Aboriginal and Torres Strait Islander residential care has decreased over the past 10 years (from 74.0 per cent at 30 June 2008 to 67.6 per cent at 30 June 2017) (table 16A.20).

Figure 16.9 **Placement of Aboriginal and Torres Strait Islander children in out-of-home care, at 30 June 2017^a**

^a See box 16.9 and table 16A.20 for detailed definitions, footnotes and caveats.

Source: AIHW data collection (unpublished); table 16A.20.

Children with current documented case plans

‘Children with current documented case plans’ is an indicator of governments’ objective to provide services that meet the needs of individual children and young people in the child protection system (box 16.10).

Box 16.10 **Children with current documented case plans**

‘Children with current documented case plans’ is defined as the number of children who have a current documented and approved case plan as a proportion of all children who are required to have a current documented and approved case plan.

A case plan is an individualised, dynamic written plan (or support agreement) developed between a family and an agency based on an assessment process. A current documented case plan is one that has been approved and/or reviewed within the previous 12 months.

A high or increasing rate of children with current documented case plans is desirable.

The indicator does not assess the quality of case plans, nor the extent to which identified needs and actions are put into place. These factors should be taken into account when considering the results reported for this indicator.

(continued next page)

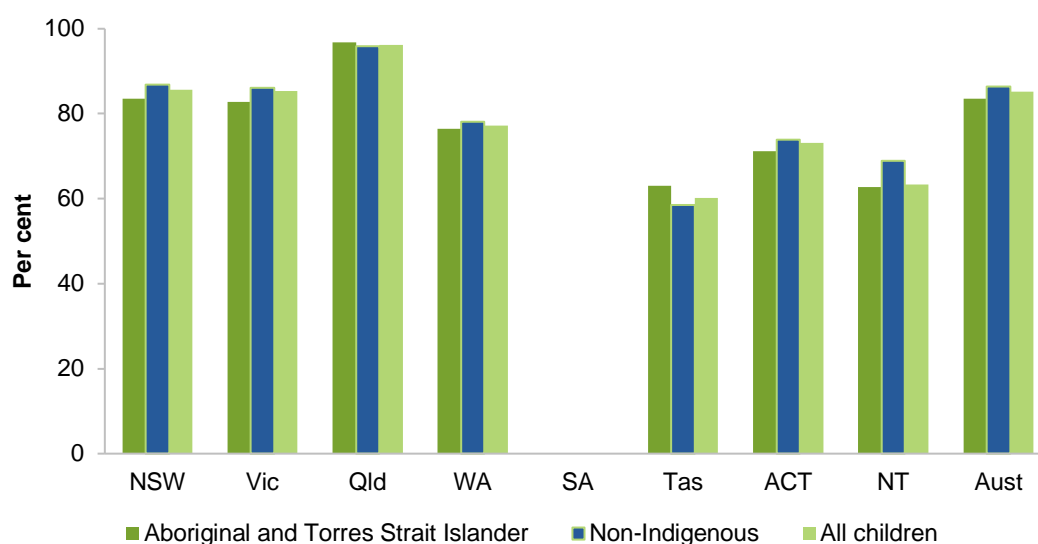

Box 16.10 (continued)

Data reported for this indicator are:

- comparable (subject to caveats) within jurisdictions over time, but are not comparable across jurisdictions
- incomplete for the current reporting period. All required 2016-17 data were not available for SA.

Nationally (excluding SA), 85.3 per cent of children required to have a current documented and approved case plan, had such a plan at 30 June 2017 (figure 16.10).

Figure 16.10 Proportion of children with current documented and approved case plans, at 30 June 2017^{a, b}

^a See box 16.10 and table 16A.21 for detailed definitions, footnotes and caveats. ^b Data were not available for SA.

Source: AIHW data collection (unpublished); table 16A.21.

Continuity of case worker

‘Continuity of case worker’ is an indicator of governments’ objective to provide quality care for children and young people aged 0–17 years who cannot live with their parents for reasons of safety or family crisis, with an emphasis on safety, stability and permanency in children’s living arrangements (box 16.11).

Box 16.11 Continuity of case worker

'Continuity of case worker' is defined as the proportion of children in out-of-home care who have one caseworker assigned during the reporting period.

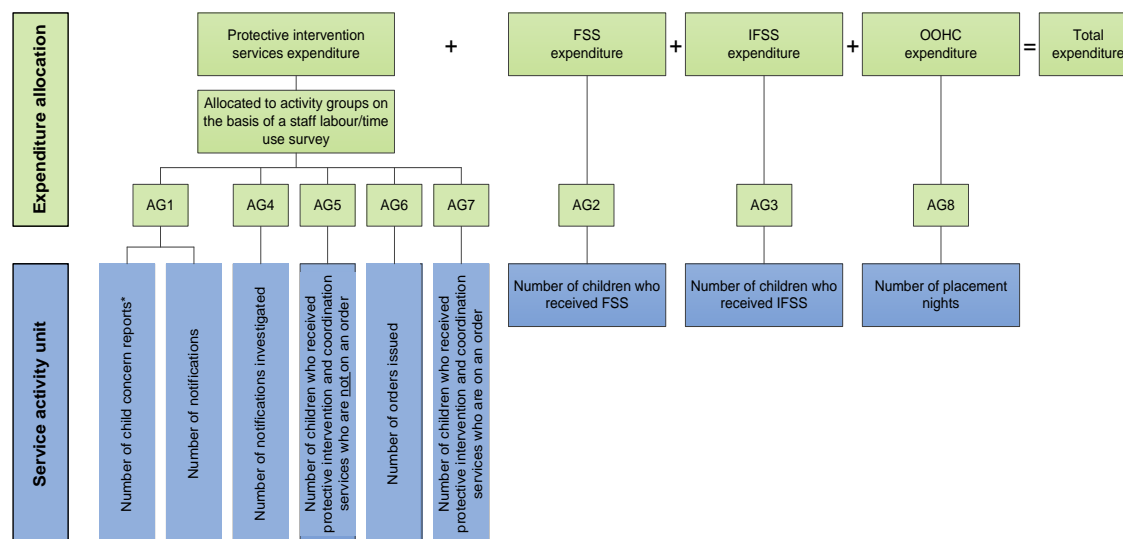

A high or increasing percentage of children in out-of-home care who have one caseworker assigned during the reporting period is desirable.

Data are not yet available for reporting against this indicator.

Efficiency

Efficiency indicators for child protection services are calculated using the pathways model, a top-down activity-based costing method. Eight national pathways provide a high-level representation of the services that children and families could receive in any jurisdiction. Each pathway consists of common activity groups, which act as the 'building blocks' for each of the pathways. The aggregate cost of each activity group within the pathway will allow the unit cost of an individual pathway to be derived. Figure 16.11 shows how unit costs are calculated in accordance with the pathways model.

Figure 16.11 Calculation of unit costs in accordance with the pathways model^a

*not applicable for all jurisdictions

Expenditure allocation divided by service activity unit equals unit costs

^a **Activity group 1 (AG1):** Receipt and assessment of initial information about a potential protection and support issue. **Activity group 2 (AG2):** Provision of generic family support services. **Activity group 3 (AG3):** Provision of intensive family support services. **Activity group 4 (AG4):** Secondary information gathering and assessment. **Activity group 5 (AG5):** Provision of short-term protective intervention and coordination services for children not on an order. **Activity group 6 (AG6):** Seeking an order. **Activity group 7 (AG7):** Provision of protective intervention, support and coordination services for children on an order. **Activity group 8 (AG8):** Provision of out-of-home care services

The activity groups and detailed definitions are included in section 16.4. Development of national reporting against these activity groups is ongoing and data are experimental.

Unit costs for protective intervention services activity groups

‘Unit costs for protective intervention services activity groups’ is reported as an indicator of governments’ objective to provide child protection services in an efficient manner (box 16.12).

Box 16.12 Unit costs for protective intervention services activity groups

‘Unit costs for protective intervention services activity groups’ is defined as total recurrent expenditure on a child protection activity, divided by the relevant units of service activity, resulting in six measures:

- cost per report to child protection (AG1)
- cost per notification (AG1)
- cost per notification investigated (AG4)
- cost per child commencing protective intervention and coordination services who is not on an order (AG5)
- cost per order issued (AG6)
- cost per child commencing protective intervention and coordination services who is on an order (AG7).

Low or decreasing expenditure per child protection activity can suggest more efficient services, but could also indicate lower quality and should be considered together with the results for other indicators in this chapter.

Data for unit costs are experimental and should be considered together with the proportional allocation of total expenditure across all activity groups comprising the pathways method.

Data reported for this indicator are:

- comparable (subject to caveats) within jurisdictions over time but are not comparable across jurisdictions (see caveats in attachment tables). The measure ‘cost per report to child protection’ is not applicable for Victoria and the ACT, and is applicable for Tasmania from 2016-17.
- incomplete for the current reporting period. All required 2016-17 data for Victoria and SA were not available.

Unit costs for child protection service activities from 2011-12 to 2016-17 varied across jurisdictions (tables 16A.22–29). In 2016-17, the cost per report to child protection ranged from \$103 to \$274 (this unit cost is not applicable for all jurisdictions); and the cost per notification investigated ranged from \$486 to \$2728. Other unit costs are reported in tables 16A.22–29.

Unit cost for support services

‘Unit cost for support services’ is reported as an indicator of governments’ objective to provide child protection services in an efficient manner (box 16.13).

Box 16.13 Unit cost for support services

‘Unit cost for support services’ is defined as total recurrent expenditure on support services, divided by the number of children receiving support services, resulting in two measures:

- cost per child receiving family support services (AG2)
- cost per child receiving intensive family support services (AG3)

Low or decreasing cost per child receiving support services can suggest more efficient services, but could also indicate lower quality and should be considered together with the results for other indicators in this chapter.

Data for unit costs are experimental and should be considered together with the proportional allocation of total expenditure across all activity groups comprising the pathways method.

Data reported for this indicator are:

- comparable (subject to caveats) within jurisdictions over time but are not comparable across jurisdictions (see caveats in attachment tables)
- incomplete for the current reporting period. Only Western Australia was able to provide all required 2016-17 data for cost per child receiving family support services (AG2). Queensland did not provide 2016-17 activity data for intensive family support services (AG3).

Nationally in 2016-17 (excluding Queensland), the cost per child receiving intensive family support services (AG3) was \$11 279 (figure 16.12).

Figure 16.12 **Cost per child receiving intensive family support services (AG3) (2016-17 dollars)^{a, b}**

^a See box 16.13 and tables 16A.22-30 for detailed definitions, footnotes and caveats. ^b Data were not provided by Queensland for 2016-17, the ACT for 2013-14 and for the NT for 2013-14 to 2015-16.

Source: AIHW data collection (unpublished); State and Territory governments (unpublished); tables 16A.22-30.

Unit cost for out-of-home care

'Unit cost for out-of-home care' is an indicator of governments' objective to provide child protection services in an efficient manner (box 16.14).

Box 16.14 Unit cost for out-of-home care

'Unit cost for out-of-home care' is defined as total real recurrent expenditure on out-of-home care services, divided by the total number of placement nights in out-of-home care (AG8).

Low or decreasing expenditure per placement night can suggest more efficient services, but could also indicate lower quality and should be considered together with the results for other indicators in this chapter.

Data for unit costs are experimental and should be considered together with the proportional allocation of total expenditure across all activity groups comprising the pathways method.

Data reported for this indicator are:

- comparable (subject to caveats) within jurisdictions over time but are not comparable across jurisdictions
- complete for the current reporting period. All required 2016-17 data were available.

Nationally in 2016-17, the unit cost for out-of-home care was \$181.37 (figure 16.13).

Figure 16.13 **Cost per placement night in out-of-home care (AG8)
(2016-17 dollars)^a**

^a See box 16.14 and table 16A.32 for detailed definitions, footnotes and caveats.

Source: AIHW data collection (unpublished); State and Territory governments (unpublished); table 16A.32.

Cost per placement night in out-of-home care should be considered in conjunction with expenditure on out-of-home care per child (and by placement type). The cost per child in out-of-home care at 30 June 2017 varied across jurisdictions ranging between \$52 758 and \$117 805 — considerably higher for residential care (ranging between \$63 566 and \$811 845) compared to non-residential care (ranging between \$32 455 and \$52 534) (table 16A.33).

Outcomes

Outcomes are the impact of services on the status of an individual or group (see chapter 1).

Improved safety — substantiation rate after decision not to substantiate

‘Improved safety’ is an indicator of governments’ objective to protect children and young people who are at risk of abuse and neglect within their families, or whose families do not have the capacity to provide care and protection (box 16.15).

Box 16.15 Improved safety

'Improved safety' is defined by two measures:

- substantiation rate *after a decision not to substantiate*, defined as the proportion of children who were the subject of an investigation in the previous financial year that led to a decision not to substantiate, and who were later the subject of a substantiation within 3 or 12 months of the initial decision not to substantiate. The year reported relates to the year of the initial decision not to substantiate
- substantiation rate *after a prior substantiation*, defined as the proportion of children who were the subject of a substantiation in the previous financial year, who were subsequently the subject of a further substantiation within the following 3 or 12 months. The year reported relates to the year of the initial substantiation.

A low or decreasing rate for these measures is desirable. However, reported results can be affected by the finalisation of investigations, factors beyond the control of child protection services, or a change in circumstances after the initial decision not to substantiate was made. A demonstrable risk of abuse or neglect might not have existed in the first instance. In addition, this indicator does not distinguish between subsequent substantiations which are related to the initial notification (that is, the same source of risk of abuse or neglect) and those that are unrelated to the initial notification (that is, a different source of risk of abuse or neglect). This indicator partly reveals the extent to which an investigation has not succeeded in identifying the risk of abuse or neglect to a child who is subsequently the subject of a substantiation. It also provides a measure of the adequacy of interventions offered to children to protect them from further abuse or neglect. This indicator should be considered with other outcome indicators.

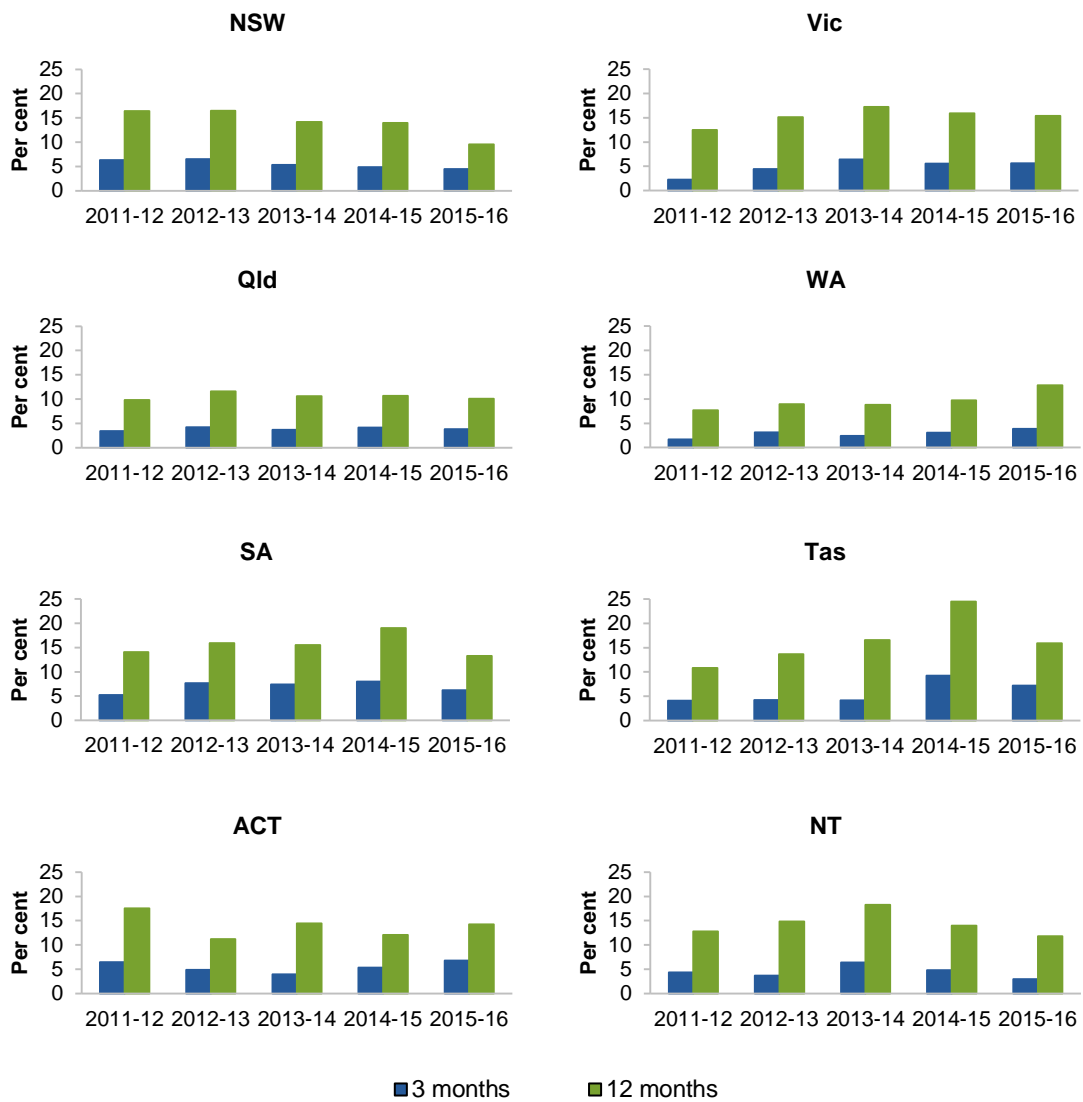

Varying thresholds for recording a substantiation across jurisdictions should also be considered when interpreting data for this indicator (see section 16.4).

Data reported for these measures are:

- comparable (subject to caveats) within jurisdictions over time but are not comparable across jurisdictions (see caveats in attachment tables)
- complete for the current reporting period. All required 2015-16 data were available.

The proportion of substantiations that occurred within 3 and 12 months of a decision not to substantiate are provided in figure 16.14. In 2015-16, rates were under 16 per cent in all jurisdictions (table 16A.34).

Figure 16.14 Improved safety — substantiation rate within 3 months and 12 months after a decision not to substantiate^a

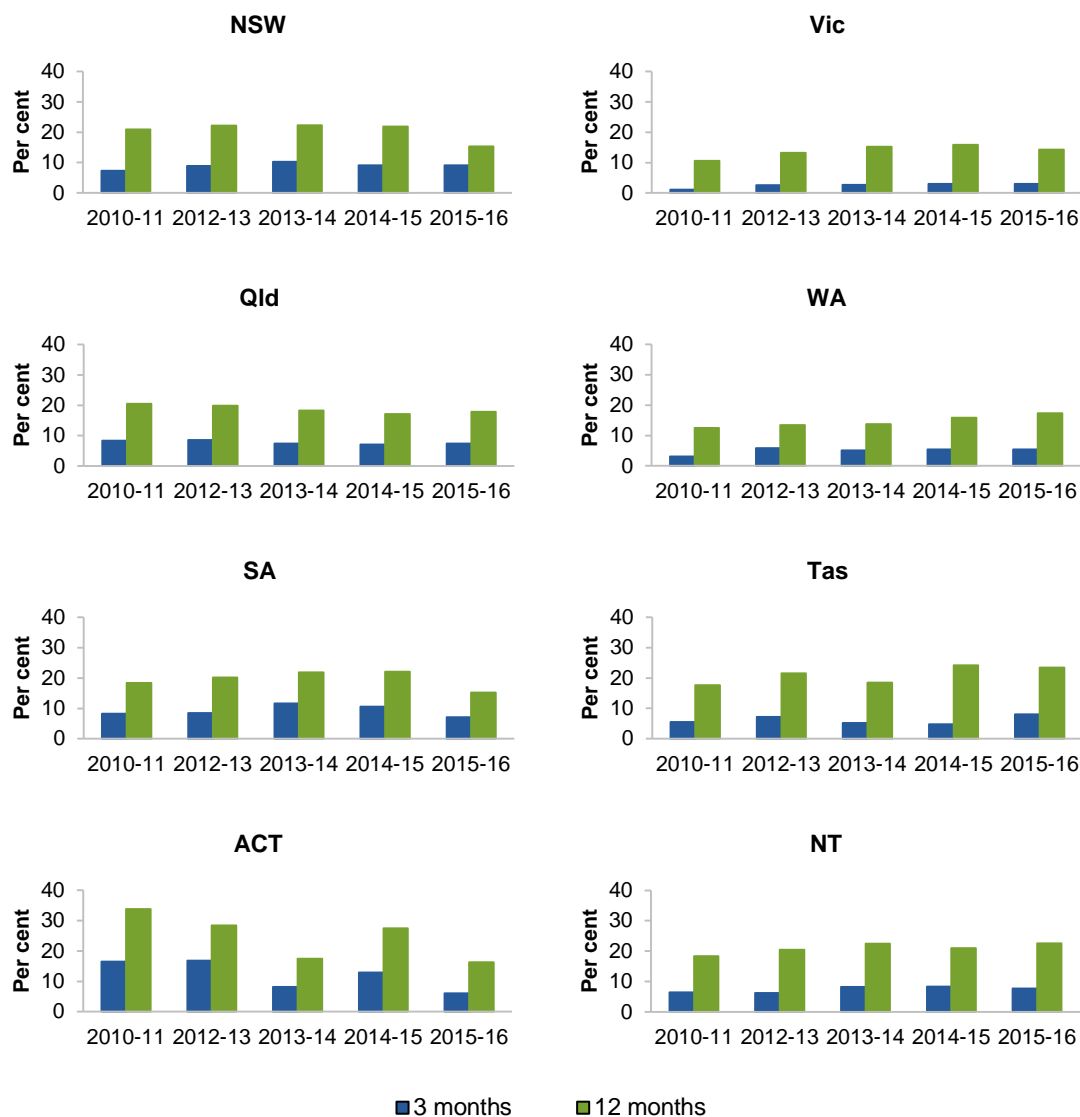

^a See box 16.15 and table 16A.34 for detailed definitions, footnotes and caveats.

Source: AIHW data collection (unpublished); table 16A.34.

The proportion of substantiations that occurred within 3 and 12 months of a prior substantiation are provided in figure 16.15. In 2015-16, rates were under 24 per cent in all jurisdictions (table 16A.35).

Figure 16.15 Improved safety — substantiation rate within 3 months and 12 months of a prior substantiation^a

^a See box 16.15 and table 16A.35 for detailed definitions, footnotes and caveats.

Source: AIHW data collection (unpublished); table 16A.35.

Improved education

‘Improved education’ is an indicator of governments’ objective to support children and young people in the child protection system to reach their potential (box 16.16).

Box 16.16 Improved education

'Improved education' is defined as the proportion of children on guardianship and custody orders achieving at or above national minimum standards in reading and numeracy in Year 5.

A high or increasing rate of children on guardianship and custody orders achieving at or above national minimum standards in reading and numeracy, and relative to all children, is desirable.

Factors outside the control of child protection services have an influence on the educational outcomes of children on guardianship and custody orders, and care should be exercised when interpreting results.

When interpreting NAPLAN (National Assessment Program — Literacy and Numeracy) data, it is important to take into account student participation rates (table 16A.31). Children exempted from NAPLAN testing are recorded as not having met the national minimum standards in reading and numeracy. Experimental data indicate that children on guardianship and custody orders are exempted from NAPLAN testing at significantly higher rates than the general student population, which might contribute to poorer reported NAPLAN results for children on orders, compared with the general student population.

Data reported for this measure are:

- comparable (subject to caveats) across jurisdictions
- complete for the 2013 reporting period. Only Queensland and SA have data available for the 2014 and 2015 reporting period.

In 2013, the proportions of children in care at or above the national minimum standards for Year 5 reading and numeracy varied across jurisdictions, and were below the proportions for all students (by at least 10 percentage points for the majority of jurisdictions) (table 16A.36).

Improved health and wellbeing of the child

'Improved health and wellbeing of the child' is an indicator of governments' objective to support children and young people in the child protection system to reach their potential (box 16.17).

Box 16.17 Improved health and wellbeing of the child

'Improved health and wellbeing of the child' is currently defined by one measure related to wellbeing: the proportion of children and young people in the child protection system not classified in the 'abnormal' range on the Strengths and Difficulties Questionnaire (SDQ) scale. See section 16.4 for further information on the SDQ.

A high or increasing percentage of children and young people in the child protection system with improved wellbeing is desirable.

Data are not yet available for reporting against this measure. A measure of improved health of the child is still to be developed.

Safe return home

‘Safe return home’ is an indicator of governments’ objective to promote child and family wellbeing by enabling families to care for and protect children and young people (box 16.18).

Box 16.18 Safe return home

‘Safe return home’ is defined as the proportion of children and young people placed in out-of-home care who subsequently return home, and for whom there was no further substantiation (within a specified time period).

High or increasing proportions of children and young people returning home for whom there was no further substantiation is desirable.

Data are not yet available for reporting against this indicator. A measure of safe return home is still to be developed.

16.4 Definitions of key terms

Aboriginal and Torres Strait Islander person

Person of Aboriginal or Torres Strait Islander descent who identifies as being an Aboriginal or Torres Strait Islander and is accepted as such by the community with which he or she lives.

Activity Group 1 (pathways)

Receipt and assessment of initial information about a potential protection or support issue

Activities that are typically associated with receipt and assessment of initial information including receipt and recording of information, review of department databases, initial assessment of information and decisions about the appropriate response. This activity can also include consultation, with possible provision of advice. Activities by non-government organisations (NGOs) may be included if appropriate.

Activity Group 2 (pathways)

Provision of generic family support services

Activities that are typically associated with provision of lower level family support services at various stages including identification of family needs, provision of support services and diversionary services, some counselling and active linking of the family to support networks. Services are funded by government but can be delivered by either the relevant agency or a NGO. This bundle of services does not involve planned follow-up by the relevant agency after initial service delivery. The services will be delivered under voluntary arrangements between the relevant agency and family. Clients may receive these services more than once.

Activity Group 3 (pathways)

Provision of intensive family support services

Activities that are typically associated with provision of complex or intensive family support services including provision of therapeutic and in-home supports such as counselling and mediation, modelling of positive parenting strategies, referrals to intensive support services that may be provided by NGOs, advocacy on behalf of clients, and intensive support for a family in a residential setting and/or supported accommodation. These services may be provided if other diversionary services are inappropriate to the case and may lead to statutory services being provided to the client.

**Activity Group 4
(pathways)**

Secondary information gathering and assessment

Activities that are typically associated with secondary information gathering and assessment are currently counted as 'investigations' in the Report on Government Services. As part of this activity group a decision may be made to substantiate or not substantiate. Information gathering activities include:

- sighting the child
- contacting people with relevant information about the child or family (for example, teachers, police, support services)
- interviewing the child, sibling(s) and parents
- observing family interactions
- obtaining assessments of the child and/or family
- conducting family group conferences
- liaising with agencies providing services to the child and family
- recording a substantiation or non-substantiation decision
- case conferences with partners and contributors in the investigation and assessment process.

**Activity Group 5
(pathways)**

Provision of short-term protective intervention and coordination services for children not on an order

Activities that are typically associated with provision of short-term protective intervention and coordination services including:

- working with the family to address protective issues
- developing networks of support for the child
- monitoring and reviewing the safety of the child
- monitoring and reviewing family progress against case planning goals
- case conferences with agencies providing services to the child and/or family, internal discussions and reviews
- specialist child-focused therapeutic support.

**Activity Group 6
(pathways)**

Seeking an order

Activities that are typically associated with seeking orders (court orders or voluntary/administrative orders) including:

- preparing applications for the order
- preparing reports for the court
- obtaining assessment reports to submit to the court
- informing parties to the court proceedings, including parents, the child, and lawyers
- informing and briefing legal counsel or internal court groups
- going through internal pre-court review processes
- attending court
- conducting family group conferences.

**Activity Group 7
(pathways)**

Provision of protective intervention, support and coordination services for children on an order

Activities that are typically associated with provision of longer-term protective intervention and coordination services including:

- monitoring the child or young person's progress and development (for example, social development and education progress) and undertaking activities that facilitate progress and development
- meeting any specific requirements of any court order
- reviewing appropriateness of the order for the circumstances of the child or young person. This usually occurs at intervals established by the court or in legislation
- reporting back to court
- long term cases involving out-of-home care.

**Activity Group 8
(pathways)**

Provision of out-of-home care services

Activities that are typically associated with provision of out-of-home care services including:

- finding suitable placement(s) for the child
- assisting the child or young person to maintain contact with his/her family
- in some cases, staff payments for recruiting and training carers
- assessing suitability of potential kinship carers
- assisting the child or young person to maintain contact with their family
- working to return the child home
- assisting the child or young person as they prepare to leave care as the end of the order approaches.

Care and protection orders

Care and protection orders are legal orders or arrangements which give child protection departments some responsibility for a child's welfare. The scope of departmental involvement mandated by a care and protection order is dependent on the type of order, and can include:

- responsibility for overseeing the actions of the person or authority caring for the child
- reporting or giving consideration to the child's welfare (for example, regarding the child's education, health, religion, accommodation and financial matters).

Types of care and protection orders:

- Finalised guardianship or custody orders – involve the transfer of legal guardianship to the relevant state or territory department or NGO. These orders involve considerable intervention in a child's life and that of his or her family, and are sought only as a last resort. Guardianship orders convey responsibility for the welfare of a child to a guardian. Guardianship orders do not necessarily grant the right to the daily care and control of a child, or the right to make decisions about the daily care and control of a child, which are granted under custody orders. Custody orders generally refer to orders that place children in the custody of the state or territory, or department responsible for child protection or NGO. These orders usually involve the child protection department being responsible for the daily care and requirements of a child, while his or her parent retains legal guardianship. Custody alone does not bestow any responsibility regarding the long-term welfare of the child.
- Finalised third party parental responsibility orders – transfer all duties, powers, responsibilities and authority parents are entitled to by law, to a nominated person(s) considered appropriate by the court. The nominated person may be an individual such as a relative or an officer of a state or territory department. Third party parental responsibility may be ordered when a parent is unable to care for a child. 'Permanent care orders' are an example of a third party parental responsibility order and involve the transfer of guardianship to a third party carer. It can also be applied to the achievement of a stable arrangement under a long-term guardianship order to 18 years without guardianship being transferred to a third party. These orders are only applicable in some jurisdictions.
- Finalised supervisory orders – give the department responsible for child protection some responsibility for a child's welfare. Under these orders, the department supervises and/or directs the level and type of care that is to be provided to the child. Children under supervisory orders are generally under the responsibility of their parents and the guardianship or custody of the child is unaffected. Finalised supervisory orders are therefore less interventionist than finalised guardianship orders but require the child's parent or guardian to meet specified conditions, such as medical care of the child.

	<ul style="list-style-type: none"> • Interim and temporary orders – generally cover the provision of a limited period of supervision and/or placement of a child. Parental responsibility under these orders may reside with the parents or with the department responsible for child protection. Orders that are not finalised (such as an application to a court for a care and protection order) are also included in this category, unless another finalised order is in place. • Administrative arrangements – agreements with child protection departments that have the same effect as a court order in transferring custody or guardianship. These arrangements can also allow a child to be placed in out-of-home care without going through court.
Child	Children are counted only once, even if they are on more than one care and protection order.
Children in out-of-home care during the year	A person aged 0–17 years (including, at times, unborn children). The total number of children who were in at least one out-of-home care placement at any time during the year. A child who is in more than one placement is counted only once.
Exited out-of-home care	Where a child leaves a government-funded placement for more than 60 days. This does not necessarily mean that a child has returned to the care of his or her family.
Family based care	Home-based care (see 'Out-of-home care').
Family support services	Activities associated with the provision of lower level (that is, non-intensive) services to families in need, including identification and assessment of family needs, provision of support and diversionary services, some counselling and active linking and referrals to support networks. These types of services are funded by government but can be delivered by a child protection agency or a non-government organisation. These services are typically delivered via voluntary arrangements (as distinct from court orders) between the relevant agency and family. This suite of services does not typically involve planned follow-up by the applicable child protection agency after initial service referral or delivery.
Guardian	Any person who has the legal and ongoing care and responsibility for the protection of a child.
Intensive family support services	Specialist services that aim to prevent the imminent separation of children from their primary caregivers as a result of child protection concerns and to reunify families where separation has already occurred. These services: <ul style="list-style-type: none"> • are funded or established explicitly to prevent the separation of or to reunify families • provide a range of services as part of an integrated strategy focusing on improving family functioning and skills, rather than providing a single type of service • are intensive in nature, averaging at least four hours of service provision per week for a specified short term period (usually less than six months). Families are generally referred to these services by the statutory child protection agency and will have been identified through the child protection process. Intensive family support services may use some or all of the following strategies: assessment and case planning; parent education and skill development; individual and family counselling; drug and alcohol counselling and domestic and family violence support; anger management; respite and emergency care; practical and financial support; mediation, brokerage and referral services; and training in problem solving.

Investigation

An investigation is the process whereby the relevant department obtains more detailed information about a child who is the subject of a notification and makes an assessment about the risk of abuse or neglect to the child, and his or her protective needs. Not all notifications are investigated in all jurisdictions. For example, if a determination is made that a child and family are better served by family support services rather than a child protection response, children and families might be referred to diversionary and support services. Once it has been decided that an investigation is required, the investigation process is similar across jurisdictions.

The department responsible for child protection may obtain further information about the child and his or her family by checking information systems for any previous history, undertaking discussions with agencies and individuals, interviewing/sighting the child and/or interviewing the caregivers/parents. At a minimum, the child is sighted whenever practicable, and the child's circumstances and needs are assessed. Where possible, an investigation determines whether a notification is substantiated or not substantiated.

Investigation finalised

Where an investigation is completed and an outcome of 'substantiated' or 'not substantiated' is recorded by 31 August.

Investigation in process

Where an investigation is commenced but an outcome is not recorded by 31 August.

Length of time in continuous out-of-home care

The length of time a child is in out-of-home care on a continuous basis. Any break of 60 days or more is considered to break the continuity of the placement. Where a child returns home for less than 60 days and then returns to the former placement or to a different placement, this does not affect the length of time in care. Holidays or authorised absences (less than 60 days) in a placement do not break the continuity of placement. A break in a placement does not necessarily mean a child has returned to the care of his or her family.

Notification

Notifications are reports lodged by members of the community with the appropriate statutory child protection department to signify that they have reason to believe that a child is in need of protection. Depending on the circumstances, not all reports received by child protection departments will be recorded as notifications. Most jurisdictions assess incoming reports to determine whether they meet the threshold for recording a notification. Where, for example, a determination is made that the alleged behaviour does not meet the definition of a child in need of protection, a child concern report or equivalent might be recorded instead. If the alleged behaviour does not meet the threshold for recording a notification or a child concern report, the person reporting the matter might be provided with general advice and/or a referral.

Jurisdictions count notifications at different points in the response to a report, ranging from the point of initial contact with the source of the report to the end of a screening and decision making process. This means the number of notifications is not strictly comparable across jurisdictions. Notifications are subsequently investigated based on the policies and practices in each jurisdiction.

Notification and investigation data are collected early in the child protection process and often before an agency has full knowledge of a child's circumstances. This lack of information and the inherent difficulties in identifying Indigenous status mean that data on the number of notifications and investigations by Indigenous status should be interpreted with care.

Other relative

A grandparent, aunt, uncle or cousin, whether the relationship is half, full, step or through adoption, and can be traced through or to a person whose parents were not married to each other at the time of the child's birth. This category includes members of Aboriginal communities who are accepted by that community as being related to the child.

Out-of-home care	Overnight care, including placement with relatives (other than parents) where the government makes a financial payment. Includes care of children in legal and voluntary placements (that is, children on and not on a legal order) but excludes placements solely funded by disability services, psychiatric services, youth justice facilities and overnight child care services.
Relatives/kin	People who are family or close friends, or are members of a child or young person's community (in accordance with their culture) who are reimbursed (or who have been offered but declined reimbursement) by the State/Territory for the care of a child. For Aboriginal and Torres Strait Islander children, a kinship carer may be another Aboriginal and Torres Strait Islander person who is a member of their community, a compatible community or from the same language group.
Protective intervention services	Functions of government that receive and assess allegations of child abuse and neglect, and/or harm to children and young people, provide and refer clients to family support and other relevant services, and intervene to protect children.
Respite care	Respite care is a form of out-of-home care used to provide short-term accommodation for children where the intention is for the child to return to their prior place of residence. Respite placements include: <i>respite from birth family</i> , where a child is placed in out-of-home care on a temporary basis for reasons other than child protection (for example, the child's parents are ill or unable to care for them on a temporary basis; or as a family support mechanism to prevent entry into full time care, as part of the reunification process, as a shared care arrangement); <i>respite from placement</i> , where a child spends regular, short and agreed periods of time with another carer other than their primary carer.
Stability and permanency of placement	<p>Number of placements for children who exited out-of-home care and did not return within 60 days. Placements exclude respite or temporary placements lasting less than 7 days. Placements are counted separately where there is:</p> <ul style="list-style-type: none"> • a change in the placement type — for example, from a home-based to a facility-based placement • within placement type, a change in venue or a change from one home-based placement to a different home-based placement. <p>Each placement should only be counted once. A return to a previous placement is not included as a different placement. A return home is not counted as a placement, although if a child returns home for 60 days or more they are considered to have exited care.</p>
Strengths and Difficulties Questionnaires (SDQ)	The Strengths and Difficulties Questionnaire (SDQ) is a brief behavioural screening questionnaire about 3 to 16 year olds. There are several versions to meet the needs of researchers, clinicians and educationalists. All versions ask about 25 attributes divided between five scales 1) emotional symptoms (5 items); conduct problems (5 items); hyperactivity/inattention (5 items); peer relationship problems (5 items); prosocial behaviour (5 items).
Substantiation	<p>A substantiation is the outcome of an investigated notification which has resulted in the conclusion that there is reasonable cause to believe a child has been, is being or is likely to be abused, neglected or otherwise harmed. It does not necessarily require sufficient evidence for a successful prosecution and does not imply that treatment or case management is, or is to be, provided. However, if an investigation results in a substantiation, intervention by child protection services might be needed to protect the child. This intervention can take a number of forms, including one or more of: referral to other services; supervision and support; an application to court; and a placement in out of home care.</p> <p>The legal definitions of abuse and neglect are similar across jurisdictions. However, while the legal definitions for substantiating notifications are similar across jurisdictions, there remain some differences in practice, including different thresholds for recording a substantiation (that is, some jurisdictions substantiate harm or risk of harm to a child, and others substantiate actions by parents or incidents that cause harm). These differences impact on the comparability of these data.</p>

16A Child protection services — attachment

Information on the comparability and completeness of the data for the performance indicators and measures is in sections 16.2-3.

Definitions for the indicators and descriptors in this attachment are in section 16.4 of the chapter. Unsourced information was obtained from the Australian, State and Territory governments.

Data in this Report are examined by the Child Protection and Youth Justice Working Group, but have not been formally audited by the Secretariat.

Data reported in the attachment tables are the most accurate available at the time of data collection. Historical data may have been updated since the last edition of the Report on Government Services.

This file is available on the Review web page (www.pc.gov.au/rogs/2018).

- (a) For 2016-17, robust estimates of the non-Indigenous population aged 0–17 at 30 December 2016 are not available. Therefore, rates for 2016-17 are calculated on the estimated population aged 0–17 at 30 March 2017 as published in Table 16A.38.
- (b) Data on the number of notifications by Indigenous status should be interpreted with care. These data are collected very early in the child protection process and often before the agency has full knowledge of the child's family circumstances. As a result of this lack of full knowledge and the other inherent difficulties in identifying Indigenous status, these data are not considered reliable.
- (c) Prior to 2009-10, rates of children in notifications, investigations and substantiations were calculated as the number of children aged 0–16 years in each category (including children whose ages were not stated) divided by the estimated population of children aged 0–16 years at 31 December, multiplied by 1000. For Aboriginal and Torres Strait Islander children, the June projections for two years were averaged to obtain a population figure for December of the relevant year. For 2009-10 onwards, rates of children in notifications, investigations and substantiations are calculated as the number of children aged 0-17 years in each category (including children whose ages were not stated) divided by the estimated population of children aged 0-17 years at 31 December, multiplied by 1000.

Table 16A.1 Children in notifications, investigations and substantiations and on care and protection orders, per 1000 children in the target population, and by Indigenous status (a), (b), (c), (d), (e), (f), (g), (h), (i), (j), (k), (l)

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(d) Rates of non-Indigenous children on care and protection orders were calculated as the number of children aged 0–17 years (including children whose ages were not stated) who were on a care and protection order as at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000. Rates of Aboriginal and Torres Strait Islander children on care and protection orders were calculated as the number of children aged 0–17 years (including children whose ages were not stated) who were on a care and protection order as at 30 June, divided by the estimated population aged 0–17 at 30 June using 'Series B', Experimental estimates and projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2021 (Cat. No. 3238.0).									
(e) Prior to 2009-10, children of unknown Indigenous status were reported in the non-Indigenous status category. For 2009-10 onwards, a separate unknown Indigenous status category is reported.									
(f) Rates are not able to be calculated for children of unknown Indigenous status as corresponding population data are not available.									
(g) NSW: See table 16A.3 for detailed footnotes.									
(h) Queensland: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, figures may not match Queensland figures published elsewhere. From January 2015, amendments to the <i>Child Protection Act</i> 1999 commenced, with the consolidation of mandatory reporting requirements and new provisions enabling referral of families to support services (such as Family and Child Connect services).									
(i) WA: Concern for Child Wellbeing reports are classified as a notification. Implementation of the Children and Community Services Act 2004 in March 2006 required the legal status of children in care to be reviewed and Protection Orders were sought for a number of children already in care but not under care and protection orders. Children on care applications are included in the category 'interim and temporary orders'.									
(j) SA: Includes in 'notifications' only those reports which have met the criteria for a reasonable suspicion of child abuse or neglect.									
(k) Tasmania: Due to changes in the way notifications have been defined in Tasmania, the number of notifications reported for 2015-16 onwards is not comparable with data for earlier years. Tasmania has moved from a caller to an agency defined approach to counting notifications so that reporting is now more consistent with the majority of jurisdictions. Thus, information related to notifications reported nationally may be lower compared to that reported previously and it may differ from that published in state-based publications such as the Annual Report and Budget Papers. The proportions of notifications, finalised investigations and substantiations for children of unknown Indigenous status impact the reliability of these data. As such, any comparisons of the Indigenous status breakdown between years should be made with caution.									
(l) ACT: Includes in 'notifications' all intakes that meet the definition of a child concern report or a child protection report, as defined in the <i>Children and Young People Act 2008</i> .									

na Not available. – Nil or rounded to zero.

Source: State and Territory Governments (unpublished) for 2012-13 to 2016-17 data; AIHW (unpublished), derived from Child protection Australia data collection for data prior to 2012-13.

All children	10.0	6.7	8.8	6.4	6.8	8.3	8.6	10.6	8.3

- (a) For 2016-17, robust estimates of the non-Indigenous population aged 0–17 at 30 December 2016 are not available. Therefore, rates for 2016-17 are calculated on the estimated population aged 0–17 at 30 June 2017 as published in Table 16A.38.
- (b) Prior to 2009-10, children of unknown Indigenous status were reported in the non-Indigenous status category. For 2009-10 onwards, a separate unknown Indigenous status category is reported.
- (c) The scope for out-of-home care was expanded in 2007-08 to include children in care where a financial payment was offered but was declined by the carer.
- (d) Rates for non-Indigenous children were calculated as the number of children aged 0–17 years (including those whose age was not stated) in out-of-home care at 30 June, divided by the estimated population aged 0–17 at 31 March, multiplied by 1000. Rates for Indigenous children were calculated as the number of children aged 0-17 years (including those whose age was not stated) in out-of-home care at 30 June, divided by the estimated population aged 0-17 at 30 June using 'Series B', Experimental estimates and projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2021 (cat. no. 3238.0).
- (e) Rates were calculated as the number of children aged 0–17 years (including those whose age was not stated) in at least one out of home care placement during the year, divided by the estimated population aged 0–17 at 31 December, multiplied by 1000. For Indigenous children, the June projections for two years were averaged to obtain a population figure for December of the relevant year. Rates could not be calculated for children of unknown Indigenous status as corresponding population data were not available.
- (f) NSW: Payments are made to relative/kin carers as well as foster carers. Relative/kin carers may care for children who are not on an order. NSW data for 2014-15 onwards is not comparable to previous years' data. NSW Safe Home for Life (SHFL) legislative reforms effective 29 October 2014 transitioned eligible children/young people to the independent care of their guardian. These children/young people exited and are no longer counted in out-of-home care.
- (g) Victoria: The foster care category includes children on permanent care orders where carers are in receipt of foster care payment and children in individually tailored home-based arrangements.
- (h) Queensland: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere. From 2015-16, results for all children aged 0-17 in at least one out-of-home care placement were derived by the AIHW based on the unit record (child-level) files supplied by Queensland. In previous years, results were derived from aggregate data sourced by Queensland. As a result, comparing results for Queensland prior to 2015-16 is not valid.
- (i) Tasmania: Tasmania is not able to include children in care where a financial payment was offered but was declined by the carer meaning Tasmania's data are slightly lower than would be the case if the counting rule was strictly applied. Tasmanian data also exclude children not under care and protection orders placed with relatives for whom a financial contribution is made under the Supported Extended Family or Relatives Allowance programs.
- (j) ACT: Out-of-home care data includes some children 18 years and over whose carers receive a full carer payment. This is generally to facilitate completion of schooling without change to the placement.

Table 16A.2 **Children in out-of-home care: number and rate per 1000 children aged 0–17 years by Indigenous status (a), (b), (c), (d), (e), (f), (g), (h), (i), (j), (k)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
--	------------	------------	------------	-----------	-----------	------------	------------	-----------	-------------

(k) NT: Improvement in data quality in 2008-09 resulted in a more accurate count of children in out of home care. The number of children reported to be in out-of-home care in 2007-08 was likely to be undercounted.

na Not available. – Nil or rounded to zero.

Source: State and Territory Governments (unpublished) for 2012-13 to 2016-17 data; AIHW (unpublished), derived from Child protection Australia data collection for data prior to 2012-13.

- (a) Prior to 2009-10, children of unknown Indigenous status were reported in the non-Indigenous status category. For 2009-10 onwards, a separate unknown Indigenous status category is reported.
- (b) If a child is the subject of more than one notification, investigation or substantiation, each of these is counted.
- (c) Investigations relate to notifications received during the financial year. If the investigation was completed by 31 August it is classified as finalised. If the investigation was not completed by 31 August it is classified as not finalised.
- (d) The definition of an investigation includes interviewing or sighting the child where practicable.
- (e) 'Investigation closed – no outcome possible' includes cases where an outcome of substantiated or not substantiated could not be reached, but where the file may be closed for administrative reasons.
- (f) 'Dealt with by other means' includes notifications that were responded to by means other than an investigation, such as referral to family services or provision of advice.
- (g) NSW: Data for NSW relating to 'Notifications investigated', 'Notifications resolved without investigations' and 'Notifications dealt with by other means' from 2011-12 onwards are not comparable to previous years. The counting rules changed for 2011-12 data to better account for recent practice changes. NSW figures are not comparable with those of other jurisdictions. NSW has a differential investigation response whereby an investigation can be undertaken over two stages (stage 1 - information gathering; stage 2 - assessment). NSW data for 2014-15 onwards may not be fully comparable to previous years' data.
- (h) Victoria: If a case is open following the first notification, no further notifications concerning the child are recorded.
- (i) Queensland: In Queensland, all notifications require a full investigation to ensure the safety and well-being of children. Also, the category 'investigation closed – no outcome possible' is considered to be a finalised investigation in Queensland. This category includes investigations that were either unable to be commenced, or commenced but not able to be completed, despite all reasonable steps being undertaken by the department to identify and/or locate the child and family. 2006-07: Any new child protection concerns received by the department that relate to an open notification or investigation and assessment are recorded as an additional concern and linked to the open notification/investigation and assessment. Previously, any new child protection concerns received by the department were recorded as an additional notification. 2011-12: Additional staff focused on investigations and assessments were deployed across Queensland. This resulted in a decrease in the number of investigations not yet finalised, and an increase in the number of investigations finalised. 2014-15: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, figures may not match Queensland figures published elsewhere. In early 2015, Queensland commenced the introduction of a new strength-based framework for practice. This included a focus on greater engagement with complex families during the investigation and assessment process. 2015-16: From January 2015, amendments to the Child Protection Act 1999 commenced, with the consolidation of mandatory reporting requirements and new provisions enabling the referral of families to support services (such as Family and Child Connect services).
- (j) WA: The definition of emotional abuse in Western Australia has been broadened to include children witnessing family and domestic violence from 2015-16.

Table 16A.3 **Child protection notifications, investigations and substantiations by Indigenous status (a), (b), (c), (d), (e), (f), (g), (h), (i), (j), (k), (l), (m), (n)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>
(k)	SA: During 2009-10, SA implemented new service and reporting arrangements. Therefore, data for 2009-10 onwards are not fully comparable to previous years' data.								
(l)	Tasmania: Due to changes in the way notifications have been defined in Tasmania, the number of notifications reported for 2015-16 onwards is not comparable with data for earlier years. Tasmania has moved from a caller to an agency defined approach to counting notifications so that reporting is now more consistent with the majority of jurisdictions. Thus, information related to notifications reported nationally may be lower compared to that reported previously and it may differ from that published in state-based publications such as the Annual Report and Budget Papers. The proportions of notifications, finalised investigations and substantiations for children of unknown Indigenous status impact the reliability of these data. As such, any comparisons of the Indigenous status breakdown between years should be made with caution.								
(m)	ACT: Includes in 'notifications' all intakes that meet the definition of a child concern report or a child protection report, as defined in the <i>Children and Young People Act 2008</i> .								
(n)	NT: In 2015-16 the number of notifications involving children of unknown Indigenous status totals include one client for whom Indigenous status was not recorded (no client record). 2014-15: As a result of administrative changes, multiple open investigations concerning the same child are now consolidated into a single open investigation, with one resulting substantiation from each finalised investigation (either substantiated or not substantiated). Prior to 2014-15, each open investigation would result in a separate substantiation outcome. The decrease in the substantiation rate (table 16A.10) since 2014-15 can be partially attributed to this administrative change.								
	na Not available. .. Not applicable. – Nil or rounded to zero.								

Source: State and Territory Governments (unpublished) for 2012-13 to 2016-17 data; AIHW (unpublished), derived from *Child protection Australia* data collection for data prior to 2012-13.

- (a) Prior to 2009-10, the category 'non-Indigenous' included children whose Indigenous status was unknown or not stated. In 2009-10, a separate category 'children of unknown Indigenous' status was introduced.
- (b) NSW: Data do not include children on finalised supervisory orders. NSW is working to improve the way it counts admissions to care and protection orders and does not currently strictly adhere to the national counting rules.
- (c) Queensland: From 2014-15 Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. Data for this measure are not comparable to previous years and will not match Queensland figures published elsewhere.
- (d) WA admissions and discharges data for 2013-14 onwards are not comparable to previous years due to a change in methodology in 2013-14.

Table 16A.4 Number of children admitted to and discharged from care and protection orders by Indigenous status (a), (b), (c), (d), (e)

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>
--	------------	------------	------------	-----------	-----------	------------	------------	-----------

(e) Tasmania: Data may not be comparable year to year due to issues with the recording of order status. However improvements to business processes to ensure recording of care and protection orders is accurate and timely may lead to improved reporting for 2017-18 onwards.

– Nil or rounded to zero.

Table 16A.5 Children in out-of-home care by Indigenous status and whether on a care and protection order, at 30 June (number) (a), (b), (c), (d), (e), (f)

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>
(a) 'On a care and protection order' includes children on guardianship or custody orders or arrangements; and those on interim or temporary orders. 'On another type of order' includes offence orders or other orders that are not care and protection orders.								
(b) Prior to 2009-10, children of unknown Indigenous status were reported in the non-Indigenous status category. For 2009-10 onwards, a separate unknown Indigenous status category is reported.								
(c) NSW data for 2014-15 onwards is not comparable to previous years' data. NSW Safe Home for Life (SHFL) legislative reforms effective 29 October 2014 transitioned eligible children/young people to the independent care of their guardian. These children/young people exited and are no longer counted in out-of-home care.								
(d) Queensland: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.								
(e) Tasmania: Tasmania is not able to include children in care where a financial payment was offered but was declined by the carer meaning Tasmania's data are slightly lower than would be the case if the counting rule was strictly applied. Tasmanian data also exclude children not under care and protection orders placed with relatives for whom a financial contribution is made under the Supported Extended Family or Relatives Allowance programs.								
(f) ACT: Out-of-home care data includes some children 18 years and over whose carers receive a full carer payment. This is generally to facilitate completion of schooling without change to the placement.								
na Not available. .. Not applicable. – Nil or rounded to zero.								

Source: State and Territory Governments (unpublished) for 2012-13 to 2016-17 data; AIHW (unpublished), derived from Child Protection Australia data collection for data prior to 2012-13.

- (a) Time series financial data are adjusted to 2016-17 dollars using the General Government Final Consumption Expenditure (GGFCE) chain price deflator (2016-17 = 100). See chapter 2 for details.
- (b) Population data used to derive rates are revised to the ABS' final 2011 Census rebased estimates.
- (c) Refer to table 16A.7 for information on the comparability of expenditure data.
- (d) Numbers may not sum due to rounding.
- (e) Expenditure on family support services was introduced in the 2013 Report.
- (f) Expenditure per child relates to children aged 0-17 years in the residential population.
- (g) NSW: The movement in expenditure for intensive family support services between 2011-12 and 2012-13 is mainly due to the movement and reclassification of previously identified early intervention services (Brighter Futures) to statutory child protection activities (Strengthening Families) and overhead re-allocations due to the change in mix across all programs. In addition, NSW data for 2014-15 include payments to children and young people on Guardianship Orders. NSW data from 2015-16 onwards exclude payments for children and young people on Guardianship Orders.
- (h) Victoria: The reduction in out-of-home care salary expenses in 2010-11 is due to the conversion of internally delivered residential care services in the North West Metropolitan region to externally managed services. Child protection services, IFSS, FSS and OOHC data from 2012-13 onwards are not comparable to data for earlier years as the methodology used for attributing internal costs changed following a major restructure of the department in 2012-13. Data for 2013-14 have been restated to include Long Service Leave under 'salary expenses' rather than 'other non salary expenses'.

Table 16A.6 **State and Territory Government real recurrent expenditure on all child protection services (2016-17 dollars) (a), (b), (c), (d), (e), (f), (g), (h), (i), (j), (k), (l), (m), (n)**

<i>Unit</i>	<i>2007-08</i>	<i>2008-09</i>	<i>2009-10</i>	<i>2010-11</i>	<i>2011-12</i>	<i>2012-13</i>	<i>2013-14</i>	<i>2014-15</i>	<i>2015-16</i>	<i>2016-17</i>
(i) Queensland: An internal review of the cost allocation methodology was conducted by Queensland for 2016-17. The same methodology has been applied to the 2015-16 year to enable year on year comparisons. Data prior to 2015-16 are not comparable as it has not been revised. Compared to previous years, the methodology applied in 2016-17 and 2015-16 includes interagency costs where applicable, excludes costs for services that do not match the national definition of activity groups (e.g. universal prevention services), and recognises true cost and revenue (e.g., removing the effect of deferrals). The cost allocation basis for this methodology includes an increased representation of direct costs (e.g., grants and labour), with the allocation of indirect costs based on the distribution of total direct costs across the activity groups.										
(j) WA: Due to a new method of expenditure reporting, expenditure data for 2011-12 are not comparable to expenditure data for previous years. Child protection services, IFSS and FSS data for 2012-13 and 2013-14 are not comparable to data for earlier years as in 2013-14, some services previously considered to be IFSS were re-allocated to child protection services and FSS to be consistent with unit counting rules. 2012-13 data have been revised to be consistent with 2013-14.										
(k) SA: Expenditure data were recast from 2008-09 due to the inclusion of expenditure previously incorrectly omitted. The significant increase in out-of-home care expenditure in 2009-10 was the result of growth in the alternative care system. Family Support Services data were not available for 2011-12 and 2012-13 so the totals for SA and Australia are understated. The 2013-14 and 2014-15 expenditure data were re-cast as a result of an internal review being conducted for 2015-16 expenditure data, which resulted in the realignment of costs allocation in accordance with the counting rules. To ensure consistency when comparing prior years, the methodology has been applied to the 2013-14 and 2014-15 years. Data prior to 2013-14 were calculated using a different methodology and therefore data from 2013-14 onwards are not comparable to previous years.										
(l) Tasmania: In Tasmania in 2014-15 the calculation methodology for allocation of umbrella costs was altered and the total departmental overhead allocated to Children and Youth Services has reduced following significant internal restructuring of the Department. This has led to a decrease in the reported umbrella costs. In 2012-13, the allocation of Targeted Youth Support Services (TYSS) was included as being relevant to the IFSS program. However following recent discussions the inclusion of TYSS in future reporting is under review. Payroll tax was ceased in October 2012.										
(m) ACT: Data for the ACT from 2015-16 onwards are not comparable with previous years due to the integration of Child Protection and Youth Justice to a single case management system in July 2015 and the subsequent changes to expenditure reporting for 2015-16.										
(n) NT: In years prior to 2013-14, a grant program with Catholic Care NT was reported in the IFSS category. In 2013-14 the agreement was modified to be more general so expenditure was relocated to the FSS category. More recently there has been a new process that attributes costs directly to IFSS. The decrease in child protection expenditure and increases in OOHC and family support expenditure relate to a methodology change in how the agency measures its associated costs to each category. Predominantly, the changes relate to the separation of case work between child protection activities and OOHC case management. In the past case workers have been allocated to child protection. There was also an element of child protection expenditure which was reallocated to family support services through the methodology review.

- (a) Disproportionality ratios for Aboriginal and Torres Strait Islander children are calculated by dividing the proportion of children in the child protection system who are Aboriginal and Torres Strait Islander children by the proportion of children in the target population who are Aboriginal and Torres Strait Islander children. This is a different calculation to rates and rate ratios published elsewhere. Data for the calculation of disproportionality ratios were sourced from 16A.1, 16A.2; 16A.30 and 16A.38. See these tables for detailed footnotes.
- (b) Disproportionality ratios are comparable (subject to caveats) within jurisdictions over time, but are not comparable across jurisdictions.
- (c) Data on the number of notifications and investigations by Indigenous status should be interpreted with care. These data are collected very early in the child protection process and often before the agency has full knowledge of the child's family circumstances. As a result of this lack of full knowledge and the other inherent difficulties in identifying Indigenous status, these data are not considered reliable.
- (d) Identification of Indigenous status may lead to data quality issues for this indicator, in particular underidentification of Indigenous status is likely to result in disproportionality ratios understating Aboriginal and Torres Strait Islander children's representation in the child protection system. The disproportionality ratios should be considered in conjunction with data on the proportion of children for whom Indigenous status is not stated, which varies across states and territories (refer to tables 16A.1–2; 16A.31 and 16A.38).

Table 16A.8 **Disproportionality ratios for Aboriginal and Torres Strait Islander children (a), (b), (c), (d), (e), (f)**

	<i>Notifications</i>	<i>Receiving IFSS</i>	<i>Investigations</i>	<i>Substantiations</i>	<i>Care and Protection Orders</i>	<i>Out-of-home care</i>
(e) Queensland: Queensland provides a range of services and support that fall within the definition of intensive family support services (IFSS). Due to issues with data availability, the number of children reported in this measure reflects only one type of service, known in Queensland as Tertiary Family Support (formerly named Family Intervention Services). This number does not reflect the full scope of services and support as reflected in the expenditure for IFSS. Data for 2016–17 is not available due to improvements currently underway to widen data collection in alignment with the scope of expenditure in Table 16A.6. This has involved changes to data collection in Queensland's family support sector supported by the phased implementation of a new information system from 2015-16. Data are expected to be available for the 2019 Report.						
(f) Tasmania: Due to changes in the way notifications have been defined in Tasmania, the number of notifications reported for 2015-16 onwards is not comparable with data for earlier years. Tasmania has moved from a caller to an agency defined approach to counting notifications so that reporting is now more consistent with the majority of jurisdictions. The proportions of notifications, finalised investigations and substantiations for children of unknown Indigenous status impact the reliability of these data. As such, any comparisons of the disproportionality ratios between years should be made with caution.						
na Not available.

(a) Caution should be used when interpreting results as jurisdictions count notifications at different points in response to a report, and have different policies and protocols governing the type of response to a notification.

(b) NSW: Data were not available prior to 2011-12.

(c) Queensland: In Queensland, all notifications require a full investigation to ensure the safety and well-being of children. Queensland practice is that an investigation is not considered commenced until the child is sighted or, in the case of an unborn child, the pregnant woman is interviewed. Prior to sighting the child (or interviewing the pregnant woman), child safety officers begin actively working on the case through reviewing the child protection history of the child and family and determining who will be involved in the investigation process. This may include making contact with other agencies such as police, schools and hospitals. From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, figures may not match Queensland figures published elsewhere.

Table 16A.9 **Response time to commence investigation (a), (b), (c), (d)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
--	-------------	------------	------------	------------	-----------	-----------	------------	------------	-----------	-------------

(d) Tasmania: There are issues with the recording of the date commenced for the measure 'response times to commence investigations'. In the current system, the 'date investigation commenced' defaults to the date referred for investigation. Data quality for 2015-16 has been improved using the date the investigation was allocated to a worker, when the commencement date preceded the allocation date, which means data from 2015-16 are not comparable to data for earlier years.

na Not available.

Source: State and Territory Governments (unpublished) for 2012-13 to 2016-17 data; AIHW (unpublished), derived from Child protection Australia data collection for data prior to 2012-13.

- (a) Caution should be used when interpreting results as jurisdictions count notifications at different points in response to a report, and have different policies and protocols governing the type of response to a notification.
- (b) NSW: Data were not available prior to 2011-12.
- (c) Queensland: 2011-12: Additional staff focused on investigations and assessments were deployed across Queensland. This resulted in a decrease in the number of investigations not yet finalised, and an increase in the number of investigations finalised. 2014-15: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, figures may not match Queensland figures published elsewhere. 2015-16: From January 2015, amendments to the Child Protection Act 1999 commenced, with the consolidation of mandatory reporting requirements and new provisions enabling the referral of families to support services (such as Family and Child Connect services).
- (d) NT: Prior to 2013-14 data have included investigations closed as 'no possible outcome'. Data from 2013-14 are not comparable to prior years data. Data from 2013-14 onwards have been derived from AIHW Child Protection NMDS which does not include investigations which relate to a notification received prior to 1 July 2012.

na Not available.

(a) Data were introduced in the 2013 Report for the 2011-12 reporting period.

(b) NSW: NSW data for 2016-17 are not comparable to previous years' data. Changes in the NSW client information system have enabled a new counting method that better reflects the scope of the national counting rules, counting the number of children in substantiations of notifications (risk of significant harm reports). Data for this measure for the period 2012-13 to 2015-16, were not available. In 2011-12, NSW data were not comparable to data supplied by other jurisdictions because NSW data encompassed a more inclusive set of substantiated issues, for example, children who absconded from out-of-home care (OOHC) placements and reported incidents of self harm. In addition, NSW has a significantly lower threshold for investigating notifications relating to children in care compared with children in the general population.

(c) Victoria: Data were not available for Victoria, as the Victorian Child Protection Service does not record the required data for children who are in OOHC.

Table 16A.12 Children in out-of-home care who were the subject of a substantiation of sexual abuse, physical abuse, emotional abuse or neglect (a), (b), (c), (d), (e), (f), (g)

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>
(d) Queensland: Data are not comparable with other jurisdictions or across the time-series due to changes in policy and recording as follows; for 2013-14 onward Queensland data are reported in accordance with the department's new policy 'Responding to concerns about the standards of care' introduced in July 2013 and are not directly comparable with previous years. Queensland's data comprise children subject to a harm report substantiation, which refer to children in the custody or guardianship of the chief executive and who are placed in out-of-home care. Figures include both harm and unacceptable risk of future harm, and relate to the reference period during which the harm was recorded, which is not necessarily when the harm actually occurred. A carer or staff member of a care service may be held responsible for harm occurring if their actions or inactions resulted in a child being harmed (that is, failure to protect). From 2015-16, results for all children aged 0-17 years in at least one out-of-home care placement were derived by the AIHW based on the unit record (child-level) files supplied by Queensland. In previous years, results were derived from aggregate data sourced by Queensland. As a result, comparing results for Queensland prior to 2015-16 is not valid.									
(e) SA: The increase in numbers from 2013-14 to 2014-15 is due to a change in the reporting database which captures a broader range of children subject to a care concern. Updated data has been supplied for 2014-15 onwards following a review of counting rules and application of data captured in SA's data warehouse.									
(f) Tasmania: Tasmania is not able to include children in care where a financial payment was offered but was declined by the carer meaning Tasmania's data are slightly lower than would be the case if the counting rule was strictly applied. Tasmanian data also exclude children not under care and protection orders placed with relatives for whom a financial contribution is made under the Supported Extended Family or Relatives Allowance programs.									
(g) NT: Data are not comparable with other jurisdictions or across the time series due to changes in legislation, policy and recording in the 2014-15 financial year. The 2014-15 data does not reflect substantiated abuse but substantiated 'harm' or 'risk of harm' related to incidents that occurred prior to a child's entry into care as well as incidents when a child is in care. On 1 January 2014 the Care and Protection of Children Act was amended to give the Department of Children and Families the power to investigate allegations that a child in out-of-home care was harmed or at risk of harm. Prior to this date the Department had no power to investigate these concerns. Aligned to the new legislation the threshold for recording concerns was changed and the new policy definition of 'harm' now includes "any safety or wellbeing concern about a child in care" and does not have exclusions relating to the alleged causes, perpetrators, location where the harm occurred or form of care the child is in. A new process for recording concerns for the safety and wellbeing of children in care was instigated at the same time as the changes in legislation and policy, this has resulted in greater consistency and accuracy in data. This alongside increased expectation for external providers to make reports to the Department, the introduction of a Charter of Rights for Children in Care, and formalisation of Standards of Care within the out of home care sector has resulted in an increase in the number of concerns reported and responded to.									

na Not available.

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>
(a) NSW: NSW has improved reporting accuracy and completeness on this measure during the last period. Both these changes would be expected to drive an apparent increase in the proportion of children reported for this measure. NSW data for 2016-17 are not comparable to previous years' data. Changes in the NSW client information system have enabled a new counting method that better reflects the scope of the national counting rules, counting the number of children in substantiations of notifications (risk of significant harm reports). Data prior to 2016-17 for NSW were narrower than the scope of the national counting rule and not comparable to other jurisdictions' data. NSW data comprised victims of sustained allegations of reportable conduct and did not include substantiations of harm that did not meet the threshold for reportable conduct.									
(b) Victoria: Victoria's scope for counting substantiations is narrower than the scope of the national counting rules due to Victoria's regulatory and operational frameworks. Substantiated quality of care concerns encompass completed investigations where quality of care concerns are substantiated and action is taken in response. Data up to and including 2011-12 are not comparable to data for 2012-13 due to the implementation of a new quality of care database which improved data capture and reporting. Previously published data for 2012-13 have been revised and differ from those in the 2014 Report.									
(c) Queensland: Data are not available for whether the person believed responsible was living in the household. Queensland policy is that a carer or staff member of a care service may be held responsible for harm occurring if their actions or inactions resulted in a child being harmed (that is, failure to protect). Queensland figures are therefore broader than the scope of this measure.									
(d) WA: Data do not include substantiations relating to relatives of foster carers or other children in the household.									
(e) SA: Updated data have been supplied for 2014–15 onwards following a review of counting rules and application of data captured in SA's data warehouse.									
(f) Tasmania: Data for this measure are not available as the Tasmanian data system does not identify whether the person responsible was living in the household or visiting.									
(g) NT: Data for this measure are not available as the NT data system does not specifically identify the relationship between the person believed responsible and the OOHHC household.									
na Not available.

Children on a care and protection order and exiting care after less than 12 months, by number of different placements									
1–2 placements	596	374	609	77	58	79	31	na	1 824
3 or more placements	44	99	71	23	20	35	17	na	309
Total children	640	473	680	100	78	114	48	na	2 133
Proportion of children in 1–2 placements, per cent									
Proportion of children in 1–2 placements, per cent	93.1	79.1	89.6	77.0	74.4	69.3	64.6	na	85.5
Children on a care and protection order and exiting care after 12 months or more, by number of different placements									
1–2 placements	390	224	301	120	60	38	33	na	1 166
3 or more placements	353	246	358	125	81	71	31	na	1 265
Total children	743	470	659	245	141	109	64	na	2 431
Proportion of children in 1–2 placements, per cent									
Proportion of children in 1–2 placements, per cent	52.5	47.7	45.7	49.0	42.6	35	51.6	na	48.0

- (a) For number of different placements, only new placements in which the child had previously not been placed were counted as separate placements. Further, for the 2014-15 period onwards, the counting rules for this indicator were modified to clarify that all placements lasting less than seven days should be excluded from the count of number of placements.
- (b) This table includes all children exiting care who had been in care for 1 month or more and who had been on a care and protection order at some point in the six months prior to exiting care.
- (c) NSW data for 2014-15 onwards is not comparable to previous years' data. NSW Safe Home for Life (SHFL) legislative reforms effective 29 October 2014 transitioned eligible children/young people to the independent care of their guardian. These children/young people exited and are no longer counted in out-of-home care.
- (d) Queensland: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.
- (e) WA: Data for 2010-11 to 2013-14 were not available as these data could not be extracted from the client system.
- (f) Tasmania: Tasmania is not able to include children in care where a financial payment was offered but was declined by the carer meaning Tasmania's data are slightly lower than would be the case if the counting rule was strictly applied. Tasmanian data also exclude children not under care and protection orders placed with relatives for whom a financial contribution is made under the Supported Extended Family or Relatives Allowance programs. From 2011-12 to 2013-14 respite placements were excluded, so results for 'proportion of children in 1-2 placements' for these years should not be compared with prior years. For 2014-15 onwards, respite placements are not explicitly excluded. However all placements lasting less than 7 days are excluded, as stated in footnote (a).
- (g) ACT: Out-of-home care data includes some children 18 years and over whose carers receive a full carer payment. This is generally to facilitate completion of schooling without change to the placement.

na Not available. – Nil or rounded to zero.

Source: State and Territory Governments (unpublished) for 2012-13 to 2016-17 data; AIHW (unpublished), derived from Child protection Australia data collection for data prior to 2012-13.

Total all children	13 566	5 056	6 670	2 546	1 841	664	425	398

- (a) This indicates the length of time a child has been in out-of-home placement on a continuous basis at 30 June. Any break of 60 days or more is considered to break the continuity of the placement, however holidays or authorised absences of less than 60 days in a placement do not break the continuity of placement. If a child returns home for less than 60 days and then returns to to the former placement or to a different placement, this does not affect the length of time in care.
- (b) Prior to 2009-10, children of unknown Indigenous status were reported in the non-Indigenous status category. For 2009-10 onwards, a separate unknown Indigenous status category is reported.
- (c) NSW data for 2014-15 onwards is not comparable to previous years' data. NSW Safe Home for Life (SHFL) legislative reforms effective 29 October 2014 transitioned eligible children/young people to the independent care of their guardian. These children/young people exited and are no longer counted in out-of-home care.
- (e) Queensland: Prior to 2008, Queensland was not able to report on the length of time in continuous out-of-home care placement, instead reporting on the length of time in the current out-of-home care placement. From 2008 data refer to the length of time in continuous out-of-home care and is therefore not comparable with previous years. From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.
- (f) Tasmania: Tasmania is not able to include children in care where a financial payment was offered but was declined by the carer meaning Tasmania's data are slightly lower than would be the case if the counting rule was strictly applied. Tasmanian data also exclude children not under care and protection orders placed with relatives for whom a financial contribution is made under the Supported Extended Family or Relatives Allowance programs. Tasmania was unable to distinguish between respite and non-respite care prior to 2010-11. Both types of placement are included if they satisfy the general definition of out-of-home care.
- (g) ACT: Out-of-home care data includes some children 18 years and over whose carers receive a full carer payment. This is generally to facilitate completion of schooling without change to the placement.
- (h) NT: A change in the counting algorithm for 2008-09 resulted in a more accurate distribution in the length of time in OOHC compared with 2007-08. In addition, improvement in data quality in 2008-09 resulted in a more accurate count of children in OOHC. The number of children in OOHC reported in 2007-08 was likely to be undercounted. Data from 2013-14 onwards have been derived from the AIHW Child Protection National Minimum Data Set (CP NMDS) and are not comparable with prior years data.

na Not available. – Nil or rounded to zero.

Source: State and Territory Governments (unpublished) for 2012-13 to 2016-17 data; AIHW (unpublished), derived from Child protection Australia data collection for data prior to 2012-13.

- (a) Prior to 2009-10, children of unknown Indigenous status were reported in the non-Indigenous status category. For 2009-10 onwards, a separate unknown Indigenous status category is reported.
- (b) Exits from out-of-home care are defined as occasions when children leave care and do not return within 60 days. Placement breaks which do not exceed 7 days are not counted as exits.
- (c) NSW: NSW data for 2014-15 onwards is not comparable to previous years' data. NSW Safe Home for Life (SHFL) legislative reforms effective 29 October 2014 transitioned eligible children/young people to the independent care of their guardian. These children/young people exited and are no longer counted in out-of-home care.
- (d) Queensland: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.
- (e) Tasmania: Tasmania is not able to include children in care where a financial payment was offered but was declined by the carer meaning Tasmania's data are slightly lower than would be the case if the counting rule was strictly applied. Tasmanian data also exclude children not under care and protection orders placed with relatives for whom a financial contribution is made under the Supported Extended Family or Relatives Allowance programs.
- (f) ACT: Out-of-home care data includes some children 18 years and over whose carers receive a full carer payment. This is generally to facilitate completion of schooling without change to the placement.

na Not available. – Nil or rounded to zero.

Source: State and Territory Governments (unpublished) for 2012-13 to 2016-17 data; AIHW (unpublished), derived from Child protection Australia data collection for data prior to 2012-13.

- (a) The denominator for this indicator includes all placement types, including where the placement type is unknown.
- (b) Prior to 2009-10, children of unknown Indigenous status were reported in the non-Indigenous status category. For 2009-10 onwards, a separate unknown Indigenous status category is reported.
- (c) NSW: NSW data for 2014-15 onwards is not comparable to previous years' data. NSW Safe Home for Life (SHFL) legislative reforms effective 29 October 2014 transitioned eligible children/young people to the independent care of their guardian. These children/young people exited and are no longer counted in out-of-home care.

Table 16A.17 Children in out-of-home care and in a home-based placement, by Indigenous status, by age, at 30 June (a), (b), (c), (d), (e), (f)

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(d)	Queensland: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.									
(e)	Tasmania: Tasmania is not able to include children in care where a financial payment was offered but was declined by the carer meaning Tasmania's data are slightly lower than would be the case if the counting rule was strictly applied. Tasmanian data also exclude children not under care and protection orders placed with relatives for whom a financial contribution is made under the Supported Extended Family or Relatives Allowance programs.									
(f)	ACT: Out-of-home care data includes some children 18 years and over whose carers receive a full carer payment. This is generally to facilitate completion of schooling without change to the placement.									
	na Not available. – Nil or rounded to zero.									

Source: State and Territory Governments (unpublished) for 2012-13 to 2016-17 data; AIHW (unpublished), derived from Child protection Australia data collection for data prior to 2012-13.

- (a) Family group homes are included as part of residential care. However, in this table they have been disaggregated.
- (b) The scope for out-of-home care was expanded in 2007-08 to include children in care where a financial payment was offered but was declined by the carer.
- (c) Prior to 2009-10, children of unknown Indigenous status were reported in the non-Indigenous status category. For 2009-10 onwards, a separate unknown Indigenous status category is reported.
- (d) NSW: NSW data for 2014-15 onwards is not comparable to previous years' data. NSW Safe Home for Life (SHFL) legislative reforms effective 29 October 2014 transitioned eligible children/young people to the independent care of their guardian. These children/young people exited and are no longer counted in out-of-home care.
- (e) Queensland: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.
- (f) WA: A small number of children were placed with externally managed foster carers who are also their relatives and were recorded in the foster care category in 2007. From 2014-15, independent living and other supported placements are not reported as they were reclassified as unfunded placements. From 2015-16, children placed in boarding schools have been included.
- (g) SA: From 2016–17, 'Other home-based care' includes children on third-party parental responsibility orders; 'Other' includes children temporarily accommodated in commercial properties such as private rental houses or units (prior to 2016–17, these were included in residential care).

Table 16A.18 **Children in out-of-home care by Indigenous status and placement type, at 30 June (number) (a), (b), (c), (d), (e), (f), (g), (h), (i)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(h) Tasmania: Tasmania is not able to include children in care where a financial payment was offered but was declined by the carer meaning Tasmania's data are slightly lower than would be the case if the counting rule was strictly applied. Tasmanian data also exclude children not under care and protection orders placed with relatives for whom a financial contribution is made under the Supported Extended Family or Relatives Allowance programs. Children under third-party guardianship orders have been included under 'Other home based care' living arrangements since 2010-11. Changes were made to the classification of some placement types in 2016-17 which has led to a decrease in the number of children in other home-based care and an increase in children in foster care and kinship care.									
(i) ACT: Out-of-home care data includes some children 18 years and over whose carers receive a full carer payment. This is generally to facilitate completion of schooling without change to the placement. Children on third-party parental responsibility orders have been classified as other home-based care, of these 50 children in 2016, and 53 children in 2017 were placed with relative/kin. Prior to 2015-16 'Other home-based care' included only children on third party orders where the carer was originally a foster carer and all placements with kin were counted in the Relative/kinship count.									
(j) NT: Data from 2013-14 onwards have been derived from the AIHW Child Protection National Minimum Data Set (CPNMDS) and are not comparable with data for 2012-13 and earlier years. Prior year data include unfunded kinship care places in the count of relative/kinship care. In the NT's client information system, the majority of children in a relative/kinship placement are captured in the foster care placement type. In 2016-17 approximately 50 percent of children in the 'foster care' category are placed in a relative/kinship household.									

na Not available. .. Not applicable. – Nil or rounded to zero.

Source: State and Territory Governments (unpublished) for 2012-13 to 2016-17 data; AIHW (unpublished), derived from Child protection Australia data collection for data prior to 2012-13.

- (a) For 2016–17, the denominator was expanded to include children in third-party parental care arrangements, where the child was formerly placed with the same carer in a relative/kinship placement. Children under third-party parental care arrangements are a subset counted under 'Other' home based care within Table 16A.18. For this reason, the 'Relative/kin care' population from 16A.18 (VIC, SA, Tas, and ACT specifically) will not match the denominator from Table 16A.19 as it includes third-party parental care arrangements.
- (b) Prior to 2009-10, children of unknown Indigenous status were reported in the non-Indigenous status category. For 2009-10 onwards, a separate unknown Indigenous status category is reported.
- (c) The scope for OOHC was expanded in 2007-08 to include children in care where a financial payment was offered but was declined by the carer.
- (d) NSW: Payments may be made to relative/kin carers where children are not on an order. NSW data for 2014-15 onwards is not comparable to previous years' data. NSW Safe Home for Life (SHFL) legislative reforms effective 29 October 2014 transitioned eligible children/young people to the independent care of their guardian. These children/young people exited and are no longer counted in out-of-home care.
- (e) Queensland: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.
- (f) Tasmania: Tasmania is not able to include children in care where a financial payment was offered but was declined by the carer meaning Tasmania's data are slightly lower than would be the case if the counting rule was strictly applied. Tasmanian data also exclude children not under care and protection orders placed with relatives for whom a financial contribution is made under the Supported Extended Family or Relatives Allowance programs. Prior to 30 June 2017, children under third-party guardianship orders placed with relatives/kin were not counted as being placed with relatives/kin. As such data for 2017 are not comparable to data for earlier years.

Table 16A.19 **Children in out-of-home care placed with relatives/kin by Indigenous status, 30 June (a), (b), (c), (d), (e), (f), (g), (h)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
--	-------------	------------	------------	------------	-----------	-----------	------------	------------	-----------	-------------

(g) ACT: Data in this table includes the 53 children on third party responsibility orders placed with relatives/kin in 2016-17 and 50 children in 2015-16 as noted in table 16A.18. Out-of-home care data includes some children 18 years and over whose carers receive a full carer payment. This is generally to facilitate completion of schooling without change to the placement.

(h) NT: due to a stringent assessment process in the NT, kinship carers are registered as foster carers. Due to system limitations, data reported for the NT for this measure do not provide a realistic view of children placed with relatives/kin (refer to table 16A.23). Improvement in data quality in 2008-09 resulted in a more accurate count of children in out-of-home care. The number of children in out-of-home care reported in 2007-08 was likely to be undercounted. Due to realignment of placement types to ensure better data integrity, data for the financial year 2012-13 may not be comparable with data provided for previous financial years.

na Not available. - Nil or rounded to zero.

Source State and Territory Governments (unpublished) for 2012-13 to 2016-17 data; AIHW (unpublished), derived from Child protection Australia data collection for data prior to 2012-13.

- (a) From 2015, reference to the 'Aboriginal child placement principle' has been amended to the 'Aboriginal and Torres Strait Islander child placement principle' in accordance with the National Framework for Protecting Australia's Children third three-year action plan, 2015–18.
- (b) The denominator for calculating the proportion of children excludes Indigenous children living independently and those whose living arrangements were unknown.
- (c) The scope for out-of-home care was expanded in 2007-08 to include children in care where a financial payment was offered but was declined by the carer.
- (d) Residential care includes family group homes.
- (e) NSW: NSW data for 2014-15 onwards is not comparable to previous years' data. NSW Safe Home for Life (SHFL) legislative reforms effective 29 October 2014 transitioned eligible children/young people to the independent care of their guardian. These children/young people exited and are no longer counted in out-of-home care.
- (f) Queensland: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.
- (g) SA: During 2012-13, SA changed databases, which resulted in a data recording issue leading to an undercount of children placed in compliance with the Aboriginal Child Placement Principle. Due to these data issues, 2012-13 child protection data for this indicator for this indicator are likely to be incorrect and cannot be reliably compared with data for previous years.
- (h) Tasmania: Tasmania is not able to include children in care where a financial payment was offered but was declined by the carer meaning Tasmania's data are slightly lower than would be the case if the counting rule was strictly applied. Tasmanian data also exclude children not under care and protection orders placed with relatives for whom a financial contribution is made under the Supported Extended Family or Relatives Allowance programs. The proportion of caregivers of unknown Indigenous status impacts the reliability of these data.
- (i) ACT: Out-of-home care data includes some children 18 years and over whose carers receive a full carer payment. This is generally to facilitate completion of schooling without change to the placement.

Table 16A.20 **Aboriginal and Torres Strait Islander children in out-of-home care by relationship of caregiver, 30 June (a), (b), (c), (d), (e), (f), (g), (h), (i), (j)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
--	-------------	------------	------------	------------	-----------	-----------	------------	------------	-----------	-------------

(j) NT: Children placed with family members have been included in the 'Aboriginal and Torres Strait Islander relative/kin' category. Improvement in data quality in 2008-09 resulted in a more accurate count of children in OOHC. The number of children in OOHC reported in 2007-08 was likely to be under counted. Due to realignment of placement types to ensure better data integrity, data for 2012-13 may not be comparable with data for previous years. In 2013-14 and 2014-15 data for this indicator were provided by the NT in aggregate form. As such there are small differences in totals for this indicator when compared with other OOHC tables. From 2014-15 onwards, data for this indicator are sourced from the National Minimum Dataset.

– Nil or rounded to zero.

- (a) Data are not comparable across jurisdictions as policies and legislation varies regarding timeframes within which children are required to have case plans prepared.
- (b) NSW: NSW procedures state that a case plan is to be developed for a CYP within 30 days of the CYP entering care, therefore CYP who have been in care for less than 30 days are excluded from the base count.
- (c) Qld: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.
- (d) SA: South Australia has not reported a result for children with a case plan due to systems changes in the case management and data reporting system to support the casework practice model, Solution Based Casework.
- (e) Tasmania: 'Children with a documented case plan' does not include those with a populated case plan if the plan has not been approved or if the review date was overdue.

AG8: Proportion of total expenditure	%	50.0	50.4	51.3	51.8	55.7	55.0
---	----------	-------------	-------------	-------------	-------------	-------------	-------------

- (a) Time series financial data are adjusted to 2016-17 dollars using the General Government Final Consumption Expenditure (GGFCE) chain price deflator (2016-17 = 100). See Chapter 2 for details.
- (b) An internal review of the cost allocation methodology was conducted by Queensland for 2016-17. The same methodology has been applied to the 2015-16 year to enable year on year comparisons. Data prior to 2015-16 are not comparable as it has not been revised. Compared to previous years, the methodology applied in 2016–17 and 2015–16 includes interagency costs where applicable, excludes costs for services that do not match the national definition of activity groups (e.g. universal prevention services), and recognises true cost and revenue (e.g., removing the effect of deferrals). The cost allocation basis for this methodology includes an increased representation of direct costs (e.g., grants and labour), with the allocation of indirect costs based on the distribution of total direct costs across the activity groups.
- (c) Queensland provides a range of services and support that fall within the definition of intensive family support services (IFSS). Due to issues with data availability, the number of children used in the unit cost for AG3 reflects only one type of service, known in Queensland as Tertiary Family Support (formerly named Family Intervention Services). This number does not reflect the full scope of services and support as reflected in the expenditure for IFSS, as reported in Table 16A.6. Data for 2016–17 is not available due to improvements currently underway to widen data collection in alignment with the scope of expenditure in Table 16A.6. This has involved changes to data collection in Queensland’s family support sector supported by the phased implementation of a new information system from 2015-16. Data are expected to be available for the 2019 Report.
- (d) From 2014-15 Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As a result, the underlying activity data for A1 (notifications) and AG4–8 from 2014–15 onwards are not comparable to previous years.

Table 16A.27 **Activity group unit costs (2016-17 dollars) - Tasmania (a), (b)**

AG8: Proportion of total expenditure	%	53.7	55.5	58.1	58.8	64.2	65.9
---	----------	-------------	-------------	-------------	-------------	-------------	-------------

(a) Time series financial data are adjusted to 2016-17 dollars using the General Government Final Consumption Expenditure (GGFCE) chain price deflator (2016-17 = 100). See Chapter 2 for details.

(b) Due to changes in the way notifications have been defined in Tasmania, the number of notifications reported for 2015-16 onwards is not comparable with data for earlier years. Tasmania has moved from a caller to an agency defined approach to counting notifications so that reporting is now more consistent with the majority of jurisdictions.

- (a) Time series financial data are adjusted to 2016-17 dollars using the General Government Final Consumption Expenditure (GGFCE) chain price deflator (2016-17 = 100). See Chapter 2 for details.
- (b) The service must average at least 4 hours of service provision per week for a specified short-term period (usually less than six months).
- (c) The Australian figure for total real expenditure represents the sum of figures for those jurisdictions able to provide data. The Australian figure for real expenditure per child represents the sum of expenditure for those jurisdictions able to provide data divided by the number of children aged 0–17 years commencing intensive family support services. In previous reports, data were divided by the sum of the residential population for the target group.
- (d) NSW: The movement in expenditure for intensive family support services between 2011-12 and 2012-13 is mainly due to the movement and reclassification of previously identified early intervention services (Brighter Futures) to statutory child protection activities (Strengthening Families) and overhead re-allocations due to the change in mix across all the programs.

Table 16A.30 **Intensive family support services: total real recurrent expenditure, number of children aged 0-17 years commencing and receiving intensive family support services and real recurrent expenditure per child (2016-17 dollars) (a), (b), (c), (d), (e), (f), (g), (h), (i)**

Unit	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
(e) Queensland: Queensland provides a range of services and supports that fall within the definition of intensive family support services (IFSS). Due to issues with data availability, the number of children previously reported for this measure reflected only one type of service, known in Queensland as Tertiary Family Support (formerly named Family Intervention Services). This number does not reflect the full scope of services and supports as reflected in the expenditure for IFSS. Data for 2016–17 is not available due to improvements currently underway to widen data collection in alignment with the scope of expenditure in Table 16A.6. This has involved changes to data collection in Queensland’s family support sector supported by the phased implementation of a new information system from 2015-16. Data are expected to be available for the 2019 Report. An internal review of the cost allocation methodology was conducted by Queensland for 2016-17. The same methodology has been applied to the 2015-16 year to enable year on year comparisons. Data prior to 2015-16 are not comparable as it has not been revised. Compared to previous years, the methodology applied in 2016–17 and 2015–16 includes interagency costs where applicable, excludes costs for services that do not match the national definition of activity groups (e.g. universal prevention services), and recognises true cost and revenue (e.g., removing the effect of deferrals). The cost allocation basis for this methodology includes an increased representation of direct costs (e.g., grants and labour), with the allocation of indirect costs based on the distribution of total direct costs across the activity groups.									
(f) WA: Due to a new method of expenditure reporting, expenditure data for 2011-12 are not comparable to expenditure data for previous years. IFSS data for 2012-13 and 2013-14 are not comparable to data for earlier years as in 2013-14, some services previously considered to be IFSS were re-allocated to child protection services and FSS to be consistent with unit counting rules. 2012-13 data have been revised to be consistent with 2013-14. For 2016-17, the number of children includes 10 young people aged 18 or over.									
(g) Tasmania: Intensive family support services activity data were not available for Tasmania for the period 2009-10 to 2011-12. Tasmanian data are compiled from aggregate data provided by Community Sector Organisations (CSOs). It should be noted that as information is not provided by all CSOs and the data provided are not validated, the results should be interpreted with caution.									
(h) ACT: IFSS data were not available for 2009-10 due to a change in data systems during the counting period. The data system was undergoing subsequent refinements so 2010-11 data should be treated with caution.									
(i) NT: Financial data for children commencing IFSS were not separately available for 2013-14 and have been included in data for children commencing family support services. IFSS expenditure for 2015-16 were for scoping works conducted during 2015-16 for an IFSS program to commence in 2016-17.

(a) The service must average at least 4 hours of service provision per week for a specified short-term period (usually less than six months).

(b) NSW: Data for 2011-12 and 2013-14 include children and young people supported through the Strengthening Families program, which is within the statutory child protection spectrum. In 2013-14, limited data were available for some services.

Table 16A.31 **Intensive family support services: number of children aged 0–17 years commencing intensive family support services by Indigenous status and sex (a), (b), (c), (d), (e), (f)**

	<i>Unit</i>	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>
(c)	Qld: Queensland provides a range of services and support that fall within the definition of intensive family support services (IFSS). Due to issues with data availability, the number of children reported in this measure reflects only one type of service, known in Queensland as Tertiary Family Support (formerly named Family Intervention Services). This number does not reflect the full scope of services and support as reflected in the expenditure for IFSS, as reported in Table 16A.6. Data for 2016–17 is not available due to improvements currently underway to widen data collection in alignment with the scope of expenditure in Table 16A.6. This has involved changes to data collection in Queensland's family support sector supported by the phased implementation of a new information system from 2015-16. Data are expected to be available for the 2019 Report.								
(d)	Tasmania: Intensive family support services activity data were not available for Tasmania for the period 2009-10 to 2011-12. Tasmanian data are compiled from aggregate data provided by Community Sector Organisations (CSOs). It should be noted that information is not provided by all CSOs and the data provided are not validated. Tasmanian data should therefore be interpreted with extreme caution.								
(e)	ACT: IFSS data were not available for 2009-10 due to a change in data systems during the counting period. The data system was undergoing subsequent refinements so 2010-11 data should be treated with caution.								
(f)	NT: The sex of children commencing IFSS was not available. In 2014-15 and 2015-16 the NT did not fund services that met the definition of Prevention or Reunification services. In 2016-17, the NT commenced funding services under the IFSS schema.

- (a) Time series financial data are adjusted to 2016-17 dollars using the General Government Final Consumption Expenditure (GGFCE) chain price deflator (2016-17 = 100). See Chapter 2 for details.
- (b) Where jurisdictions could only provide total expenditure on out-of-home and not the total number of placement nights in out-of-home care, their total expenditure data are excluded from the national average.
- (c) NSW: Data for 2014-15 'real recurrent expenditure on OOHC services' for 2014-15 includes payments to children and young people on Guardianship Orders. Data for 2014-15 'placement nights in out-of-home care' excludes data relating to children and young people on Guardianship Orders. NSW data for 2014-15 onwards for 'placement nights in out-of-home care' and 'real expenditure per placement night' are not comparable to data for previous years' data. NSW Safe Home for Life (SHFL) legislative reforms effective 29 October 2014 transitioned eligible children/young people to the independent care of their guardian. These children and young people exited and are no longer counted in out-of-home-care.
- (d) Queensland: From 2014-15 Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. Data for this measure are not comparable to previous years and will not match Queensland figures published elsewhere. An internal review of the cost allocation methodology was conducted by Queensland for 2016-17. The same methodology has been applied to the 2015-16 year to enable year on year comparisons. Data prior to 2015-16 are not comparable as it has not been revised. Compared to previous years, the methodology applied in 2016-17 and 2015-16 includes interagency costs where applicable, excludes costs for services that do not match the national definition of activity groups (e.g. universal prevention services), and recognises true cost and revenue (e.g., removing the effect of deferrals). The cost allocation basis for this methodology includes an increased representation of direct costs (e.g., grants and labour), with the allocation of indirect costs based on the distribution of total direct costs across the activity groups.

--	-------------	------------	------------	------------	-----------	-----------	------------	------------	-----------	-------------

- (e) WA: See notes to tables 16A.1-2, whereby OOHC data have been revised since the 2014 Report.
- (f) Tasmania: Tasmania is not able to include children in care where a financial payment was offered but was declined by the carer meaning Tasmania's data are slightly lower than would be the case if the counting rule was strictly applied. Tasmanian data also exclude children not under care and protection orders placed with relatives for whom a financial contribution is made under the Supported Extended Family or Relatives Allowance programs.
- (g) ACT: Out-of-home care data includes some children 18 years and over whose carers receive a full carer payment. This is generally to facilitate completion of schooling without change to the placement.
- (h) NT: See notes to table 16A.1, whereby OOHC data have been revised since the 2014 Report.

- (a) Time series financial data are adjusted to 2016-17 dollars using the General Government Final Consumption Expenditure (GGFCE) chain price deflator (2016-17 = 100). See chapter 2 for details.
- (b) Refer to table 16A.7 for information on the comparability of expenditure data.
- (c) Numbers may not sum due to rounding.
- (d) Non-residential out-of-home care services includes family group homes, except for Victoria.
- (e) These data need to be interpreted with care because they do not represent and cannot be interpreted as unit cost measures. Expenditure per child in care at 30 June overstates the cost per child because significantly more children are in care during a year than at a point in time. In addition, these data do not reflect the length of time that a child spends in care.
- (f) Data relating to annual real expenditure per child in out-of-home care should be interpreted with caution due to the effect of different proportions of children in residential out-of-home care across jurisdictions.
- (g) NSW: NSW data for 2014-15 includes payments to children and young people on Guardianship Orders. NSW data from 2015-16 onwards excludes payments for children and young people on Guardianship Orders.
- (h) Victoria: OOH data for 2012-13 and 2013-14 are not comparable to data for earlier years as following a major restructure of the department in 2012-13, the methodology used for attributing internal costs changed.
- (i) Queensland: From 2014-15 Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. Data for this measure are not comparable to previous years and will not match Queensland figures published elsewhere. An internal review of the cost allocation methodology was conducted by Queensland for 2016-17. The same methodology has been applied to the 2015-16 year to enable year on year comparisons. Data prior to 2015-16 are not comparable as it has not been revised. Compared to previous years, the methodology applied in 2016-17 and 2015-16 includes interagency costs where applicable, excludes costs for services that do not match the national definition of activity groups (e.g. universal prevention services), and recognises true cost and revenue (e.g., removing the effect of deferrals). The cost allocation basis for this methodology includes an increased representation of direct costs (e.g., grants and labour), with the allocation of indirect costs based on the distribution of total direct costs across the activity groups.

Table 16A.33 **State and Territory Government real recurrent expenditure on out-of-home care services (2016-17 dollars) (a), (b), (c), (d), (e), (f), (g), (h), (i), (j), (k)**

	<i>Unit</i>	<i>2007-08</i>	<i>2008-09</i>	<i>2009-10</i>	<i>2010-11</i>	<i>2011-12</i>	<i>2012-13</i>	<i>2013-14</i>	<i>2014-15</i>	<i>2015-16</i>	<i>2016-17</i>
(j)	Tasmania: Tasmania is not able to include children in care where a financial payment was offered but was declined by the carer meaning Tasmania's data are slightly lower than would be the case if the counting rule was strictly applied. Tasmanian data also exclude children not under care and protection orders placed with relatives for whom a financial contribution is made under the Supported Extended Family or Relatives Allowance programs. The allocation of expenditure between residential and non-residential out-of-home care services for 2015-16 has been revised since publication of the Report on Government Services 2017. However, the total out-of-home care expenditure for 2015-16 remains the same.										
(k)	ACT: Data for the ACT from 2015-16 onwards are not comparable with previous years due to the integration of Child Protection and Youth Justice to a single case management system in July 2015 and the subsequent changes to expenditure reporting for 2015-16. Out-of-home care data includes some children 18 years and over whose carers receive a full carer payment. This is generally to facilitate completion of schooling without change to the placement.										
	na Not available.

- (a) Jurisdictions provide the denominator for this indicator (denominator is all children who were the subject of an investigation and a decision not to substantiate). From 2014-15 the AIHW derives the denominator from the CP NMDS for all jurisdictions except NSW. Previously, the denominator was derived by the AIHW for two jurisdictions in 2012-13 and all jurisdictions except NSW and Qld in 2013-14. Data in this Report may therefore differ from previous Reports.
- (b) Proportions are calculated on the basis of all children who were the subject of an investigation and a decision not to substantiate in a given year.
- (c) NSW: NSW figures are not comparable with those of other jurisdictions. NSW has a differential investigation response whereby an investigation can be undertaken over two stages (stage 1 - information gathering; stage 2 - assessment).
- (d) Queensland: From 2014-15, Queensland supplied unit record (child-level) files extracted from the Integrated Client Management System according to nationally determined definitions and technical specifications. As such, data may not match Queensland figures published elsewhere.

(a) Jurisdictions provide the denominator for this indicator (denominator is all children who were the subject of an investigation). From 2014-15 the AIHW derives the denominator from the CP NMDS for all jurisdictions except NSW. Previously, the denominator was derived by the AIHW for two jurisdictions in 2012-13 and all jurisdictions except NSW and Qld in 2013-14. Data in this Report may therefore differ from previous Reports.

(b) As a proportion of all children who were the subject of a substantiation.

(c) NSW: NSW data are not comparable with those of other jurisdictions. NSW has a differential investigation response whereby an investigation can be undertaken over two stages (stage 1 - information gathering; stage 2 - assessment).

- (a) Australian national minimum standards for reading and numeracy have been developed as part of the National Assessment Program—Literacy and Numeracy (NAPLAN).
- (b) The availability of NAPLAN data for government and non-government school students varied across jurisdictions. Qld includes government and non-government schools. For 2013 data: NSW, Vic and ACT includes government, Catholic and Independent schools; WA and Tas includes government schools only; NT includes government and Christian schools. This should be considered when interpreting the results, along with other contextual factors.
- (c) For the national minimum standards (NMS) achievement rates, the denominator includes assessed students (those present or exempt from testing), and the numerator includes assessed students who achieved at or above the NMS (exempt students are deemed to be below the NMS).
- (d) Data include children in care at the time of NAPLAN testing. Children 'in care' are defined those aged 0–17 years whose care arrangements have been ordered through the Children's Court, where parental responsibility for the child or young person has been transferred to the Minister/Chief Executive. Please note that the titles of the relevant 'Children's Courts' may vary across states/territories.
- (e) Queensland: Results for Queensland are for those children subject to a child protection order granting custody or guardianship to the Chief Executive for a minimum of two years at the time of the test.
- (f) Significant care should be taken when interpreting the results for the Tasmania, ACT and the NT as the number of children on guardianship/custody orders in these jurisdictions are small.

na Not available.

- (a) Prior to 2012-13, Aboriginal and Torres Strait Islander and non-Indigenous population data were supplied by AIHW derived from ABS data sources. For 2012-13 onwards, population data were sourced directly from the ABS.
- (b) Population data used to derive rates are revised to the ABS' final 2011 Census rebased estimates and projections. Population data for All Australians for all years are estimates. Population data for Aboriginal and Torres Strait Islander Australians up to and including 2011 are estimates and for 2012 onwards are projections. See chapter 2 for details. December population data for Indigenous young people are derived based on the average of two June ERPs.
- (c) Prior to 2009-10, the rates of children subject to notifications, investigations and substantiations were calculated for children aged 0–16 years, while the rates of children on care and protection orders and in out-of-home care were calculated for children aged 0–17 years. From the 2009-10 period onwards, all child protection data are reported for the age range 0–17 years and therefore, only 0–17 year old population data are collected.
- (d) Robust estimates of the non-Indigenous population aged 0–17 at 31 December 2016 are not available.

np not published. .. Not applicable.
