

13A Aged care services — attachment

Definitions for the indicators and descriptors in this attachment are in section 13.6 of the chapter in the *Report on Government Services 2009* (2009 Report). Data in this Report are examined by the Aged Care Services Working Group, but have not been formally audited by the Secretariat. Unsourced information was obtained from the Australian, State and Territory governments.

This file is available in Adobe PDF format on the Review web page (www.pc.gov.au/gsp). Users without Internet access can contact the Secretariat to obtain these tables (see details on the inside front cover of the Report).

Attachment contents

Table 13A.1	Target population data, by location ('000)
Table 13A.2	Indigenous aged care recipients per 1000 Indigenous people aged 50 years or over and as a proportion of all recipients, 30 June
Table 13A.3	Indigenous aged care recipients per 1000 Indigenous people aged 50 years or over by locality, 30 June
Table 13A.4	Aged care recipients from special needs groups, June 2008 (per cent)
Table 13A.5	HACC client characteristics, 2007-08
Table 13A.6	Distribution of HACC clients, by age and Indigenous status, 2007-08 (per cent)
Table 13A.7	Comparative characteristics of Indigenous HACC clients, 2007-08
Table 13A.8	Aged care assessments
Table 13A.9	Australian Government expenditure on Aged Community Care Programs, 2007-08 (\$ million)
Table 13A.10	Access to Commonwealth Carelink Centres, 2007-08
Table 13A.11	Indigenous permanent residents classified as high or low care and Indigenous CACP, and EACH at 30 June 2008: age-sex specific usage rates per 1000 people by remoteness

Table 13A.1 **Target population data, by location ('000) (a), (b), (c)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(a)	Geographical data are based on the ABS Australian Standard Geographic Classification of Remoteness Areas 2001. For years prior to 2008, data are classified according to an index of remoteness which rates each ABS Census District based on the number and size of towns, the distance to major towns and urban centres. For more information refer to the Australian Standard Geographic Classification (ABS Cat. no. 1216.0). For June 2008, the proportions of population in each Statistical Local Area (SLA) attributed to remoteness areas (RA) by DOHA, using ABS collection district to RA concordance.								
(b)	Data for years prior to 2008 are population projections by SLA for 2002–2022 based on 2001 Census prepared by ABS according to assumptions agreed to by the Department of Health and Ageing. Data for June 2008 are preliminary population projections by SLA for 2006–2026 based on 2006 Census prepared by ABS according to assumptions agreed to by DoHA.								
(c)	Data in this table are utilised to determine the target populations for the chapter.								
(d)	Data for people born in a non-English speaking country prior to 2008 are estimates based on ratios from ABS, CDATE 2001 Release 2 applied to ABS Population Projections by SLA 2002–2022 (unpublished), based on 2001 Census. Data for June 2008 are Census count of persons 70 plus born overseas in countries other than main English-speaking countries increased by ratio (70 plus projected population 2008) / (70 plus census count 2006) and then distributed amongst states and remoteness areas in same proportions as corresponding data published in the 2008 Report.								
(e)	Indigenous data prior to 2008 are Indigenous estimates are based on ratios from ABS Census 2001 data applied to population projections by SLA 2002–2022. Data for June 2008 are determined as follows: Observed average annual growth at state-level in ABS Experimental Indigenous Estimated Residential Populations (ERPS) between 2001 and 2006 for total Indigenous persons of all ages was applied to project 2006 ERPs forward to 2008. The increase from 2001 to 2006 contains unexplained population increase in addition to demographic population increase.								
	.. Not applicable. – Nil or rounded to zero.								
Source:	Department of Health and Ageing (DoHA) (unpublished); Preliminary population projections by SLA for 2006–2026 based on 2006 Census prepared by ABS according to assumptions agreed to by DoHA (unpublished); Projections based on ABS Experimental Indigenous ERPs by remoteness areas as at June 2006 (ABS Cat. no. 3238.0.55.001) (DoHA, unpublished); <i>ABS Experimental Estimates and Projections, Aboriginal and Torres Strait Islander Australians, 1991 to 2009</i> (ABS Cat. no. 3238.0); <i>Experimental Estimates of Aboriginal and Torres Strait Islander Australians</i> (ABS Cat. no. 3238.0.55.001); ABS unpublished data sourced by DoHA; 2009 Report, table 13A.2.

- (a) Data include high care residential, low care residential, EACH packages and CACPs.
- (b) In March 2008, the Residential Classification Scale (RCS) was replaced by the Aged Care Funding Instrument (ACFI), but some residents remained under the RCS in June 2008. These calculations use both RCS and ACFI as they applied at June 2008. See 2009 Report, Box 13.1 in the Aged care services chapter for more detail on these classifications.
- (c) Reports only people who are recorded as Indigenous.
- (d) Includes places provided under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, outside the Aged Care Act 1997. Excludes Multi-purpose Services.
- (e) Population data for 2008 are calculated on a different basis to years prior to 2008. See table 13A.1 for notes and sources of population data for Indigenous population estimates. Includes National Indigenous Aged Care Strategy places attributed as residents.
- (f) The ACT has a very small Indigenous population aged over 50 years and a small number of CACP packages will result in a very high provision ratio.

– Nil or rounded to zero.

(a) Data include high care residential, low care residential, EACH packages and CACPs.

(b) In March 2008, the Residential Classification Scale (RCS) was replaced by the Aged Care Funding Instrument (ACFI), but some residents remained under the RCS in June 2008. These calculations use both RCS and ACFI as they applied at June 2008. See 2009 Report, Box 13.1 in the Aged care services chapter for more detail on these classifications.

(c) Reports only people who are recorded as Indigenous.

Table 13A.3 Indigenous aged care recipients per 1000 Indigenous people aged 50 years or over by locality, 30 June (a), (b), (c), (d), (e), (f)

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT (g)</i>	<i>NT</i>	<i>Aust</i>
--	------------	------------	------------	-----------	-----------	------------	----------------	-----------	-------------

(d) Includes places provided under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, outside the Aged Care Act 1997. Excludes Multi-purpose Services.

(e) Geographical data are based on the ABS Standard Geographical classification Remoteness Areas 2002. See table 13A.2 note (a).

(f) Population data for 2008 are calculated on a different basis to years prior to 2008. See table 13A.1 for notes and sources of population data for Indigenous population estimates. Includes National Indigenous Aged Care Strategy places attributed as residents.

(g) The ACT has a very small Indigenous population aged over 50 years and a small number of CACP packages will result in a very high provision ratio.

.. Not applicable. – Nil or rounded to zero.

- (a) Population data for 2008 are calculated on a different basis to years prior to 2008. See table 13A.2 for notes regarding total population and Indigenous population data.
- (b) 2006-07 data in this table include complete assessments only. For previous years the following information applies: In May 2003 a new Minimum Data Set (MDSv2) was introduced for the Aged Care Assessment Program. With the exception of Queensland and about half of NSW, it had been adopted by states and territories when data shown in this table were collected. The data in this table have been selected to match MDSv1 and MDSv2 coding and to be comparable as closely as possible with previous reports containing MDSv1 data. Includes only assessments (completed and not completed) for the stated client group. (Some assessments are not completed because, for example, the client's circumstances may change or the client may withdraw mid-way through the assessment process. Separate counting of completed and not completed assessments has been introduced over time with the adoption of the MDSv2.)
- (c) The number of Indigenous assessments is based on self-identification of Indigenous status. Therefore these figures may not accurately represent the assessment of Indigenous persons.
- (d) The total number of assessments for Queensland in 2005-06 is underestimated by approximately 2000 due to technical failure.

(a) The objective of Aged Care Assessment is to provide comprehensive multidisciplinary assessment of needs of frail older people, including delegated authority to approve people for Australian Government subsidised care through residential aged care, Community Aged Care Packages and flexible care. Funded through Australian Government grants to State and Territory Governments that operate 115 Aged Care Assessment Teams (ACATs) and Evaluation Units.

Table 13A.9

Table 13A.9 Australian Government expenditure on Aged Community Care Programs, 2007-08 (\$ million)

	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Other	Aust
(b)	The objective of Community Aged Care Packages are to assist people with complex care needs who otherwise are eligible for low level residential care to remain in the community. Australian Government only funded.									
(c)	The objective of Extended Aged Care at Home is to provide high level care at home as an alternative to high level residential care. Australian Government only funded.									
(d)	The objective of Community Care Grants is to provide one-off assistance in the form of a grant to help Care Package Providers establish the administrative infrastructure for package provision.									
(e)	The objective of Assistance with Care and Housing for the Aged is to assist financially disadvantaged older people who are renting or who are homeless to access both community care and accommodation. Formerly a pilot program.									
(f)	The objective of National Respite for Carers is to provide support for carers of the frail aged and people with disabilities, through the provision of information, advice, coordination and delivery of respite care services. A further breakdown of expenditure is in table 13.4 of the Aged care services chapter.									
(g)	The objective of Day Therapy Centres is to assist older people to maintain or recover functional independence, through the provision of therapy services to allow them to remain in the community or in low level residential care. Funding is Australian Government only.									
(h)	The objective of Carers Information and Support is to provide information and support for carers of frail aged and people with a disability to assist them in their caring role.									
(i)	The objective of Commonwealth Carelink Centres is to provide a single point of information about the range of community, aged and disability services. Includes 65 shopfronts and a national 1800 number.									
(j)	The objective of the National Continence Management Strategy is to improve continence awareness, management and treatment so that more Australians can live and participate in their community with confidence and dignity.

(a) Contacts include phone calls, emails, visits and facsimiles.

(b) People making contact self identify as Indigenous. Therefore, there is likely to be substantial under reporting of Indigenous status.

(c) Indigenous people aged 50 years and over. See footnotes to table 13A.2 for details of population calculations.

(d) All people aged 70 years and older plus Indigenous people aged 50-69. See footnotes to table 13A.2 for details of population calculations.

- (a) Geographical data are based on the ABS Australian Standard Geographic Classification of Remoteness Areas 2001. Data are classified according to an index of remoteness which rates each ABS Census District based on the number and size of towns, the distance to major towns and urban centres. For more information refer to the Australian Standard Geographic Classification (ABS Publication 1216.0). See notes to table 13A.2.
- (b) These figures exclude places and packages funded by Multi-purpose services and those provided by flexible funding under the Aboriginal and Torres Strait Islander Aged Care Strategy.
- (c) All permanent residents are included.
- (d) Indigenous population data for June 2008 are determined using DoHA unpublished projections based on published ABS Experimental Indigenous ERPs by remoteness areas for age groups up to 65 plus, as at June 2006 (ABS Cat. no. 3238.0.55.001). Observed average annual growth at remoteness area (RA) level in ABS Experimental Indigenous Estimated Residential Populations (ERPs) between 2001 and 2006 for total Indigenous persons of all ages was applied to project 2006 ERPs forward to 2008. The 65 years and over group was split into 65-74 and 75 plus age groups for each RA using proportions from published Indigenous ERP data for males, females, persons for Australia. Also see notes to table 13A.2 for further notes and sources of data.
- (e) EACH packages do not include EACH dementia packages. Earlier reports included EACH dementia packages in these data.
