Attachment tables

Attachment tables are identified in references throughout this Indigenous Compendium by an 'A' prefix (for example, in this chapter, table 13A.1). As the data are directly sourced from the 2012 Report, the Compendium also notes where the original table, figure or text in the 2012 Report can be found. For example, where the Compendium refers to '2012 Report, p. 13.1' this is page 1 of chapter 13 of the 2012 Report, and '2012 Report, table 13A.1' is attachment table 1 of attachment 13A of the 2012 Report. A full list of attachment tables referred to in the Compendium is provided at the end of this chapter, and the attachment tables are available from the Review website at www.pc.gov.au/gsp.

The Aged care services chapter (chapter 13) in the *Report on Government Services 2012* (2012 Report) reports on the performance of Aged care services in each Australian state and territory. Data are reported for Indigenous people for a subset of the performance indicators reported in that chapter — those data are compiled and presented here.

The aged care system comprises all services specifically designed to meet the care and support needs of older people living in Australia. This chapter focuses on government funded residential and community care for older people and services designed for the carers of older people. Some government expenditure on aged care is not reported, but continual improvements are being made to the coverage and quality of the data.

Major improvements in reporting on aged care services this year include:

- reporting of a new measure on Australian Government expenditure on residential aged care, selected community aged care programs, multipurpose services and Indigenous specific services under the ‘expenditure per head of target population’ indicator
- inclusion of new data quality information (DQI) documentation.

Services for older people are provided on the basis of the frailty or functional disability of the recipients, as distinct from specific age criteria. Nevertheless, in the absence of more specific information, this Report uses people aged 70 years or over as a proxy for the likelihood of a person in the general population requiring these services. Particular groups (notably Indigenous people) can require various services at a younger age. For Indigenous people, those aged 50 years or over are used as a proxy for the likelihood of requiring aged care services. People aged 70 years or over and Indigenous people aged 50–69 years are used as a proxy ‘target’ population for aged care services in this Report. The Australian Government uses this population as a ‘planning population’ to allocate aged care places under the *Aged Care Act 1997*. Nationally, in 2010–11, the proportion of the population who are in this category was 10.0 per cent, although the proportion varies across jurisdictions (2012 Report, table 13A.1 and table 13A.2).

Government funded aged care services covered in this chapter relate to the three levels of government (Australian, State and Territory, and some local) involved in service funding and delivery. The services covered include:

- assessment and information services, which are largely provided by the Aged Care Assessment Program (ACAP)
- residential care services, which provide permanent high and low level care, and respite high and low level care

-
- community care services, including home-based care and assistance to help older people remain, or return to, living independently in the community as long as possible. These services include:
 - HACC program services
 - Community Aged Care Packages (CACP)
 - flexible care services provided under the Extended Aged Care at Home (EACH) and the EACH-Dementia (EACH-D) programs
 - services provided by the Department of Veterans' Affairs (DVA) under the Veterans' Home Care (VHC)¹ and Community Nursing programs
 - community care respite services, which include HACC respite and centre-based day care services and services provided under the National Respite for Carers Program (NRCP)
 - services provided in mixed delivery settings, which are designed to provide flexible care or specific support:
 - flexible care services, which address the needs of care recipients in ways other than that provided through mainstream residential and community care — services are provided under the Transition Care Program (TCP), Multi-purpose Service Program (MPS), Innovative Care Pool and National Aboriginal and Torres Strait Islander Flexible Aged Care Program
 - specific support services, which are provided to address particular needs such as those under the Long Stay Older Patients initiative and in Day Therapy Centres.

The Aged care services chapter in the 2012 Report contains the following information on Indigenous people:

- age profile and target population differences between Indigenous and other Australians, June 2006
- Aged Care Assessment Team (ACAT) assessment rates, 2009-10
- variation in the proportions of Indigenous populations accessing aged care services from their proportion in the target population as a whole, June 2011
- residents per 1000 target population, 30 June 2011
- CACP recipients per 1000 target population, 30 June 2011
- recipients of HACC services by age and Indigenous status, 2010-11

¹ Unless otherwise stated, HACC expenditure excludes the DVA expenditure on VHC.

-
- Commonwealth Carelink Centres, contacts per 1000 target population, by Indigenous status, 30 June 2011.

The aged care attachment contains additional data relating to Indigenous people including:

- target population data, by location
- people receiving aged care services, 2010-11
- government expenditure on Indigenous specific programs, 2010-11
- Indigenous aged care recipients, June 2011
- Indigenous aged care recipients per 1000 Indigenous people aged 50 years or over and as a proportion of all recipients and by locality, 30 June
- Indigenous permanent residents classified as high or low care and Indigenous CACP, EACH and EACH-D at 30 June 2011: age specific usage rates per 1000 people by remoteness
- HACC client characteristics, 2010-11
- comparative characteristics of Indigenous HACC clients, 2010-11
- hospital patient days used by those eligible and waiting for residential aged care, 2009-10
- falls resulting in patient harm in residential aged care and treated in hospital, 2009-10.

Indigenous-specific descriptive information

Characteristics of older Indigenous people

The DoHA estimates that about 76 324 Indigenous people were aged 50 years or over in Australia at 30 June 2011 (table 13A.2). Although the Indigenous population is also ageing, there are marked differences in the age profile of Indigenous Australians compared with non-Indigenous Australians (figure 13.1). Estimates show life expectancy at birth in the Indigenous population is around 11.5 years less for males and 9.7 years less for females when compared with the total Australian population (ABS 2009). Indigenous people aged 50 years or over are used in this Report as a proxy for the likelihood of requiring aged care services, compared to 70 years or over for the general population.

Figure 13.1 Age profile and target population differences between Indigenous and other Australians, June 2006

Source: ABS (2008) *Experimental Estimates of Aboriginal and Torres Strait Islander Australians*, June 2006, Cat. no. 3238.0.55.001, Canberra; 2012 Report, figure 13.6, p. 13.21.

Aged Care Assessments

Aged care assessments are designed to assess the care needs of older people and assist them to gain access to the most appropriate type of care. The number of assessments of people aged 70 years or over and Indigenous people aged 50–69 years per 1000 target population varied across jurisdictions in 2009-10. The national rate was 78.1 assessments per 1000 people aged 70 years or over and Indigenous people aged 50-69 years. The rate for Indigenous people was 32.9 per 1000 Indigenous people aged 50 years or over (figure 13.2). Data on the numbers and rates of assessment for people of all ages by age group, Indigenous status, remoteness of residence and Socio-Economic Indexes for Areas (SEIFA) are in table 13A.66.

Figure 13.2 Aged Care Assessment Team assessment rates, 2009-10^{a, b, c, d, e}

^a Includes ACAT assessments for all services. ^b All people includes all assessments of people aged 70 years or over and Indigenous people aged 50 years or over per 1000 people aged 70 years or over and Indigenous people aged 50 years or over. ^c Indigenous includes all assessments of Indigenous people aged 50 years or over per 1000 Indigenous people aged 50 years or over. ^d The number of Indigenous assessments is based on self-identification of Indigenous status. ^e See table 13A.64 for further explanation of these data.

Source: Aged Care Assessment Program National Data Repository (unpublished); table 13A.64, 2012 Report, figure 13.7, p. 13.22.

Residential and community care services

Residential care services provide permanent high level and low level care and respite high/low level care:

- high care combines services such as nursing care, continence aids, basic medical and pharmaceutical supplies and therapy services with the types of services provided in low care such as accommodation, support services (cleaning, laundry and meals) and personal care services
- low care focuses on personal care services, accommodation, support services (cleaning, laundry and meals) and some allied health services such as physiotherapy — nursing care can be given when required
- respite provides short term residential high/low care on a planned or emergency basis (DoHA 2011).

Changing government policies over the past decade — shifting the balance of care away from the more intensive types of residential care towards community-based care — have meant that the HACC, CACP, EACH, EACH-D and DVA VHC and community nursing programs have become increasingly important components of the aged care system.

Indigenous age specific usage rates for permanent residential services combined with community care program services (CACP, EACH and EACH-D) are reported by remoteness category in table 13A.46.

Indigenous-specific services — National Aboriginal and Torres Strait Islander Flexible Aged Care Program

Flexible models of care are also provided under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program. These services are funded and operate outside the regulatory framework of the *Aged Care Act 1997*. Aboriginal and Torres Strait Islander people also access mainstream services under the *Aged Care Act 1997*, including those managed by Aboriginal and Torres Strait Islander organisations.

The National Aboriginal and Torres Strait Islander Flexible Aged Care Program aims to provide quality, flexible, culturally appropriate aged care to older Aboriginal and Torres Strait Islander people close to their home and community. Flexible Aged Care services can deliver a mix of residential and community aged care services to meet the needs of the community.

Some services managed by non-Indigenous approved providers also have significant numbers of Aboriginal and Torres Strait Islander clients. All aged care services that are funded under the *Aged Care Act 1997* are required to provide culturally appropriate care. Whether they are located in a community or residential setting, services can be subject to specific conditions of allocation in relation to the proportion of care to be provided to particular groups of people, including Aboriginal and Torres Strait Islander people.

At 30 June 2011, there were 28 aged care services funded to deliver 645 flexible aged care places under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program (DoHA unpublished). The Australian Government spent \$25.3 million on Indigenous specific services delivered under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program (table 13A.5).

Framework of performance indicators

The performance indicators for Aged care services are in figure 13.3. Data for Indigenous people are reported for a subset of the performance indicators and are presented here. It is important to interpret these data in the context of the broader performance indicator framework. The framework shows which data are

comparable. For data that are not considered directly comparable, the text includes relevant caveats and supporting commentary.

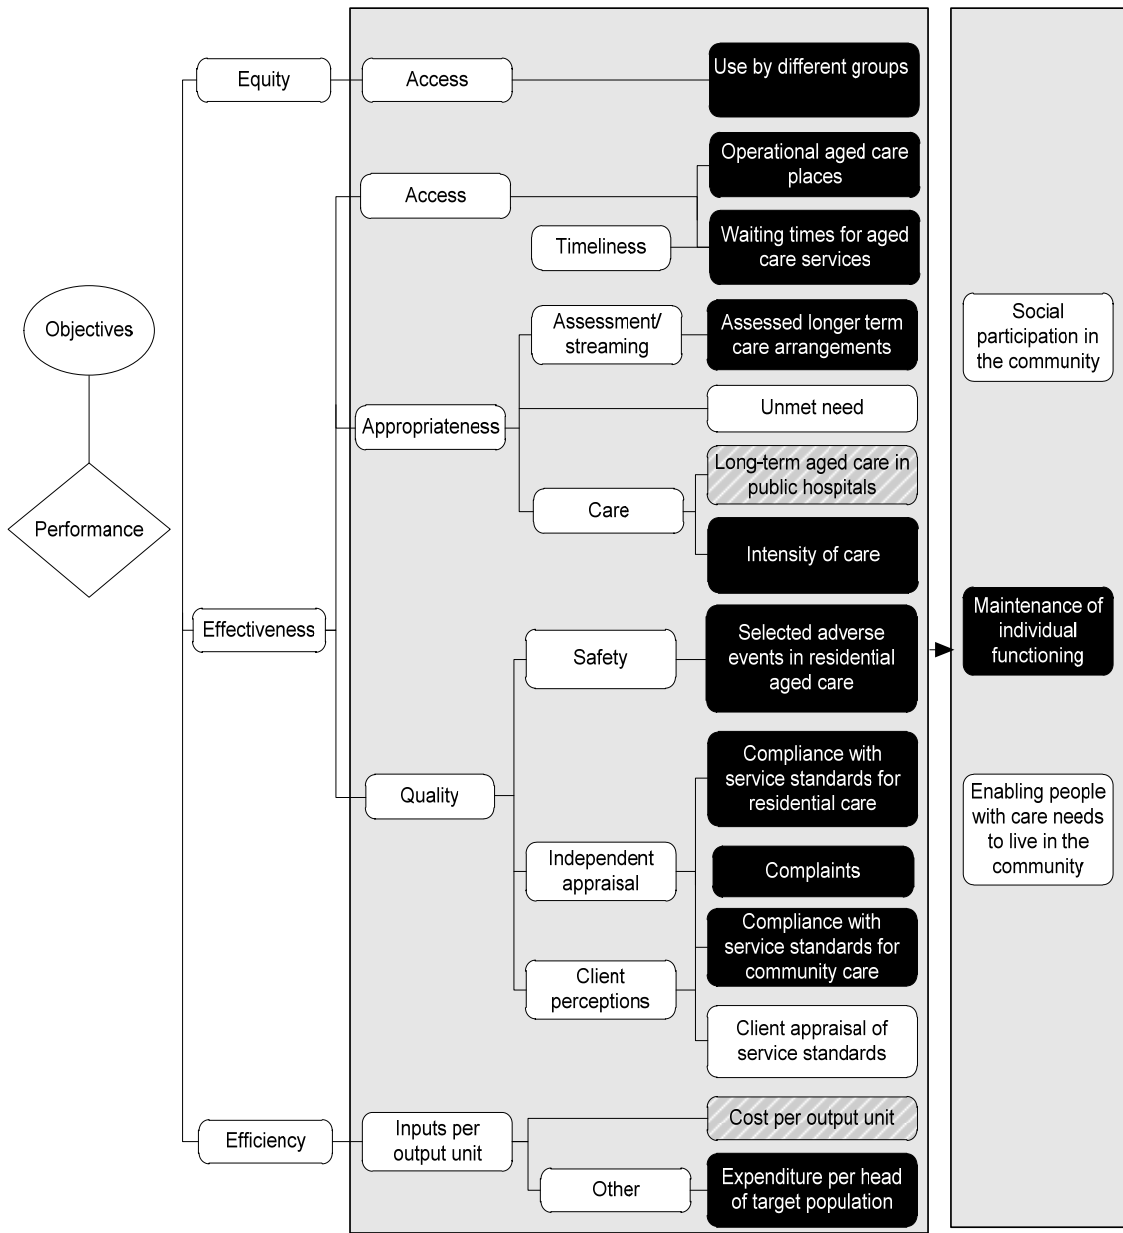

Indicator boxes presented throughout the chapter provide information about the reported indicators. As these are sourced directly from the 2012 Report, they may include references to data not reported for Indigenous people and therefore not included in this Compendium.

The Report's statistical appendix contains data that may assist in interpreting the performance indicators presented in this chapter. These data cover a range of demographic and geographic characteristics, including age profile, geographic distribution of the population, income levels, education levels, tenure of dwellings and cultural heritage (including Indigenous and ethnic status) (appendix A).

Changes to performance reporting for the 2012 Report comprise inclusion of data:

- on the variation in the proportion of people aged 50 years or over accessing residential services, HACC, CACPs, EACH and EACH-D services who are Indigenous, from the proportion of people aged 50 years or over who are Indigenous, to provide additional analysis under the 'Use by different groups' indicator
- under the 'expenditure per head of target population' indicator on Australian Government expenditure on residential aged care, selected community aged care programs, multipurpose services and Indigenous specific services.

Use by different groups

‘Use by different groups’ is an indicator of governments’ objective for the aged care system to provide equitable access to aged care services for all people who require these services (box 13.1).

Box 13.1 Use by different groups

‘Use by different groups’ is defined by the following measures:

- variation in the proportion of people aged 70 years or over accessing residential services, HACC, CACPs, EACH and EACH-D services who are born in a non-English speaking country, from the proportion of people in the target population (aged 70 years or over) who are born in a non-English speaking country
- variation in the proportion of people aged 70 years or over and Indigenous people aged 50–69 years accessing residential services, HACC, CACPs, EACH and EACH-D services who are Indigenous, from the proportion of people in the target population who are Indigenous (similar analysis using data for all people aged over 50 years is reported for information)
- the number of people born in non-English speaking countries using residential services, CACPs, EACH and EACH-D, divided by the number of people born in non-English speaking countries aged 70 years or over, compared with the rate at which the general population (number of people aged 70 years or over and Indigenous people aged 50–69 years) accesses the service
- the number of Indigenous people using residential services, CACP, EACH, and EACH-D services, divided by the number of Indigenous people aged 50 years or over (because Indigenous people tend to require aged care services at a younger age than the general population) compared with the rate at which the general population (number of people aged 70 years or over and Indigenous people aged 50–69 years) accesses the service
- the number of veterans aged 70 years or over in residential care divided by the total number of eligible veterans aged 70 years or over, where a veteran is defined as a DVA Gold or White card holder
- access to HACC services for people living in rural or remote areas — the number of hours of HACC service received (and, separately, meals provided) divided by the number of people aged 70 years or over and Indigenous people aged 50–69 years for major cities, inner regional areas, outer regional areas, remote areas and very remote areas

(Continued next page)

Box 13.1 (Continued)

- the rate of contacts with Commonwealth Respite and Carelink Centres for Indigenous people compared with the rate for all people
- access to residential aged care services for financially disadvantaged people
 - the proportion of new residents classified as supported
 - the proportion of permanent resident care days classified as concessional, assisted or supported

In general, usage rates for special needs groups similar to those for the broader aged care population are desirable, but interpretation of results differs for some special needs groups because:

- there is evidence that Indigenous people have higher disability rates than those of the general population, which suggests a greater level of need for services compared with those in the broader aged care population
- for financially disadvantaged users, Australian Government planning guidelines require that services allocate a minimum proportion of residential places for concessional, assisted or supported residents. These targets range from 16 per cent to 40 per cent of places, depending on the service's region. Usage rates equal to, or higher than, the minimum rates are desirable.

Use by different groups is a proxy indicator of equitable access. Various groups are identified by the *Aged Care Act 1997* and its principles (regulations) as having special needs, including people from Indigenous communities, people born in non-English speaking countries, people who live in rural or remote areas, people who are financially or socially disadvantaged, veterans (including widows and widowers of veterans), people who are homeless or at risk of becoming homeless, or who are care leavers. A care leaver is a person who was in institutional care (such as an orphanage or mental health facility) or other form of out-of-home care, including foster care, as a child or youth (or both), at some time during their lifetime (DoHA 2011).

Several factors need to be considered in interpreting the results for this set of measures:

- Cultural differences can influence the extent to which people born in non-English speaking countries use different types of services.
- Cultural differences and geographic location can influence the extent to which Indigenous people use different types of services.
- The availability of informal care and support can influence the use of aged care services in different population groups.

Data reported for this indicator are comparable.

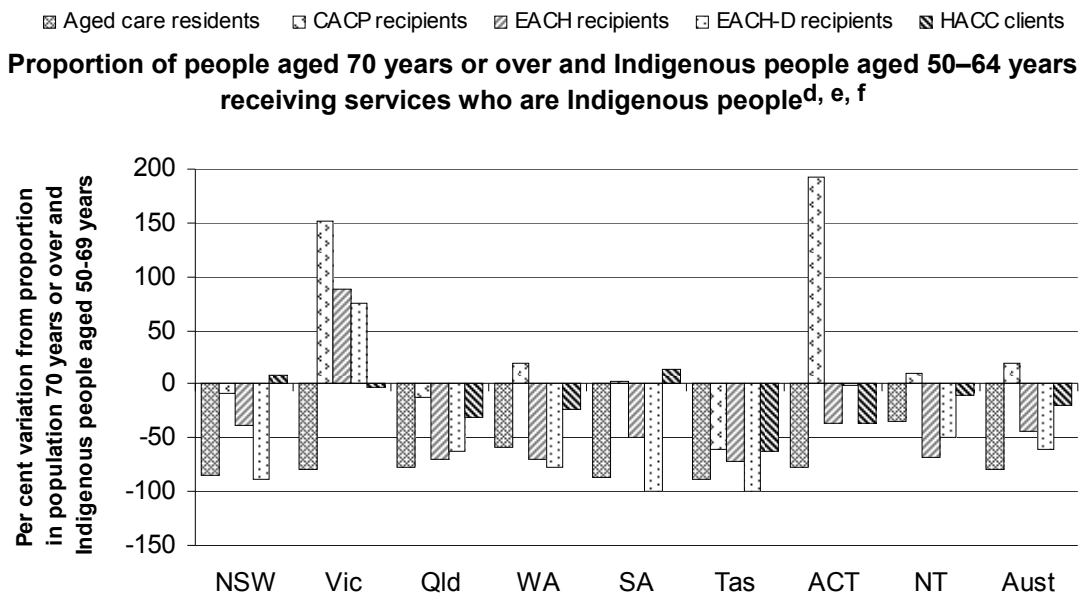

Data quality information for five measures defined for this indicator is at www.pc.gov.au/gsp/reports/rogs/2012. Data quality information for the other measures is under development.

Data presented for this indicator are organised by the type of service provided, with sub-sections for the relevant special needs groups reported against that service.

Access to residential care services, HACC, CACP, EACH and EACH-D services by Indigenous people

Nationally, in comparison to their proportion of the target population as a whole, Indigenous people are under-represented in access to residential care, HACC, EACH and EACH-D services (figure 13.4). However, in relation to the CACP program, Indigenous people are over-represented, compared with the proportion of this group in the target population.

Figure 13.4 Variation in the proportion of Indigenous people accessing services from their proportion in the relevant target population as a whole, June 2011^{a, b, c}

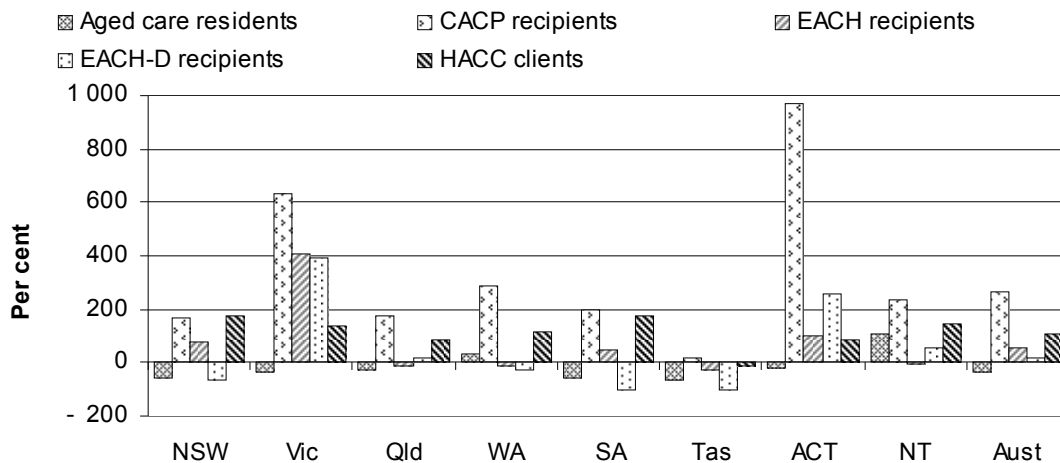

^a The proportion of HACC funded agencies that submitted Minimum Data Set data for 2010-11 differed across jurisdictions and ranged from 94 per cent to 100 per cent. Consequently, actual service levels were higher than stated. ^b Reports provisional HACC data that have not been validated and may be subject to revision. ^c Some of these proportions are calculated using small numbers. In particular, this applies to the proportions for EACH and EACH-D. See table 13A.30 for more details. ^d The numerator of the proportion comprises service users who are Indigenous people aged 50 years or over. The denominator of the proportion comprises service users who are people aged 70 years or over and Indigenous people aged 50–64 years. ^e The ACT has a very small Indigenous population aged 50 years or over (table 13A.2) and a small number of CACP recipients results in a very high provision ratio. ^f Excludes National Aboriginal and Torres Strait Islander Flexible Aged Care Program recipients.

Source: DoHA (unpublished); table 13A.30; 2012 Report, figure 13.12, p. 13.41.

Results for Indigenous people should be considered with caution. While Indigenous recipients are under-represented when compared to the general target population (people aged 70 years or over and Indigenous people aged 50–69 years), if the analysis is done separately for all people aged 50 years or over; nationally, Indigenous clients are over-represented compared to the total Australian population in this age group for all services, except residential care (figure 13.5). However, this might not be an over-representation in terms of the need for services if the higher disability/morbidity rates of Indigenous people are taken into account.

In addition, if access to HACC services were measured in terms of the HACC target population the results would also differ to those reported in figure 13.4. The HACC target population is based on the proportion of people in households with moderate, severe or profound disability rather than the population of people aged 70 years or over and Indigenous people aged 50–65 years. For further details on the HACC target population see 2012 Report, section 13.6.

Figure 13.5 Variation in the proportion of people aged 50 years or over accessing aged care services who are Indigenous, from their proportion in the population aged 50 years or over, June 2011^{a, b, c, d, e}

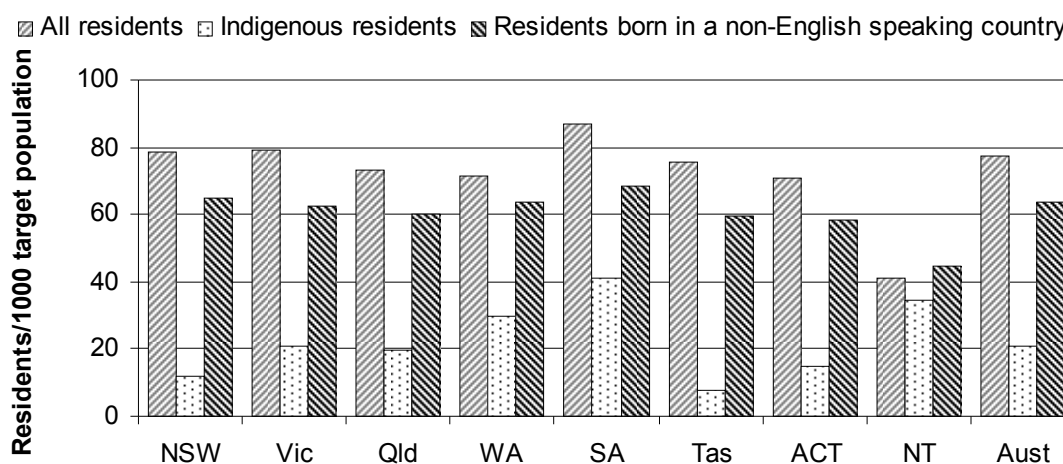

^a The proportion of HACC funded agencies that submitted Minimum Data Set data for 2010-11 differed across jurisdictions and ranged from 94 per cent to 100 per cent. Consequently, actual service levels were higher than stated. ^b Reports provisional HACC data that have not been validated and may be subject to revision. ^c Some of these proportions are calculated using small numbers. In particular, this applies to the proportions for EACH and EACH-D. See table 13A.31 for more details. ^d The ACT has a very small Indigenous population aged 50 years or over (table 13A.2) and a small number of CACP recipients results in a very high provision ratio. ^e Excludes National Aboriginal and Torres Strait Islander Flexible Aged Care Program recipients.

Source: DoHA (unpublished); table 13A.31; 2012 Report, figure 13.13, p. 13.42.

Access to residential aged care services by Indigenous people

At 30 June 2011, on average, Indigenous people and people born in non-English speaking countries had lower rates of use of aged care residential services (21.0 and 63.4 per 1000 of the relevant target populations respectively), compared with the population as a whole (77.4 per 1000) (figure 13.6).

Figure 13.6 Residents per 1000 target population, 30 June 2011^{a, b, c}

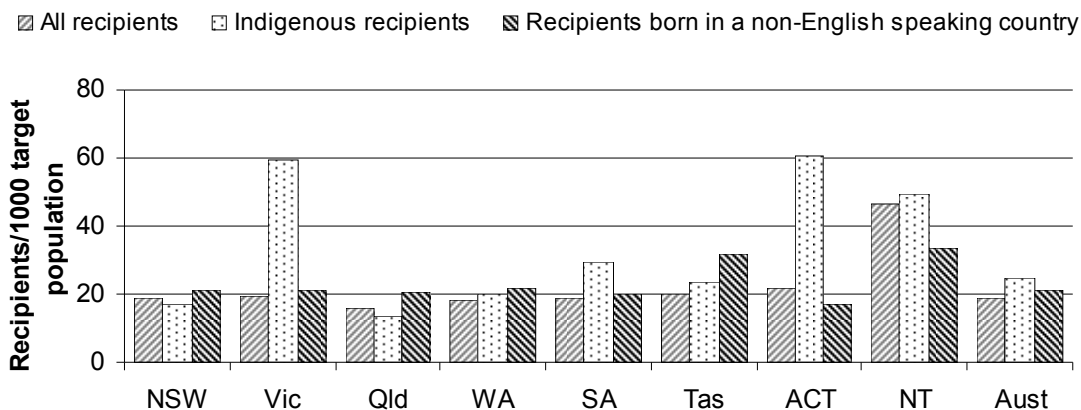

^a All residents data are per 1000 people aged 70 years or over and Indigenous people aged 50–69 years. ^b Indigenous residents data are per 1000 Indigenous people aged 50 years or over. ^c Data for residents from a non-English speaking country are per 1000 people from non-English speaking countries aged 70 years or over.

Source: DoHA (unpublished); table 13A.34; 2012 Report, tables 13A.28 and 13A.32; 2012 Report, figure 13.14, p. 13.43.

Access to aged care community programs by Indigenous people

Nationally, the number of Indigenous CACP recipients per 1000 Indigenous people aged 50 years or over was 24.6 and the numbers of CACP recipients from non-English speaking countries per 1000 of the relevant target population was 21.0. These numbers compare to a total of 18.8 per 1000 of the target population (people aged 70 years or over and Indigenous people aged 50–69 years) (figure 13.7).

Figure 13.7 **Community Aged Care Package recipients per 1000 target population, 30 June 2011^{a, b, c, d, e}**

^a All recipients data are per 1000 people aged 70 years or over and Indigenous people aged 50–69 years. ^b Indigenous recipients data are per 1000 Indigenous people aged 50 years or over. ^c Data for recipients from non-English speaking countries are per 1000 people from non-English speaking countries aged 70 years or over. ^d The ACT has a very small Indigenous population aged 50 years or over (table 13A.2), and a small number of packages result in a very high provision ratio. ^e CACPs provide a more flexible model of care, more suitable to remote Indigenous communities, so areas such as the NT have a higher rate of CACP recipients per 1000 people.

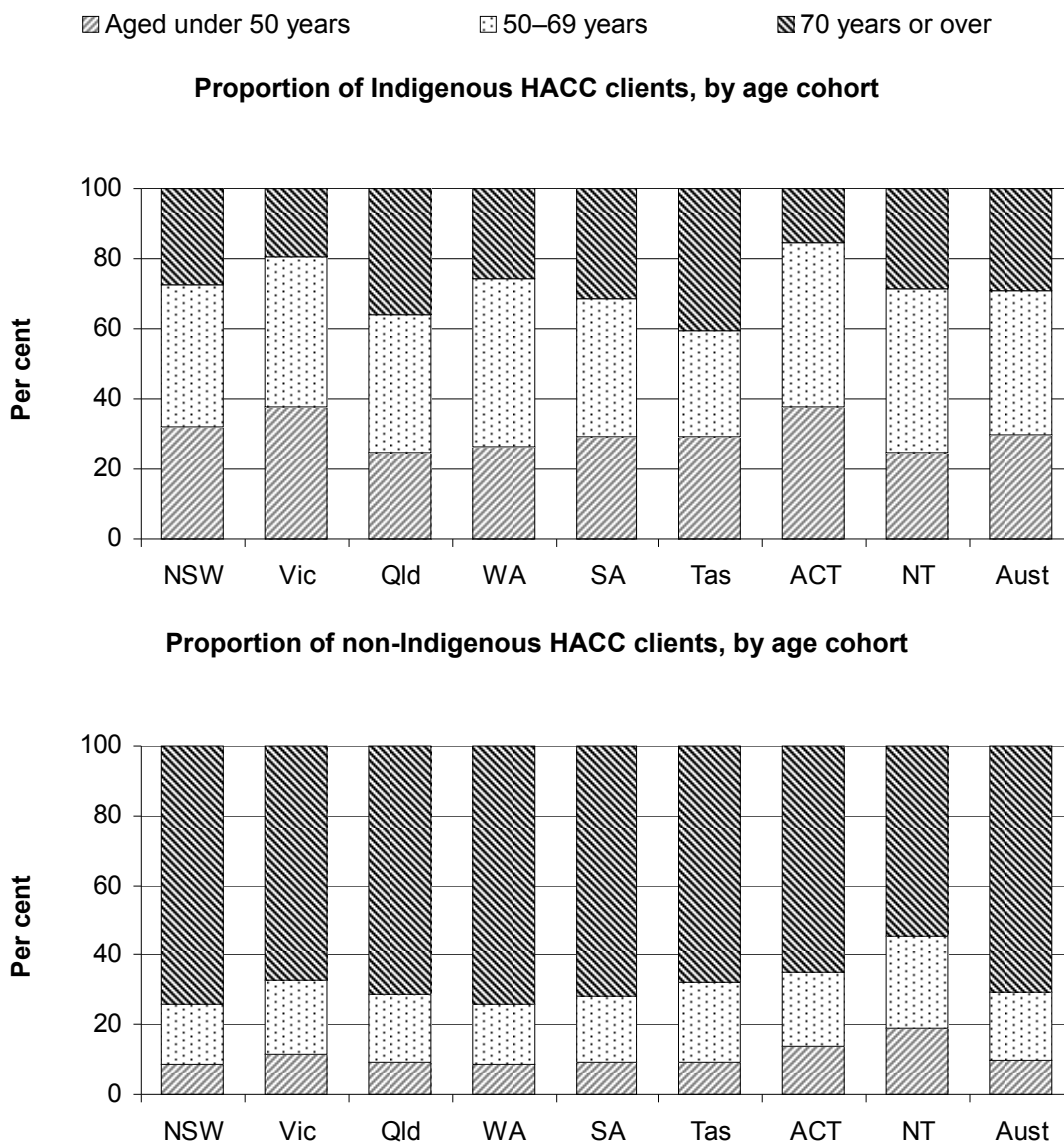

Source: DoHA (unpublished) table 13A.34; 2012 Report, tables 13A.28 and 13A.32; 2012 Report, figure 13.15, p. 13.44.

Access to the HACC program

HACC services are provided in the client's home or community for people with moderate, severe or profound disability and their carers. The focus of this chapter is all people 70 years or over and Indigenous people aged 50–69 years. The proportion of HACC clients aged 70 years or over during 2010-11 was 69.2 per cent (table 13A.60).

Reported use of HACC services showed a substantial difference between all users and Indigenous users across all age groups in 2010-11. This reflects the difference in morbidity and mortality trends between Indigenous people and the general population. The proportion of Indigenous HACC clients who are aged 70 years or over is 28.9 per cent and the proportion of non-Indigenous HACC clients who are aged 70 years or over is 70.8 per cent (figure 13.8).

Figure 13.8 Recipients of HACC services by age and Indigenous status, 2010-11^{a, b}

^a Reports provisional HACC data that have not been validated and may be subject to revision. ^b The proportion of HACC clients with unknown Indigenous status differed across jurisdictions. Nationally, the proportion of HACC clients with unknown or null Indigenous status was 7.1 per cent (table 13A.60).

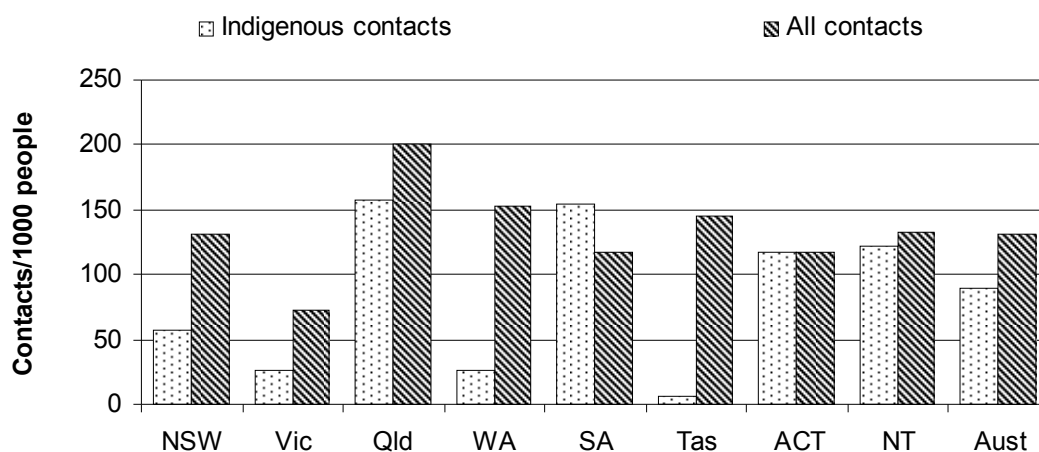

Source: DoHA (unpublished); table 13A.61; 2012 Report, figure 13.17, p. 13.47.

Access by Indigenous people to Commonwealth Respite and Carelink Centres

Commonwealth Respite and Carelink Centres are information centres for older people, people with disabilities, carers and service providers. Information is provided on community services and aged care, disability and other support services available locally or anywhere in Australia, the costs of services, assessment

processes and eligibility criteria. The national rate at which Indigenous people contacted Respite and Carelink Centres at 30 June 2011, was 90.1 people per 1000 Indigenous people in the Indigenous target population (Indigenous people aged 50 years or over). The rate for all Australians was 130.9 per 1000 people in the target population (people aged 70 years or over and Indigenous people aged 50–69 years). These figures varied across jurisdictions (figure 13.9).

Figure 13.9 Commonwealth Respite and Carelink Centres, contacts per 1000 target population, by Indigenous status, 30 June 2011^{a, b, c, d}

^a Contacts include phone calls, visits, emails and facsimiles. ^b Indigenous contacts refer to contacts by Indigenous people per 1000 Indigenous people in the target population. ^c All contacts refers to contacts per 1000 target population. ^d Indigenous status is determined through people making contact self identifying themselves as Indigenous. Therefore, there is likely to be substantial under-reporting of Indigenous status.

Definitions of key terms and indicators

Aged care	<p>Formal services funded and/or provided by governments that respond to the functional and social needs of older people, and the needs of their carers. Community aged care services aim to optimise independence and to assist older people to stay in their own homes, while residential care services provide accommodation and care for those who can no longer be assisted to stay at home. Assessment of care needs is an important component of aged care.</p> <p>The majority of aged care services assist in activities of daily living such as personal care (for example, bathing and dressing), housekeeping and meal provision. Other services aim to promote social participation and connectedness. These services are delivered by trained aged care workers and volunteers. However, aged care services may also be delivered by health professionals such as nurses and occupational therapists.</p> <p>Aged care services generally aim to promote wellbeing and foster function rather than to treat illness. Although some aged care services such as transition care have a specific restorative role, they are distinguished from the health services described in Part E of this Report.</p> <p>Aged care services may be funded through programs specifically or mainly directed to older people, or through programs that address the needs of people of different ages. Generally, the target groups of aged care services are people aged 70 years or over and Indigenous people aged 50 years or over.</p>
Care leaver	<p>A care leaver is a person who was in institutional care (such as an orphanage or mental health facility) or other form of out-of-home care, including foster care, as a child or youth (or both) at sometime during their lifetime (DoHA 2011).</p>
Disability	<p>A limitation, restriction or impairment that has lasted, or is likely to last, for at least six months and restricts everyday activities.</p>
HACC target population	<p>The HACC Target population is people in the Australian community who, without basic maintenance and support services provided under the scope of the HACC Program, would be at risk of premature or inappropriate long term residential care, including (i) older and frail people with moderate, severe or profound disabilities; (ii) younger people with moderate, severe or profound disabilities; and (iii) such other classes of people as are agreed upon, from time to time, by the Commonwealth Minister and the State Minister. The HACC Target Population is estimated by applying the proportion of people in households with a moderate, severe, or profound disability as reported in the ABS 2003 <i>Survey of Disability, Ageing and Carers</i> to the ABS Population Projections by SLA 2002–2022.</p>
Places	<p>A capacity within an aged care service for the provision of residential care, community care or flexible care in the residential care context to an individual (<i>Aged Care Act 1997 (Cwlth)</i>); also refers to 'beds' (<i>Aged Care (Consequential Provisions) Act 1997 (Cwlth)</i>, s.16).</p>
Real expenditure	<p>Actual expenditure adjusted for changes in prices, using the GDP(E) price deflator and expressed in terms of final year prices.</p>
Resident	<p>For the purposes of the <i>Aged Care Act 1997</i>, a person who is being provided with residential care through an aged care service conducted by an approved provider under the Act.</p>

Special needs groups	Section 11-3 of the Aged Care Act, specifies the following people as people with special needs: people from Aboriginal and Torres Strait Islander communities; people from non-English speaking countries; people who live in rural or remote areas; and people who are financially or socially disadvantaged. Principles (Regulations) made under s. 11-3 also specify veterans, people who are homeless or at risk of becoming homeless, and care leavers as special needs groups
Veterans	Veterans, their war widows, widowers and dependents who are eligible for treatment through the Department of Veterans' Affairs under the provisions of the <i>Veterans' Entitlements Act 1986 (Cwlth)</i> .

List of attachment tables

Attachment tables for data within this chapter are contained in the attachment to the Compendium. These tables are identified in references throughout this chapter by a '13A' prefix (for example, table 13A.1 is table 1 in the Aged care services attachment). Attachment tables are on the Review website (www.pc.gov.au/gsp).

Table 13A.2	Target population data, by location ('000)

13A Aged care services — attachment

Tables in this attachment are sourced from the Aged care services attachment of the 2012 Report. Table numbers refer to the 2012 Report, for example, a reference to ‘2012 Report, table 13A.15’ refers to attachment table 15 of attachment 13A of the 2012 Report.

Definitions for indicators and descriptors in this attachment are in the Aged care services chapter of the Compendium.

Data in this Compendium are examined by the Aged Care Services Working Group, but have not been formally audited by the Secretariat.

Data reported in the attachment tables are the most accurate available at the time of data collection. Historical data may have been updated since the last edition of RoGS.

This file is available in Adobe PDF format on the Review web page (www.pc.gov.au/gsp).

- (a) Geographical data are based on the ABS Australian Standard Geographic Classification of Remoteness Areas. Data are classified according to an index of remoteness which rates each ABS census district based on the number and size of towns, the distance to major towns and urban centres. For more information refer to the Australian Standard Geographic Classification (ABS Publication 1216.0). The proportions of population in each Statistical Local Area (SLA) were attributed to Remoteness Areas (RA) by DoHA, using ABS SLA to RA concordance.
- (b) Data for years prior to 2008 are population projections by SLA for 2002–2022 based on 2001 Census prepared for DoHA by ABS according to assumptions agreed to by DoHA. Data for June 2008 are preliminary population projections by SLA for 2006–2026 based on 2006 Census prepared by ABS for DoHA according to assumptions agreed to by DoHA. Data for years from June 2009 are population projections by SLA for 2007–2027 based on 2006 Census prepared by ABS for DoHA according to assumptions agreed to by DoHA.
- (c) Data in this table are utilised to determine the target populations for the chapter.
- (d) Data for people born in a non-English speaking country prior to 2008 are estimates based on ratios from ABS, CDATA 2001 Release 2 applied to ABS population projections by SLA 2002–2022 (unpublished), based on 2001 Census. Data for June 2008 are census count of persons 70 and born overseas in countries other than main English-speaking countries increased by ratio (70 and projected population 2009) / (70 and census count 2006) and then distributed amongst states and remoteness areas in the same proportions as corresponding data published in the 2009 Report. Data from June 2009 are based on ratios from ABS 2006 Census data applied to population projections by SLA 2007–2027 (unpublished, produced for DoHA by ABS). People born in a non-English speaking country refers to those born overseas in countries other than UK, Ireland, NZ, Canada, South Africa, and USA.
- (e) Indigenous data prior to 2008 are Indigenous estimates based on ratios from ABS Census 2001 data applied to population projections by SLA 2002–2022. Data for June 2009 are determined as follows: observed average annual growth at state-level in ABS Experimental Indigenous Estimated Residential Populations (ERPs) between 2001 and 2006 for total Indigenous persons of all ages was applied to project 2006 ERPs forward to 2009. The increase from 2001 to 2006 contains unexplained population increase in addition to demographic population increase. Indigenous population estimates from June 2009 are based on ratios from ABS 2006 Experimental Indigenous ERP data applied to population projections by SLA 2007–2027 (unpublished, produced for DoHA by ABS).

Table 13A.2 **Target population data, by location ('000) (a), (b), (c)**

--	-----	-----	-----	----	----	-----	-----	----	------

(f) For June 2011, DoHA Indigenous population projections were prepared from ABS 2006 Indigenous Experimental ERP data (at SLA level) projected forward so as to align with published ABS *Indigenous Experimental Estimates and Projections* (ABS cat no 3238.0, series B) at the state level. An Iterative Proportional Fitting technique was applied to align the projections with ABS Indigenous Experimental Estimates and Projections (ABS cat no 3238.0, series B) at Remoteness Area level. The Indigenous Estimated Resident Population at 30 June 2006 (ABS cat no 3238.0.55.001) was used to proportionally split the remoteness areas classification of Inner Regional/Outer Regional and Remote/Very Remote. The resulting projections of the Indigenous population were created by DoHA and are not ABS projections.

.. Not applicable. – Nil or rounded to zero.

Source: DoHA unpublished; Population projections by SLA for 2007–2027 prepared for DoHA by ABS according to assumptions agreed to by DoHA unpublished; Projections based on ABS experimental Indigenous ERPs by remoteness areas as at June 2006 (ABS Cat. no. 3238.0.55.001) DoHA unpublished; *ABS experimental estimates and projections, Aboriginal and Torres Strait Islander Australians*, 1991 to 2009 (ABS Cat. no. 3238.0); *Experimental estimates of Aboriginal and Torres Strait Islander Australians*, Jun 2006 (ABS Cat. no. 3238.0.55.001); Census 2006 data; ABS unpublished data sourced by DoHA.

(a) Recipient numbers in care is a distinct count of clients at any time in the 12 month period to 30 June 2011. Clients may have care under multiple types or states, so a client may be counted twice. Recipient numbers in care is a distinct count of clients at any time in the 12 month period to 30 June 2011. Population is people aged 70 years and over and Indigenous Australians aged 50-69 years at 30 June 2011, except for Veterans' Home Care where population is people aged 70 years and over.

Table 13A.4 **People receiving aged care services, 2010-11 (a), (b), (c)**

	Unit	NSW (d)	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
(b)	Data are presented at the program level only. Since an individual may receive services under more than one aged care program throughout the year, the number of unique individuals accessing aged care cannot be determined.									
(c)	State or territory is based on the location of the service provider outlet.									
(d)	The NSW data are provisional. Consequently, some assistance types are underreported for NSW and the level of underreporting may be substantial.									
(e)	Data for Indigenous people aged 50-69 years are published for HACC services only. Data for Indigenous people aged 50-69 years are not published separately for other programs, but are included in other disaggregations such as Remoteness of residence and Indigenous status. Age group data for other programs will therefore not add to state or Australian totals. Data for Indigenous persons aged 50-69 years are not available for Veterans' Home Care Services. Includes people aged 70 years and over only.									
(f)	Client age is calculated as at 30 June 2011 if the recipient is in care on that date, or at the date of their latest discharge during the reporting period if not.									
(g)	Remoteness category is based on location of service provider, except for the HACC program and Veterans' Home Care services where State or Territory is based on the location of the HACC Agency or service provider and the Remoteness Category is based on the postcode of the care recipient.									
(h)	Populations are derived as follows: Age Group: Total population within each age bracket by State/Territory. Indigenous Status, Indigenous: Total Indigenous population aged 50+ by State/Territory.. Indigenous Status, Non-Indigenous: Total non-Indigenous and not stated population aged 70+ by State/Territory.. Indigenous Status, Not Stated: Figures are not provided as population data is not available. Remoteness: Total Indigenous population aged 50+ and total non-Indigenous or not stated population aged 70+.									
(i)	Population estimates for people aged 90 years or over are not available, so rate per 1000 for 85 years of over supplied is based on sum of age groups 85 to 89 and 90 plus. The 90 years or over row will not contain data. na Not available. .. Not applicable. - Nil or rounded to zero. np Not published									
Source:	DoHA unpublished, Ageing and Aged Care data warehouse and HACC Minimum Data Set; DVA unpublished, Veterans' Home Care data; Population projections by SLA for 2007-2027 based on 2006 Census prepared for DOHA by ABS according to the assumptions agreed to by DOHA. For June 2011, DoHA Indigenous population projections were prepared from ABS Indigenous Experimental 2006 ERP data (at SLA level) projected forward so as to align with published ABS <i>Indigenous Experimental Estimates and Projections</i> (ABS cat no 3238.0, series B) at the state level. An Iterative Proportional Fitting technique was applied to align the projections with ABS <i>Indigenous Experimental Estimates and Projections</i> (ABS cat no 3238.0, series B) at Remoteness Area level. The Indigenous Estimated Resident Population at 30 June 2006 (ABS cat no 3238.0.55.001) was used to proportionally split the remoteness areas classification of Inner Regional/Outer Regional and Remote/Very Remote. The resulting projections of the Indigenous population were created by DoHA and are not ABS projections.

Table 13A.5 Government expenditure on aged care services, 2010-11 (\$ million)

	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Other (a)	Aust
(a)	Australian Government expenditure that cannot be attributed to individual states or territories.									
(b)	The objective of Aged Care Assessment is to provide comprehensive multidisciplinary assessment of needs of older people, including delegated authority to approve people for Australian Government subsidised care through residential aged care, Community Aged Care Packages and flexible care. Australian government funding is provided to State and Territory governments to operate Aged Care Assessment Teams (ACATs) and evaluation units.									
(c)	Totals may not add due to rounding.									
(d)	The DVA expenditure figures are subject to lag and may therefore be subject to revision.									
(e)	In Queensland, Enterprise Bargaining Agreement (EBA) expenditure includes all additional funding including depreciation provided for operations of State owned and operated Residential Aged Care Facilities. Rural Small Nursing Home Supplement expenditure is included with EBA supplement. In Tasmania, while it finances an EBA supplement to registered nursing staff it is not possible to quantify the amount of that supplement in relation to its aged care services as they are delivered in integrated settings and programs.									
(f)	The objective of Community Aged Care Packages (CACP) are to assist people with complex care needs who otherwise are eligible for low level residential care to remain in the community. Australian Government only funded.									
(g)	The objective of Extended Aged Care at Home (EACH) and EACH-Dementia is to provide high level care at home as an alternative to high level residential care. Australian Government only funded.									
(h)	Reports provisional HACCC data that have not been validated and may be subject to revision. Data are for expenditure under the HACCC Review Agreement only.									
(i)	DVA community nursing expenditure data are at 12 September 2011. Figures are subject to significant claiming lag and may therefore be subject to revision. These figures may also differ slightly from the figures published in the DVA annual report for this reason. DVA community nursing reported does not include an additional \$2.2 million, which was spent on wound management consumables. VHC expenditure data are as at 31 July 2011.									
(j)	The four year Long Stay Older Patient (LSOP) Initiative, established by COAG in 2006, was extended in 2010 for a further two years to 2011-12. The introduction of new arrangements for 2010-11 and 2011-12 resulted in jurisdictions receiving some 2010-11 funds after the end of that financial year. To ensure consistency across the life of the program all 2010-11 related expenditure has been shown against 2010-11. More details on the program are at box 13.4 of the Aged care services chapter.									
(k)	Queensland has noted that the amount of expenditure shown for LSOP for Queensland in 2010-11 represented the approved allocation, however only \$3.4 million of this allocation was actually provided by the Commonwealth in 2010-11. The remaining funding has been rolled-over into the 2011-12 financial year.									
(l)	Data relate to expenditure administered under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program which is aimed at providing quality, flexible, culturally appropriate aged care to older Aboriginal and Torres Strait Islander people close to their home and community.									
	na Not available. . . Not applicable. – Nil or rounded to zero.

2010-11	180	185	198	262	349	247	151	681	21	232

(a) Real dollars are previous years' expenditure in current year's dollars after basing expenditure on the ABS GDP price deflator 2010-11 = 100 (table AA.39).

(b) For Victoria, the first quarter payment for the multi-purpose service program for 2010-11 was pre-paid in 2009-10.

(c) Other expenditure is Australian Government expenditure that cannot be attributed to individual states or territories.

(d) The four year LSOP Initiative, established by COAG in 2006, was extended in 2010 for a further two years to 2011-12. The introduction of new arrangements for 2010-11 and 2011-12 resulted in jurisdictions receiving some 2010-11 funds after the end of that financial year. To ensure consistency across the life of the program all 2010-11 related expenditure has been shown against 2010-11. More details on the program are at box 13.4 of the Aged care services chapter.

(e) Queensland has noted that the amount of expenditure shown for LSOP for Queensland in 2010-11 represented the approved allocation however only \$3.4 million of this allocation was actually provided by the Commonwealth in 2010-11. The remaining funding has been rolled-over into the 2011-12 financial year.

(f) The objective of Day Therapy Centres is to assist older people to maintain or recover functional independence, through the provision of therapy services to allow them to remain in the community or in low level residential care. Funding is Australian Government only.

(g) The objective of the National Continence Program/Management Strategy is to improve continence awareness, management and treatment so that more Australians can live and participate in their community with confidence and dignity.

(h) Data relate to expenditure administered under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program which is aimed at providing quality, flexible, culturally appropriate aged care to older Aboriginal and Torres Strait islander people close to their home and community.

(a) Data include high care residential (permanent and respite), low care residential (permanent and respite), EACH packages, EACH-D packages and CACPs. Data for EACH-D packages prior to 2009 are included in EACH packages.

(b) Unknown responses have been attributed *pro rata*.

(c) Includes National Aboriginal and Torres Strait Islander Flexible Aged Care Program places attributed as residents. Excludes multi-purpose services.

(d) Indigenous population estimates based on ratios from unpublished ABS 2006 Indigenous ERP data applied to Population Projections by SLA 2007–2027. See table 13A.2 for further information.

(e) Totals may not add due to rounding.

(f) The ACT has a very small Indigenous population aged over 50 years and a small number of CACPs results in a very high provision ratio.

.. Not applicable. – Nil or rounded to zero.

Source: DoHA unpublished.

(a) Data include high care residential (permanent and respite), low care residential (permanent and respite), EACH packages, EACH-D packages and CACPs. Data for EACH-D packages prior to 2009 are included in EACH packages.

(b) Unknown responses have been attributed *pro rata*.

(c) Includes National Aboriginal and Torres Strait Islander Flexible Aged Care Program places attributed as residents. Excludes multi-purpose services.

(d) Geographical data are based on the ABS Australian Standard Geographic Classification of Remoteness Areas (RA) (see table 13A.2 note (a)). For more information refer to the *Australian Standard Geographic Classification* (ABS Publication 1216.0). The proportions of population in each Statistical Local Area (SLA) are attributed to Remoteness Areas (RA) by DoHA, using ABS SLA to RA concordance.

(e) Indigenous population estimates based on ratios from unpublished ABS 2006 Indigenous ERP data applied to Population Projections by SLA 2007–2027. See table 13A.2 for further information.

(f) Totals may not add due to rounding.

(g) The ACT has a very small Indigenous population aged over 50 years and a small number of CACPs will result in a very high provision ratio.

.. Not applicable. – Nil or rounded to zero.

Source: DoHA unpublished.

- (a) Geographical data are based on the ABS Australian Standard Geographic Classification of Remoteness Areas. Data are classified according to an index of remoteness which rates each ABS census district based on the number and size of towns, the distance to major towns and urban centres. For more information refer to the *Australian Standard Geographic Classification* (ABS Publication 1216.0). See notes to table 13A.2.
- (b) Data exclude flexible places under the National Aboriginal and Torres Strait Islander Flexible Aged Care Program, Innovative Pool programs, CDC places and care provided by Multi-Purpose services.
- (c) All permanent residents are included.
- (d) Indigenous population estimates are based on 30 June 2010 Indigenous projected population (ABS Cat. no. 3238.0, Series B). The Indigenous estimated resident population at 30 June 2006 (ABS Cat. no. 3238.0.55.001) was used to proportionally split the remoteness areas classification of Inner Regional/Outer Regional and Remote/Very Remote.
- (e) Where Indigenous status is unknown recipients are pro-rated at the remoteness area level. Where age is unknown recipients are excluded.

Table 13A.60

Table 13A.60 HACC client characteristics (a)

	Unit	NSW (b)	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
(b)	The NSW figures are based on provisional data. Consequently, some assistance types are underreported for NSW and the level of underreporting may be substantial.									
(c)	The proportion of HACC clients with date of birth unknown differed across jurisdictions and years.									
(d)	The proportion of HACC clients with unknown gender differed across jurisdictions and years.									
(e)	The proportion of HACC clients with unknown Indigenous status differed across jurisdictions and years.									
(f)	The proportion of HACC clients with unknown language spoken at home differed across jurisdictions and years.									
(g)	The proportion of HACC clients with unknown carer status differed across jurisdictions and years.									
(h)	The proportion of HACC funded agencies that submitted HACC MDS data 2010-11 differed across jurisdictions and ranged from 94 per cent and 100 per cent. Actual client numbers will be higher than those reported here.									

– Nil or rounded to zero.

(a) Reports provisional data that have not been validated and may be subject to revision.

(b) The proportion of HACC clients with unknown or null Indigenous status differed across jurisdictions and years. In 2010-11, the proportion ranged from 4.8 per cent to 9.6 per cent. Nationally, the proportion of HACC clients with unknown or null Indigenous status was 7.1 per cent.

(c) The proportion of HACC clients with unknown date of birth differed across jurisdictions and years.

(d) Rounding of proportions may result in age cohorts not summing to the total aggregate proportion.

(e) Calculations include HACC clients with unknown or null Indigenous Status.

– Nil or rounded to zero.

Source: DoHA unpublished, HACC Minimum Data Set (various years).

(a) Reports provisional data that have not been validated and may be subject to revision.

(b) Population projections by SLA for 2007-2027 prepared by ABS according to assumptions agreed to by DoHA. Indigenous population estimates for June 2010 are based on ratios from ABS 2006 Experimental Indigenous ERP data applied to Population Projections by SLA 2007–2027.

(c) The proportion of HACC clients with unknown or null Indigenous status differed across jurisdictions and years. In 2010-11, the proportion ranged from 4.8 per cent to 9.6 per cent. Nationally, the proportion of HACC clients with unknown or null Indigenous status was 7.1 per cent.

(d) The proportion of HACC clients with unknown or invalid date of birth differed across jurisdictions and years. In 2010-11, it ranged from 0.1 per cent to 3.6 per cent. Nationally, the proportion of HACC clients with unknown or invalid Date of Birth was 0.2 per cent.

(e) The proportion of HACC clients with Nil and Not stated gender differed across jurisdictions and years.

(f) The proportion of HACC clients with Nil and Not stated main language spoken at home differed across jurisdictions and years.

(g) The proportion of HACC clients with Nil and Not stated pension benefit status differed across jurisdictions and years.

(h) The proportion of HACC clients with Nil and Not stated living arrangements differed across jurisdictions and years.

(i) The proportion of HACC clients with Nil and Not stated carer availability differed across jurisdictions and years.

– Nil or rounded to zero.

- (a) Data in this table includes complete assessments only for years after 2006-07. For previous years the following information applies: in May 2003 a new Minimum Data Set (MDSv2) was introduced for the Aged Care Assessment Program. With the exception of Queensland and about half of NSW, it had been adopted by states and territories when data shown in this table was collected. The data in this table has been selected to match MDSv1 and MDSv2 coding and to be comparable as closely as possible with previous reports containing MDSv1 data. Includes only assessments (completed and not completed) for the stated client group. (Some assessments are not completed because, for example, the client's circumstances may change or the client may withdraw mid-way through the assessment process. Separate counting of completed and not completed assessments has been introduced over time with the adoption of the MDSv2).
- (b) The number of Indigenous assessments is based on self-identification of Indigenous status. Therefore these figures may not accurately represent the assessment of Indigenous persons.

Table 13A.64 **Aged care assessments (a), (b)**

	<i>NSW (c)</i>	<i>Vic</i>	<i>Qld (d)</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
--	----------------	------------	----------------	-----------	-----------	------------	------------	-----------	-------------

(c) Data for NSW in the Ageing and Aged Care Data Warehouse includes an unknown number of duplicate records created by a range of database changes and Aged Care Assessment Team amalgamations undertaken by the NSW Government. This has a flow-on effect on the national figures.

(d) The total number of assessments for Queensland in 2005-06 is underestimated by approximately 2000 due to technical failure.

(a) Data disaggregation by remoteness and Socio-Economic Indexes for Areas (SEIFA) based on the ABS Index of Relative Socio-economic Disadvantage (IRSD) are by place of usual residence of the client. As disaggregation by State for the Age and Indigenous tables is based on the location of the Aged Care Assessment Team, the State totals of these tables will not match.

(b) Includes non-Indigenous people and those for whom Indigenous status was not stated.

(c) Socio-Economic Indexes for Areas (SEIFA) quintiles are based on the ABS Index of Relative Socio-economic Disadvantage (IRSD), with quintile 1 being the most disadvantaged and quintile 5 being the least disadvantaged. The SEIFA quintiles represent approximately 20 per cent of the national population, but do not necessarily represent 20 per cent of the population in each State or Territory.

(d) Rate is expressed as number of people in the nominated age group who have had an Aged Care Assessment Team (ACAT) assessment in that State, Territory or nationally, per 1000 people in that age group in that state, territory or nationally.

(e) Relevant population is people aged 70 years or over and Indigenous people aged 50–69 years.

Table 13A.66 **Aged care assessments completed under the ACAP for people of all ages (a)**

	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
--	-----	-----	-----	----	----	-----	-----	----	------

(f) In the ACT, includes Quintile 1 as numbers are too small to appear separately.

(g) Data for NSW and SA in the Ageing and Aged Care Data Warehouse includes an unknown number of duplicate records created by a range of database changes and/or Aged Care Assessment Team amalgamations undertaken by the respective state governments. This has a flow-on effect on the national figures.

.. Not applicable. – Nil or rounded to zero. **np** Not published.

Source: DoHA (unpublished) Ageing and Aged Care data warehouse; Population projections by SLA for 2007–2027 based on 2006 Census prepared for DOHA by ABS according to the assumptions agreed to by DOHA. For June 2011, DoHA Indigenous population projections were prepared from ABS Indigenous Experimental 2006 ERP data (at SLA level) projected forward so as to align with published ABS Indigenous Experimental Estimates and Projections (ABS cat no 3238.0, series B) at the state level. An Iterative Proportional Fitting technique was applied to align the projections with ABS Indigenous Experimental Estimates and Projections (ABS cat no 3238.0, series B) at Remote/Very Remote level. The Indigenous Estimated Resident Population at 30 June 2006 (ABS cat no 3238.0.55.001) was used to proportionally split the remoteness areas classification of Inner Regional/Outer Regional and Remote/Very Remote. The resulting projections of the Indigenous population were created by DoHA and are not ABS projections.

(a) Data for Tasmania and ACT should be interpreted with caution until further assessment of Indigenous identification is completed. The Australian totals for Indigenous/Other Australians do not include data for the ACT or Tasmania.

(b) 'Other Australians' includes non-Indigenous people and those for whom Indigenous status was not stated.

(c) Disaggregation by remoteness area is by usual residence, not remoteness of hospital. Separations are reported by jurisdiction of hospital, regardless of the jurisdiction of usual residence. Hence, rates represent the number of patient days for patients living in each remoteness area (regardless of their jurisdiction of usual residence) divided by the total number of patient days for patients living in that remoteness area and hospitalised in the reporting jurisdiction.

--	-----	-----	-----	----	----	-----	-----	----	------

(d) SEIFA quintiles are based on the ABS Index of Relative Socio-economic Disadvantage (IRSD), with quintile 1 being the most disadvantaged and quintile 5 being the least disadvantaged. The SEIFA quintiles represent approximately 20 per cent of the national population, but do not necessarily represent 20 per cent of the population in each state or territory. Disaggregation by SEIFA area is by usual residence, not location of the hospital. Patient days are reported by jurisdiction of hospitalisation, regardless of the jurisdiction of residence. Hence, rates represent the number of patient days for patients living in each SEIFA quintile (regardless of their jurisdiction of usual residence) divided by the total number of patient days for patients living in that SEIFA quintile and hospitalised in the reporting jurisdiction.

(e) Total includes separations for which a SEIFA category or remoteness area could not be assigned/mapped as the place of residence was not known or not stated.

(f) Data for Tasmania does not include two private hospitals that account for approximately one eighth of Tasmania's total hospital separations.

(g) Cells have been suppressed to protect confidentiality where the presentation could identify a patient or service provider or where rates are likely to be highly volatile, for example, where the denominator is very small. See the Data Quality Statement for further details.

Table 13A.72

Table 13A.72 Falls resulting in patient harm in residential aged care and treated in hospital (a)

	Unit							Aust
	NSW	Vic	Qld	WA	SA	Tas	ACT	NT
(a)	Refers to the number of hospital separations involving one or more falls in an aged care facility, not the number of falls. Cells have been suppressed to protect confidentiality where the presentation could identify a patient or service provider or where rates are likely to be highly volatile, for example, where the denominator is very small. See the Data Quality Information for further details.							
(b)	Data for Tasmania and ACT should be interpreted with caution until further assessment of Indigenous identification is completed. The Australian totals for Indigenous/Other Australians do not include data for the ACT, Tasmania and NT (private hospitals only). 'Other Australians' includes separations for non-Indigenous people and those for whom Indigenous status was not stated.							
(c)	Disaggregation by remoteness area is by usual residence (numerator) and client postcode prior to admission to residential aged care (denominator), not remoteness of hospital. Separations are reported by jurisdiction of hospitalisation, regardless of the jurisdiction of usual residence or residential aged care facility. Hence, rates represent the number of separations for patients living in each remoteness area (regardless of their jurisdiction of usual residence) divided by the total number of resident occupied place days for clients resident in aged care facilities in the reporting jurisdiction and living in that remoteness area prior to admission to the aged care facility.							
(d)	SEIFA quintiles are based on the ABS Index of Relative Socio-economic Disadvantage (IRSD), with quintile 1 being the most disadvantaged and quintile 5 being the least disadvantaged. The SEIFA quintiles represent approximately 20 per cent of the national population, but do not necessarily represent 20 per cent of the population in each State or Territory. Disaggregation by SEIFA is based on the patient's usual residence (numerator) and client postcode prior to admission to residential aged care (denominator), not the location of the hospital or residential aged care facility. Hence, rates represent the number of separations for patients living in each SEIFA quintile regardless of their jurisdiction of usual residence) divided by the total number of resident occupied place days for clients resident in aged care facilities in the reporting jurisdiction and living in that SEIFA quintile prior to admission to the aged care facility.							
(e)	Total includes separations for which place of residence was not known or not stated.							
(f)	Data for Tasmania does not include two private hospitals that account for approximately one eighth of Tasmania's total hospital separations.
