

4A School education — attachment

Definitions for the indicators and descriptors in this attachment are in section 4.6 of the chapter. Data in this Report are examined by the School Education Working Group, but have not been formally audited by the Secretariat. Unsourced information was obtained from the Australian, State and Territory governments.

This file is available in Adobe PDF format on the Review web page (www.pc.gov.au/gsp). Users without Internet access can contact the Secretariat to obtain these tables (details on the inside front cover of the Report).

FTE = Full time equivalent.

(a) Historic data may be different to those published in previous Reports and other publications due to the ABS subsequently revising data.

(b) Data for combined and special schools in WA, SA, Tasmania and the ACT are not published separately for 2004 and 2005 due to the small number of schools in those categories. Australia totals are correct for both the combined and special school categories.

(c) FTE staff. Primary and secondary staff are defined as staff who usually spend the majority of their time engaged in duties at one or more schools (excluding cleaners and emergency and casual relief staff). Staff not active in schools are staff who usually spend the majority of their time engaged in duties outside schools. Totals may not add as a result of rounding.

FTE = Full time equivalent.

(a) Historic data may be different to those published in previous Reports and other publications due to the ABS subsequently revising data.

(b) Data for combined and special schools in WA, SA, Tasmania and the ACT are not published separately in 2004 and 2005 due to the small number of schools in those categories. Australia totals are correct for both the combined and special school categories.

(c) FTE staff. Primary and secondary staff are defined as staff who usually spend the majority of their time engaged in duties at one or more schools (excluding cleaners and emergency and casual relief staff). Staff not active in schools are staff who usually spend the majority of their time engaged in duties outside schools. Totals may not add as a result of rounding.

FTE = Full time equivalent.

(a) Historic data may be different to those published in previous Reports and other publications due to the ABS subsequently revising data.

(b) Data for combined and special schools in WA, SA, Tasmania and the ACT are not published separately in 2004 and 2005 due to the small number of schools in those categories. Australia totals are correct for both the combined and special school categories.

(c) FTE staff. Primary and secondary staff are defined as staff who usually spend the majority of their time engaged in duties at one or more schools (excluding cleaners and emergency and casual relief staff). Staff not active in schools are staff who usually spend the majority of their time engaged in duties outside schools. Totals may not add as a result of rounding.

(a) This table integrates information from tables 4A.11 and 4A.12, and State and Territory data. Some data include capital amounts and exclude user cost of capital (UCC), as labelled, for the purpose of comparison to previous years' reporting. Where it is stated the UCC is included, this relates to government school expenditure only. Depreciation and user cost of capital expenses relating to government schools have been attributed to States/Territories based on ownership of the underlying assets. A portion of these assets will have been acquired through Australian Government capital contributions, with States and Territories responsible for maintenance costs. Australian Government expenditure data in this table include only Australian Government specific purpose payments. Other Australian Government funding for schools and students is not included.

(b) See table 4A.7 for explanations on the derivation of these figures.

(c) Includes Australian, State and Territory government expenditure on government schools, Australian Government specific purpose payments for non-government schools, and state and territory payments to non-government schools.

(d) Real dollars are previous years expenditure in current years dollars after basing expenditure on the ABS GDP price deflator 2005-06 = 100 (table AA.26).

(e) Figures are derived by dividing Australian, State and Territory government expenditure on non-government schools by average student population data in table 4A.6.

(f) Includes recurrent, targeted and Indigenous program expenditure.

(g) Derived by subtracting Australian Government specific purpose payments for government schools from Australian, State and Territory government expenditure on government schools.

Table 4A.11

Table 4A.11 Australian Government specific purpose payments for schools, 2006-07 (a)

	Unit	NSW	Vic	Qld	WA	SA	Tas	ACT	NT	Aust
--	------	-----	-----	-----	----	----	-----	-----	----	------

(a) Data include actual payments provided under the *States Grants (Primary and Secondary Assistance) Act 2000* and the *Indigenous Education (Targeted Assistance) Act 2000*. Additional Australian Government funding is provided through annual appropriations and non-programme items. Figures reported are based on accrual expenditure.

(b) From 2004-05, the non-government element of the IESIP programme is no longer classified as an SPP, but has been included here for consistency with earlier Reports.

(c) Includes total recurrent expenditure on government schools, non-government schools and joint programs.

– Nil or rounded to zero.

Source: Department of Education, Employment and Workplace Relations (DEEWR) (unpublished).

FTE = Full time equivalent

- (a) Accrual accounting figures used. Accounting treatments for some items differ between jurisdictions as outlined in table 4A.14.
- (b) Expenditure on special schools is allocated to either primary or secondary schools.
- (c) Expenditure specifically excludes: Australian Government payments to students; expenses on sessional preschools and TAFE; private funds (for example, funds raised by schools, school councils or community organisations); and the provision of staff accommodation.
- (d) Expenditure specifically includes: Australian Government grants for education; expenditure by other state and territory government agencies on behalf of education departments; expenditure for Australian Government joint programs apportioned to government schools; staff allowances for accommodation and notional payroll tax for WA and the ACT, which are payroll tax exempt.
- (e) Includes redundancy payments.
- (f) Includes grants and subsidies.
- (g) A notional user cost of capital based on 8 per cent of total written down value of capital assets as at 30 June is applied to data for all jurisdictions.
- (h) Australian, State and Territory government recurrent expenditure on government schools, divided by two year average FTE student population (table 4A.6).
– Nil or rounded to zero.

(a) Table 4A.14 contains information on the treatment of assets.

(b) The value of capital stock is consistent with the written down value treatment of capital assets from 2000.

(c) The written down value (WDV) of capital assets = gross value of capital assets less accumulated depreciation. (Less Public Private Leaseholds for NSW only).

(d) Depreciation costs align with MCEETYA treatment.

(e) In Victoria, heritage and cultural components are not considered as valuations are on the basis of replacement value. The annual depreciation charge consists of depreciation on buildings and leasehold improvements, plant and equipment.

	NSW	Vic	Qld	WA	SA	Tas	ACT	NT
--	-----	-----	-----	----	----	-----	-----	----

(a) Market value (MV) is the current (net) value market selling price or exchange value; deprival value may be either the depreciated replacement cost of an asset of a similar service potential or the stream of its future economic benefits. DRC = the depreciated replacement cost; CV = the current value; MV = the current (net) value, market selling price or exchange value; and deprival value may be either the DRC of an asset of a similar service potential or the stream of its future economic benefits.

(b) Estimated as 1/depreciation rate.

(c) Asset lives for some assets have been grouped with other classifications.

(d) For some jurisdictions, office equipment includes furniture and fittings.

(e) For some jurisdictions, other equipment includes information technology.

(a) Efficiency indicators in this chapter are adjusted for differences in payroll tax and notional UCC.

(b) Umbrella department costs are apportioned according to: use (including enrolment) in Victoria; cost drivers (mainly student numbers) in Queensland; activity-based costing in the ACT; and pro rata costs based on expenditure in the NT.

(c) Education departments in WA and the ACT are exempt from payroll tax.

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA</i>	<i>Tas</i>	<i>ACT</i>	<i>NT</i>	<i>Aust</i>
(b) Teaching staff have teaching duties (that is, they are engaged to impart the school curriculum) and spend the majority of their time in contact with students, and support students, either by direct class contact or on an individual basis. Teaching staff include principals, deputy principals and senior teachers mainly involved in administrative duties, but not specialist support staff (who, although they may spend the majority of their time in contact with students, are not engaged directly to impart the school curriculum).									
(c) Non-teaching staff generally perform their duties in one or more schools/Australian educational establishments as specialist support staff; administrative and clerical staff (including teacher aides and assistants) mainly performing general administrative and clerical duties; and building operations, general maintenance and other staff (including staff providing associated technical services and janitorial staff).									
(d) The ratio of 'FTE students to FTE non-teaching in school staff' needs to be interpreted with care because it can be affected by: <ul style="list-style-type: none"> • the amount of administrative work undertaken by staff nominally classified as teachers (such as principals, assistant principals and senior teachers) • the proportion of administrative work undertaken outside the school (because administrative tasks such as personnel management are centralised in some jurisdictions but undertaken at the school level in others) • the extent to which technology is applied to teaching, learning and school administration • the extent to which there are support staff in the classroom setting and whether these staff are classified as teaching or non-teaching • the degree to which schools contract out services. 									
(e) School staff include all teaching staff and those non-teaching staff who spend more than half their time actively engaged in one or more schools (excluding cleaners and emergency and casual relief staff).

(a) Data are based on full time equivalent students.

(b) Special schools are excluded from the calculations.

(c) Combined schools comprise both primary and secondary students. The student numbers for combined schools are estimated as the sums of the midpoints of their respective primary and secondary categories in the cross tabulated classification of the NSSC.

– Nil or rounded to zero.

- (a) Number of LBOTE students and number of all students. Absolute numbers of LBOTE students are sourced from the 2006 Census of Population and Housing, whilst data on all full time students are sourced from the ABS Schools Australia collection.
- (b) The number of students from a language background other than English in each state/territory in government schools, in non-government schools and in total, as a percentage of the total number of students in each state/territory in government schools, in non-government schools and in total. The 2006 data excludes students counted in the external territories.
- (c) Based on the numbers of students who fall into categories related to: home language (non-English or English); country of birth of student (non-English or English speaking country); and country of birth of one or both parents (non-English speaking country). Data include Indigenous students whose home language is not English.
- (d) The DEEWR definition of students from a non-English speaking background is one used for allocating an element of Australian Government targeted program funds. It may not be the same as definitions adopted by individual jurisdictions. Further allocation of Commonwealth LBOTE funding will not be necessarily based on the 2006 data shown in this table.
- (e) There have been some changes to the data collected in the 1996 and 2001 Censuses. Data may not be strictly comparable between these two years.

na Not available.

Source: DEEWR (unpublished) based on the ABS (1996, 2001, 2006) Census of Population and Housing.

	All schools	%	4.9	4.3	3.4	2.9	7.0	4.1	3.6	10.0	4.4

(a) To be an eligible student with disabilities, the student (among other things) must satisfy the criteria for enrolment in special education services or special education programs provided by the government of the state or territory in which the student resides. Data should be used with caution as these criteria vary across jurisdictions, for example, SA data include a large number of students in the communication and language impairment category. This subset of students is not counted by other States/Territories under funded students with disabilities. Other States/Territories fund these students with other specific programs.

(b) The 'funded' student data used by DEEWR, refers to the FTE number of students that qualify for DEEWR recurrent funding. This excludes Full Fee Paying Overseas students from both the government and non-government sectors as well as a number of schools in the NT (these are funded through the Grants Commission process), and on Christmas and Cocos Islands (funded through the Department of Transport and Regional Services). The DEEWR funded figures also include Pre Year 1 students in part time programmes in Queensland schools.

(c) The ABS total student data refers to full time students.

(a) Geographic categorisation is based on the agreed MCEETYA Geographic Location Classification. See section 4.6 of the chapter for definitions.

(b) Calculated as the number of students attending a particular type of school (such as government primary school) in a particular geographic classification (such as metropolitan zone), divided by the total number of students attending that type of school.

(c) FTE students.

.. Not applicable. – Nil or rounded to zero.

(a) The achievement percentages reported in this table include 95 per cent confidence intervals (for example, 80.0 per cent ± 2.7 per cent). Table 4A.32 contains details of test populations in all states and territories.

(b) Students who were absent or withdrawn from testing are not classified as assessed students and are not included in the benchmark calculations. The proportion of absent and withdrawn students varies across jurisdictions, as shown in table 4A.33. Readers are urged to be cautious when comparing results.

(c) Some movements in the results over time might have occurred as a result of state equating processes and may not reflect improvements in student performance.

(d) The typical average age of students at the time of testing (expressed in years and months).

(e) The typical average time that students had spent in schooling at the time of testing (expressed in years and months).

(f) The methods used to identify Indigenous students and LBOTE students varied across jurisdictions. The two categories are not mutually exclusive. Definitions can be found at section 4.6. Table 4A.33 contains more information.

(a) The percentage of students from government and non-government schools respectively who were assessed includes exempted students but not students absent or withdrawn by parents/caregivers from the testing and not students attending schools which did not participate in the testing at all. The figure is calculated as a percentage of the total number of full time government and non-government students respectively based on data from the NSSC.

(b) The percentages of assessed students who were government and non-government school students respectively.

(a) The percentage of students who were exempted, and absent or who were withdrawn by parents/caregivers, from the testing program. Exempted students are reported as not achieving the benchmark. Absent and withdrawn students are not included in the benchmark calculations. The percentage of exempted, and absent or withdrawn, students is calculated as a percentage of the total number of full time government students based on NSSC data, together with the non-government students who participated in the relevant testing programs.

(b) The percentage of assessed Indigenous and LBOTE students respectively. The percentages of Indigenous and LBOTE students include exempted students and are calculated as a percentage of the total number of full time government students based on data from the NSSC and non-government students who participated in the relevant testing programs. The specific ways in which Indigenous and LBOTE student information was collected and/or categorised varied across jurisdictions.

(c) NSSC figures have been used for the total number of students in calculation of the participation rates. In the NT, students are tested at years 3, 5 and 7 in urban schools. In remote schools, students are tested at ages 8, 10 and 12, not at year level. This may result in percentages for NT not adding to 100.

Australia	93.7 ± 1.2	93.3 ± 1.2	94.1 ± 1.3	79.2 ± 4.1	92.3 ± 1.2

(a) The achievement percentages reported in this table include 95 per cent confidence intervals, for example, 80.0 per cent ± 2.7 per cent).

(b) Students who were absent or withdrawn from testing were not classified as assessed students and are not included in the benchmark calculations. The proportion of absent and withdrawn students varies across jurisdictions, as shown in table 4A.43. Readers are urged to be cautious when comparing results.

(c) Some movements in the results over time might have occurred because of State/Territory equating processes, and may not reflect actual improvements in student performance.

(d) The typical average age of students at the time of testing, expressed in years and months.

(e) The typical average time students had spent in schooling at the time of testing, expressed in years and months.

(f) The methods used to identify Indigenous students with a language background other than English (LBOTE) varied between jurisdictions, as outlined in the explanatory notes.

Tasmania 1. 13yrs 1mth 2. 7yrs 7mths	80.9 ± 1.3	79.1 ± 1.7	82.6 ± 1.6	67.9 ± 5.0	70.6 ± 6.1
ACT 1. 12yrs 10mths 2. 7yrs 6mths	87.7 ± 1.1	87.0 ± 1.6	88.5 ± 1.5	65.0 ± 10.8	76.3 ± 5.7
NT 1. 12yrs 8mths 2. 7yrs 3mths	66.1 ± 2.1	66.6 ± 3.0	65.5 ± 2.7	26.8 ± 3.7	30.9 ± 4.0
Australia	82.1 ± 0.8	81.9 ± 0.9	82.3 ± 0.9	51.9 ± 2.8	77.9 ± 1.3

- (a) The achievement percentages reported in this table include 95 per cent confidence intervals, for example, 80 per cent ± 2.7 per cent.
- (b) Students who were absent or withdrawn from testing are not classified as assessed students and are not included in the benchmark calculations. The proportion of absent and withdrawn students varies considerably across jurisdictions as shown in table 4A.43. Readers are urged to be cautious when comparing results.
- (c) Some of the movements in the results over time may have occurred because of State/Territory equating processes, and may not reflect actual improvements in student performance.
- (d) The typical average age of students at the time of testing, expressed in years and months.
- (e) The typical average time that students had spent in schooling at the time of testing, expressed in years and months.
- (f) The methods used to identify Indigenous students and language background other than English (LBOTE) students varied across jurisdictions.
- (g) NSW considers that the year 7 results for NSW are anomalous. The national numeracy benchmark results show that:

Table 4A.41 Proportion of year 7 students who achieved the numeracy benchmark, 2004 (per cent) (a), (b), (c)

1 Average age (d)		Male	Female	Indigenous	LBOTE
2 Years of schooling (e)	All students	students	students	students (f)	students (f)

(i) a lower proportion of year 7 students are meeting the minimum numeracy benchmark than are meeting the reading and writing benchmarks

(ii) a lower proportion of students are meeting the numeracy benchmark in year 7 than in year 3 and year 5.

National benchmarks represent the minimum standard of performance a student must achieve to be able to progress through his/her schooling. The national benchmark results show that NSW students in years 3 and 5 are consistently performing at or above the national average for reading, writing and numeracy. The NSW results for year 7 reading and writing are also fairly consistent with the national average.

Aust	94.7	95.0	93.7	95.8	96.1	95.9	71.3	70.9	65.3	28.7	29.1	34.7

(a) The percentage of students from government and non-government schools respectively who were assessed includes exempted students but not students absent or withdrawn by parents/caregivers from the testing and not students attending schools which did not participate in the testing at all. The figure is calculated as a percentage of the total number of full time government and non-government students respectively based on data from the NSSC.

(b) The percentages of assessed students who were government and non-government school students respectively.

Aust	1.7	1.6	1.1	4.8	4.6	5.5	4.2	4.1	4.1	17.3	16.9	16.2	95.0	95.3	93.7

(a) The percentage of students who were exempted, and absent or who were withdrawn by parents/caregivers, from the testing program. Exempted students are reported as not achieving the benchmark. Absent and withdrawn students are not included in the benchmark calculations. The percentage of exempted, and absent or withdrawn, students is calculated as a percentage of the total number of full time government students based on NSSC data, together with the non-government students who participated in the relevant testing programs.

(b) The percentage of assessed Indigenous and LBOTE students respectively. The percentages of Indigenous and LBOTE students include exempted students and are calculated as a percentage of the total number of full time government students based on data from the NSSC and non-government students who participated in the relevant testing programs. The specific ways in which Indigenous and LBOTE student information was collected and/or categorised varied across jurisdictions.

(c) NSSC figures have been used for the total number of students in calculation of the participation rates. In the NT, students are tested at year 3, 5, and 7 in urban schools. In remote schools, students are tested ages 8, 10 and 12, not at year level. This may result in percentages for NT not adding to 100.

(a) The percentage of students from government and non-government schools respectively who were assessed includes exempted students but not students absent or withdrawn by parents/caregivers from the testing and not students attending schools which did not participate in the testing at all. The figure is calculated as a percentage of the total number of full time government and non-government students respectively based on data from the NSSC.

(b) The percentages of assessed students who were government and non-government school students respectively.

(a) The percentage of students who were exempted, and absent or who were withdrawn by parents/caregivers, from the testing program. Exempted students are reported as not achieving the benchmark. Absent and withdrawn students are not included in the benchmark calculations. The percentage of exempted, and absent or withdrawn, students is calculated as a percentage of the total number of full time government students based on NSSC data, together with the non-government students who participated in the relevant testing programs.

(b) The percentage of assessed Indigenous and LBOTE students respectively. The percentages of Indigenous and LBOTE students include exempted students and are calculated as a percentage of the total number of full time government students based on data from the NSSC and non-government students who participated in the relevant testing programs. The specific ways in which Indigenous and LBOTE student information was collected and/or categorised varied across jurisdictions.

(c) NSSC figures have been used for the total number of students in calculation of the participation rates. In the NT, students are tested at year 3, 5, and 7 in urban schools. In remote schools, students are tested ages 8, 10 and 12, not at year level. This may result in percentages for NT not adding to 100.

- (a) The achievement percentages reported in this table include 95 per cent confidence intervals, for example, 80.0 per cent ± 2.7 per cent).
- (b) Students who were absent or withdrawn from testing are not classified as assessed students and are not included in the benchmark calculations. The proportion of absent and withdrawn students varies across jurisdictions, as shown in table 4A.55. Readers are urged to be cautious when comparing results.
- (c) Some movements in the results over time might have occurred because of State/Territory equating processes, and may not reflect actual improvements in student performance.
- (d) The typical average age of students at the time of testing, expressed in years and months.
- (e) The typical average time students had spent in schooling at the time of testing, expressed in years and months.
- (f) The methods used to identify Indigenous students with a language background other than English (LBOTE) varied between jurisdictions, as outlined in the explanatory notes.
- (g) Victoria has advised that the increase in 2005 (and 2004) in the percentage of students reaching the Writing benchmark in Victoria was due to changes in the marking instructions.

(a) The percentage of students from government and non-government schools respectively who were assessed includes exempted students but not students absent or withdrawn by parents/caregivers from the testing and not students attending schools which did not participate in the testing at all. The figure is calculated as a percentage of the total number of full time government and non-government students respectively based on data from the NSSC.

(b) The percentages of assessed students who were government and non-government school students respectively.

(a) The percentage of students who were exempted, and absent or who were withdrawn by parents/caregivers, from the testing program. Exempted students are reported as not achieving the benchmark. Absent and withdrawn students are not included in the benchmark calculations. The percentage of exempted, and absent or withdrawn, students is calculated as a percentage of the total number of full time government students based on NSSC data, together with the non-government students who participated in the relevant testing programs.

(b) The percentage of assessed Indigenous and LBOTE students respectively. The percentages of Indigenous and LBOTE students include exempted students and are calculated as a percentage of the total number of full time government students based on data from the NSSC and non-government students who participated in the relevant testing programs. The specific ways in which Indigenous and LBOTE student information was collected and/or categorised varied across jurisdictions.

(c) NSSC figures have been used for the total number of students in calculation of the participation rates. In the NT, students are tested at year 3, 5, and 7 in urban schools. In remote schools, students are tested ages 8, 10 and 12, not at year level. This may result in percentages for NT not adding to 100.

Australia	81.8 ± 0.9	81.6 ± 0.9	82.0 ± 1.0	48.8 ± 2.9	78.8 ± 1.3

- (a) The achievement percentages reported in this table include 95 per cent confidence intervals, for example, 80 per cent ± 2.7 per cent.
- (b) Students who were absent or withdrawn from testing are not classified as assessed students and are not included in the benchmark calculations. The proportion of absent and withdrawn students varies considerably across jurisdictions as shown in table 4A.61. Readers are urged to be cautious when comparing results.
- (c) Some of the movements in the results over time may have occurred because of State/Territory equating processes, and may not reflect actual improvements in student performance.
- (d) The typical average age of students at the time of testing, expressed in years and months.
- (e) The typical average time that students had spent in schooling at the time of testing, expressed in years and months.
- (f) The methods used to identify Indigenous students and language background other than English (LBOTE) students varied across jurisdictions.
- (g) NSW considers that the year 7 results for NSW are anomalous. The national numeracy benchmark results show that:

Table 4A.58 Proportion of year 7 students who achieved the numeracy benchmark, 2005 (per cent) (a), (b), (c)

1 Average age (d)		Male	Female	Indigenous	LBOTE
2 Years of schooling (e)	All students	students	students	students (f)	students (f)

(i) a lower proportion of year 7 students are meeting the minimum numeracy benchmark than are meeting the reading and writing benchmarks

(ii) a lower proportion of students are meeting the numeracy benchmark in year 7 than in year 3 and year 5.

National benchmarks represent the minimum standard of performance a student must achieve to be able to progress through his/her schooling. The national benchmark results show that NSW students in years 3 and 5 are consistently performing at or above the national average for reading, writing and numeracy. The NSW results for year 7 reading and writing are also fairly consistent with the national average.

(a) The percentage of students who were exempted, and absent or who were withdrawn by parents/caregivers, from the testing program. Exempted students are reported as not achieving the benchmark. Absent and withdrawn students are not included in the benchmark calculations. The percentage of exempted, and absent or withdrawn, students is calculated as a percentage of the total number of full time government students based on NSSC data, together with the non-government students who participated in the relevant testing programs.

(b) The percentage of assessed Indigenous and LBOTE students respectively. The percentages of Indigenous and LBOTE students include exempted students and are calculated as a percentage of the total number of full time government students based on data from the NSSC and non-government students who participated in the relevant testing programs. The specific ways in which Indigenous and LBOTE student information was collected and/or categorised varied across jurisdictions.

(c) NSSC figures have been used for the total number of students in calculation of the participation rates. In the NT, students are tested at year 3, 5, and 7 in urban schools. In remote schools, students are tested ages 8, 10 and 12, not at year level. This may result in percentages for NT not adding to 100.

- (a) The achievement percentages reported in this table include 95 per cent confidence intervals (for example, 80.0 per cent ± 2.7 per cent).
- (b) Students who were absent or withdrawn from testing are not classified as assessed students and are not included in the benchmark calculations. The proportion of absent and withdrawn students varies across jurisdictions, as shown in table 4A.67. Readers are urged to be cautious when comparing results.
- (c) Revised definitions and standards for the collection and reporting of student socioeconomic background information (sex, Indigenous status, socioeconomic background and language background) were introduced in 2005 through the school enrolment processes for all schools to ensure greater national consistency in reporting against characteristics from 2006.
- (d) The typical average age of students at the time of testing, expressed in years and months.
- (e) The typical average time students had spent in schooling at the time of testing, expressed in years and months.
- (f) The methods used to identify Indigenous students and students with a LBOTE varied across jurisdictions.

(a) The percentage of students from government and non-government schools respectively who were assessed includes exempted students but not students absent or withdrawn by parents/caregivers from the testing and not students attending schools which did not participate in the testing at all. The figure is calculated as a percentage of the total number of full time government and non-government students respectively based on data from the NSSC.

(b) The percentages of assessed students who were government and non-government school students respectively.

(a) The percentage of students who were exempted, and absent or who were withdrawn by parents/caregivers, from the testing program. Exempted students are reported as not achieving the benchmark. Absent and withdrawn students are not included in the benchmark calculations. The percentage of exempted, and absent or withdrawn, students is calculated as a percentage of the total number of full time government students based on NSSC data, together with the non-government students who participated in the relevant testing programs.

(b) The percentage of assessed Indigenous and LBOTE students respectively. The percentages of Indigenous and LBOTE students include exempted students and are calculated as a percentage of the total number of full time government students based on data from the NSSC and non-government students who participated in the relevant testing programs. The specific ways in which Indigenous and LBOTE student information was collected and/or categorised varied across jurisdictions.

(c) NSSC figures have been used for the total number of students in calculation of the participation rates. In the NT, students are tested at year 3, 5, and 7 in urban schools. In remote Indigenous community schools, students are tested ages 8, 10 and 12, not at year level. This may result in percentages for NT not adding to 100.

– Nil or rounded to zero.

- (a) The achievement percentages reported in this table include 95 per cent confidence intervals (for example, 80.0 per cent ± 2.7 per cent).
- (b) Students who were absent or withdrawn from testing are not classified as assessed students and are not included in the benchmark calculations. The proportion of absent and withdrawn students varies across jurisdictions, as shown in table 4A.73. Readers are urged to be cautious when comparing results.
- (c) Revised definitions and standards for the collection and reporting of student socioeconomic background information (sex, Indigenous status, socioeconomic background and language background) were introduced in 2005 through the school enrolment processes for all schools to ensure greater national consistency in reporting against characteristics from 2006.
- (d) The typical average age of students at the time of testing, expressed in years and months.
- (e) The typical average time students had spent in schooling at the time of testing, expressed in years and months.
- (f) The methods used to identify Indigenous students and students with a LBOTE varied across jurisdictions.

(a) The percentage of students from government and non-government schools respectively who were assessed includes exempted students but not students absent or withdrawn by parents/caregivers from the testing and not students attending schools which did not participate in the testing at all. The figure is calculated as a percentage of the total number of full time government and non-government students respectively based on data from the NSSC.

(b) The percentages of assessed students who were government and non-government school students respectively.

(a) The percentage of students who were exempted, and absent or who were withdrawn by parents/caregivers, from the testing program. Exempted students are reported as not achieving the benchmark. Absent and withdrawn students are not included in the benchmark calculations. The percentage of exempted, and absent or withdrawn, students is calculated as a percentage of the total number of full time government students based on NSSC data, together with the non-government students who participated in the relevant testing programs.

(b) The percentage of assessed Indigenous and LBO TE students respectively. The percentages of Indigenous and LBO TE students include exempted students and are calculated as a percentage of the total number of full time government students based on data from the NSSC and non-government students who participated in the relevant testing programs. The specific ways in which Indigenous and LBO TE student information was collected and/or categorised varied across jurisdictions.

(c) NSSC figures have been used for the total number of students in calculation of the participation rates. In the NT, students are tested at year 3, 5, and 7 in urban schools. In remote Indigenous community schools, students are tested ages 8, 10 and 12, not at year level. This may result in percentages for NT not adding to 100.

(a) The achievement percentages reported in this table include 95 per cent confidence intervals (for example, 80.0 per cent ± 2.7 per cent).

(b) Students who were absent or withdrawn from testing are not classified as assessed students and are not included in the benchmark calculations. The proportion of absent and withdrawn students varies across jurisdictions, as shown in table 4A.79. Readers are urged to be cautious when comparing results.

(c) Revised definitions and standards for the collection and reporting of student socioeconomic background information (sex, Indigenous status, socioeconomic background and language background) were introduced in 2005 through the school enrolment processes for all schools to ensure greater national consistency in reporting against characteristics from 2006.

(d) The typical average age of students at the time of testing, expressed in years and months.

(e) The typical average time students had spent in schooling at the time of testing, expressed in years and months.

(f) The methods used to identify Indigenous students and students with a LBOTE varied across jurisdictions.

1 Average age (d)		Male	Female	Indigenous	LBOTE
2 Years of schooling (e)	All students	students	students	students (f)	students (f)

(g) NSW considers that the year 7 results for NSW are anomalous. The national numeracy benchmark results show that:

(i) a lower proportion of year 7 students are meeting the minimum numeracy benchmark than are meeting the reading and writing benchmarks

(ii) a lower proportion of students are meeting the numeracy benchmark in year 7 than in year 3 and year 5. The national benchmark results show that NSW students in years 3 and 5 are consistently performing at or above the national average for reading writing and numeracy. The NSW results for year 7 reading and writing are also fairly consistent with the national average.

(iii) the drop in performance for NSW beyond the normal range of annual fluctuations was expected in 2006 and is attributable to the conduct of testing two months earlier, in March rather than in May.

(a) The percentage of students from government and non-government schools respectively who were assessed includes exempted students but not students absent or withdrawn by parents/caregivers from the testing and not students attending schools which did not participate in the testing at all. The figure is calculated as a percentage of the total number of full time government and non-government students respectively based on data from the NSSC.

(b) The percentages of assessed students who were government and non-government school students respectively.

(a) The percentage of students who were exempted, and absent or who were withdrawn by parents/caregivers, from the testing program. Exempted students are reported as not achieving the benchmark. Absent and withdrawn students are not included in the benchmark calculations. The percentage of exempted, and absent or withdrawn, students is calculated as a percentage of the total number of full time government students based on NSSC data, together with the non-government students who participated in the relevant testing programs.

(b) The percentage of assessed Indigenous and LBO TE students respectively. The percentages of Indigenous and LBO TE students include exempted students and are calculated as a percentage of the total number of full time government students based on data from the NSSC and non-government students who participated in the relevant testing programs. The specific ways in which Indigenous and LBO TE student information was collected and/or categorised varied across jurisdictions.

(c) NSSC figures have been used for the total number of students in calculation of the participation rates. In the NT, students are tested at year 3, 5, and 7 in urban schools. In remote Indigenous community schools, students are tested ages 8, 10 and 12, not at year level. This may result in percentages for NT not adding to 100.

(a) The percentage of students from government and non-government schools respectively who were assessed includes exempted students but not students absent or withdrawn by parents/caregivers from the testing and not students attending schools which did not participate in the testing at all. The figure is calculated as a percentage of the total number of full time government and non-government students respectively based on data from the NSSC.

(b) The percentages of assessed students who were government and non-government school students respectively.

(a) The percentage of students who were exempted, and absent or who were withdrawn by parents/caregivers, from the testing program. Exempted students are reported as not achieving the benchmark. Absent and withdrawn students are not included in the benchmark calculations. The percentage of exempted, and absent or withdrawn, students is calculated as a percentage of the total number of full time government students based on NSSC data, together with the non-government students who participated in the relevant testing programs.

(b) The percentage of assessed Indigenous and LBOTE students respectively. The percentages of Indigenous and LBOTE students include exempted students and are calculated as a percentage of the total number of full time government students based on data from the NSSC and non-government students who participated in the relevant testing programs. The specific ways in which Indigenous and LBOTE student information was collected and/or categorised varied across jurisdictions.

(c) NSSC figures have been used for the total number of students in calculation of the participation rates. In the NT, students are tested at year 3, 5, and 7 in urban schools. In remote schools, students are tested ages 8, 10 and 12, not at year level. This may result in percentages for NT not adding to 100.

(a) The percentage of students from government and non-government schools respectively who were assessed includes exempted students but not students absent or withdrawn by parents/caregivers from the testing and not students attending schools which did not participate in the testing at all. The figure is calculated as a percentage of the total number of full time government and non-government students respectively based on data from the NSSC.

(b) The percentages of assessed students who were government and non-government school students respectively.

(a) The percentage of students who were exempted, and absent or who were withdrawn by parents/caregivers, from the testing program. Exempted students are reported as not achieving the benchmark. Absent and withdrawn students are not included in the benchmark calculations. The percentage of exempted, and absent or withdrawn, students is calculated as a percentage of the total number of full time government students based on NSSC data, together with the non-government students who participated in the relevant testing programs.

(b) The percentage of assessed Indigenous and LBOTE students respectively. The percentages of Indigenous and LBOTE students include exempted students and are calculated as a percentage of the total number of full time government students based on data from the NSSC and non-government students who participated in the relevant testing programs. The specific ways in which Indigenous and LBOTE student information was collected and/or categorised varied across jurisdictions.

(c) NSSC figures have been used for the total number of students in calculation of the participation rates. In the NT, students are tested at year 3, 5, and 7 in urban schools. In remote schools, students are tested ages 8, 10 and 12, not at year level. This may result in percentages for NT not adding to 100.

NT 1. 12yrs 8mths 2. 7yrs 3mths	66.7 ± 2.0	67.6 ± 2.7	65.7 ± 2.6	27.7 ± 3.1	25.8 ± 3.1
Australia	80.2 ± 0.9	80.0 ± 0.9	80.6 ± 1.0	46.0 ± 2.7	78.0 ± 1.2

- (a) The achievement percentages reported in this table include 95 per cent confidence intervals (for example, 80.0 per cent ± 2.7 per cent).
- (b) Students who were absent or withdrawn from testing are not classified as assessed students and are not included in the benchmark calculations. The proportion of absent and withdrawn students varies across jurisdictions, as shown in table 4A.97. Readers are urged to be cautious when comparing results.
- (c) Some movements in the results over time might have occurred because of State/Territory equating processes, and may not reflect actual improvements in student performance.
- (d) The typical average age of students at the time of testing, expressed in years and months.
- (e) The typical average time students had spent in schooling at the time of testing, expressed in years and months.
- (f) The methods used to identify Indigenous students and students with a LBOTE varied across jurisdictions.
- (g) NSW considers that the year 7 results for NSW are anomalous. The national numeracy benchmark results show that:

Table 4A.94 Proportion of year 7 students who achieved the numeracy benchmark, 2007 (per cent) (a), (b), (c)

1 Average age (d)		Male	Female	Indigenous	LBOTE
2 Years of schooling (e)	All students	students	students	students (f)	students (f)

(i) a lower proportion of year 7 students are meeting the minimum numeracy benchmark than are meeting the reading and writing benchmarks

(ii) a lower proportion of students are meeting the numeracy benchmark in year 7 than in year 3 and year 5.

The national benchmark results show that NSW students in years 3 and 5 are consistently performing at or above the national average for reading writing and numeracy. The NSW results for year 7 reading and writing are also fairly consistent with the national average.

(h) Some students did not indicate their gender therefore the total percentages for all students have not be proportionally located within the range provided for male and female students.

(a) The percentage of students from government and non-government schools respectively who were assessed includes exempted students but not students absent or withdrawn by parents/caregivers from the testing and not students attending schools which did not participate in the testing at all. The figure is calculated as a percentage of the total number of full time government and non-government students respectively based on data from the NSSC.

(b) The percentages of assessed students who were government and non-government school students respectively.

(a) The percentage of students who were exempted, and absent or who were withdrawn by parents/caregivers, from the testing program. Exempted students are reported as not achieving the benchmark. Absent and withdrawn students are not included in the benchmark calculations. The percentage of exempted, and absent or withdrawn, students is calculated as a percentage of the total number of full time government students based on NSSC data, together with the non-government students who participated in the relevant testing programs.

(b) The percentage of assessed Indigenous and LBOTE students respectively. The percentages of Indigenous and LBOTE students include exempted students and are calculated as a percentage of the total number of full time government students based on data from the NSSC and non-government students who participated in the relevant testing programs. The specific ways in which Indigenous and LBOTE student information was collected and/or categorised varied across jurisdictions.

(c) NSSC figures have been used for the total number of students in calculation of the participation rates. In the NT, students are tested at year 3, 5, and 7 in urban schools. In remote schools, students are tested ages 8, 10 and 12, not at year level. This may result in percentages for NT not adding to 100.

3 or above	12.1 ± 4.0	9.2 ± 2.4	2.9 ± 1.7	4.7 ± 1.9	4.7 ± 2.1	7.3 ± 2.5	11.8 ± 3.5	4.8 ± 2.5	8.1 ± 1.5
4 or above	0.1 ± 0.2	0.1 ± 0.2	0.1 ± 0.1	0.1 ± 0.0	–	0.1 ± 0.2	0.2 ± 0.3	0.1 ± 0.2	0.1 ± 0.1
Year 10									
1 or above	97.9 ± 1.2	95.5 ± 2.0	94.0 ± 2.7	94.7 ± 2.7	92.7 ± 3.6	95.0 ± 2.8	96.5 ± 2.5	95.7 ± 3.9	95.7 ± 0.9
2 or above	86.6 ± 2.3	79.3 ± 5.3	73.9 ± 5.8	78.7 ± 4.6	74.1 ± 5.5	78.9 ± 5.6	84.8 ± 5.4	78.8 ± 9.0	80.4 ± 1.9
3 or above (a)	47.5 ± 4.9	39.6 ± 7.4	29.7 ± 5.5	36.3 ± 6.1	29.2 ± 4.8	37.1 ± 4.7	48.0 ± 7.6	35.9 ± 14.6	39.3 ± 2.8
4 or above	7.0 ± 2.4	5.1 ± 2.4	2.3 ± 1.2	3.8 ± 2.1	1.4 ± 1.0	4.0 ± 2.1	8.0 ± 3.4	5.0 ± 4.4	4.8 ± 1.1
5 or above	0.3 ± 0.3	0.1 ± 0.0	–	0.1 ± 0.1	0.0 ± 0.1	0.1 ± 0.0	0.3 ± 0.5	0.2 ± 0.1	0.1 ± 0.1

(a) Minimum standards like the benchmarks in literacy and numeracy have not been set for civics and citizenship performance. The standard for civics and citizenship performance is set at proficiency level 2 for year 6 and level 3 for year 10 (of levels 1 to 5 or above) a reasonably challenging level of performance, with students needing to demonstrate more than minimal or elementary skills expected at that year level to be regarded as reaching it. Data represent the proportion of students at or above the proficient standard.

(b) The achievement percentages reported in this table include 95 per cent confidence intervals (for example, 80.0 per cent ± 2.7 per cent).
– Nil or rounded to zero.

Male students	62.3 ± 2.5
Female students	77.8 ± 2.2
Students from low socioeconomic families (c)	56.2 ± 2.7
Indigenous students	38.1 ± 7.6
Geographically remote students (d)	53.5 ± 9.0
2006	
All students	65.6 ± 1.8
Male students	58.0 ± 2.4
Female students	73.5 ± 2.0
Students from low socioeconomic families (c)	47.8 ± 2.2
Indigenous students	33.5 ± 4.9
Geographically remote students (d)	48.9 ± 15.7

(a) These data are from assessments conducted for the Programme for International Student Assessment (PISA). PISA 2000 involved sample assessment of approximately 2.3 per cent of 15 year old Australian secondary school students. For further information on PISA 2000, see Lokan et al. (2001). PISA 2003 involved sample assessment of approximately 6.5 per cent of 15 year old Australian secondary school students. For further information on PISA 2003, see Thomson et al. (2004a). PISA 2006 involved sample assessment of approximately 6.0 per cent of 15 year old Australian Secondary school students. For further information on PISA 2006, see Thomson and De Bortoli (2007).

(b) The achievement percentages reported in this table include 95 per cent confidence intervals (for example, 80.0 per cent ± 2.7 per cent).

(c) Two measures are used by the OECD to represent elements of socioeconomic background. One is the highest level of the father's and mother's occupation (known as HISEI), which is coded in accordance with the International Standard Classification of Occupations. The other measure is the index of economic, social and cultural status (ESCS), which was created to capture the wider aspects of a student's family and home background. The ESCS is based on students' responses on their parents' occupations; the highest level of education of the father and mother converted into years of schooling; the number of books in the home; and access to home educational and cultural resources.

(d) The MCEETYA Schools Geographic Location Classification was used to classify the location of the school. Students from schools in remote and very remote areas were classified as geographically remote students.

Geographically remote students (d)	44.0 ± 11.4

(a) These data are from assessments conducted for the Programme for International Student Assessment (PISA). PISA 2003 involved sample assessment of approximately 6.5 per cent of 15 year old Australian secondary school students. For further information on PISA 2003, see Thomson et al. (2004a). PISA 2006 involved sample assessment of approximately 6.0 per cent of 15 year old Australian Secondary school students. For further information on PISA 2006, see Thomson and De Bortoli (2007).

(b) The achievement percentages reported in this table include 95 per cent confidence intervals (for example, 80.0 per cent ± 2.7 per cent).

(c) Two measures are used by the OECD to represent elements of socioeconomic background. One is the highest level of the father's and mother's occupation (known as HISEI), which is coded in accordance with the International Standard Classification of Occupations. The other measure is the index of economic, social and cultural status (ESCS), which was created to capture the wider aspects of a student's family and home background. The ESCS is based on students' responses on their parents' occupations; the highest level of education of the father and mother converted into years of schooling; the number of books in the home; and access to home educational and cultural resources.

(d) The MCEETYA Schools Geographic Location Classification was used to classify the location of the school. Students from schools in remote and very remote areas were classified as geographically remote students.

(a) These data are from assessments conducted for the Programme for International Student Assessment (PISA). PISA 2000 involved sample assessment of approximately 2.3 per cent of 15 year old Australian secondary school students. For further information on PISA, see Lokan et al. (2001). PISA 2003 involved sample assessment of approximately 6.5 per cent of 15 year old Australian secondary school students. For further information on PISA, see Thomson et al. (2004a).

(b) The OECD mean is reported here as a national reporting standard has yet to be developed. The achievement percentages reported in this table include 95 per cent confidence intervals (for example, 80.0 per cent ± 2.7 per cent).

(c) A variable based on parental occupation was used to determine socioeconomic background. Students in the lowest 25 per cent of this variable were defined as being from a family of low socioeconomic status. The variable is based on the International Standard Classification of Occupations.

(a) These data are from assessments conducted for TIMSS. TIMSS 2002-03 involved sample assessment of 4675 year 4 Australian school students from 204 schools. TIMSS 2006-07 involved a sample assessment of 4108 year 4 Australian school students from 229 schools. For further information on TIMSS, see <http://www.acer.edu.au/timss>.

(b) The presentation of TIMSS data in the 2008 Report differs from that presented elsewhere, including the selection of "at or above the intermediate international level" as a standard for reporting results. The MCEETYA national standard for these data is yet to be established.

(c) The achievement percentages reported in this table include 95 per cent confidence intervals (for example, 80.0 per cent ± 2.7 per cent).

To year 12 (female)	37.8	54.8	60.2	29.4	51.5	54.3	55.6	47.1	46.4

(a) The apparent retention rate is the percentage of full time students who continued to years 10–12 from respective cohort groups at the commencement of their secondary schooling.

(b) The exclusion of part time students from standard apparent retention rate calculations has particular implications for the interpretation of results for SA, Tasmania and the NT.

(c) The small number of Indigenous students in some jurisdictions (Tasmania and the ACT) can result in large fluctuations in the apparent retention rates when disaggregated by sex and school sectors.

Table 4A.124 **Apparent retention rates of secondary students from years 10–12, 2007 (per cent) (a), (b)**

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA</i>	<i>SA (c) (d)</i>	<i>Tas (c) (d)</i>	<i>ACT</i>	<i>NT (c)</i>	<i>Aust</i>
Full time secondary students									
Government schools	67.8	76.2	72.3	63.7	65.7	63.7	96.6	75.7	70.5
Non-government schools	80.0	90.0	90.1	78.8	86.0	69.0	73.0	44.7	84.1
All schools	72.4	81.8	78.6	69.5	73.3	65.3	85.9	65.5	75.6
Full time Indigenous secondary students									
Government schools	39.8	53.0	57.5	28.8	47.4	44.4	64.6	55.5	46.0
Non-government schools	59.9	78.7	77.5	43.5	77.4	42.0	38.9	39.0	60.4
All schools	42.4	56.7	61.5	31.8	50.6	44.1	59.0	50.3	48.5
Full time and part time secondary students (d)									
Government schools	70.1	78.9	73.7	65.2	85.0	91.0	96.7	79.8	74.5
Non-government schools	80.4	90.1	90.4	78.9	91.3	69.0	73.6	47.2	84.8
All schools	74.0	83.4	79.5	70.5	87.4	84.4	86.2	69.3	78.4

- (a) The apparent rate is the percentage of full time students who continued to year 12 from respective cohort groups in year 10.
- (b) Retention rates are affected by factors that vary across jurisdictions, so variations in apparent retention rates over time within jurisdictions may be more useful than comparisons across jurisdictions. Retention rates can exceed 100 per cent for a variety of reasons, including student transfers between government and non-government schools occurring after the base year.
- (c) The exclusion of part time students from standard apparent retention rate calculations has particular implications for the interpretation of results for SA, Tasmania and the NT.
- (d) Inclusion of part-time students in the calculation of apparent retention rates increases the apparent retention rates in SA and Tasmania due to a significant number of part-time adult learners and other students recorded as year 12 that were not part of the original year 10 cohort two years prior.

(a) The apparent retention rate is from year 8 to year 10 for Queensland, WA, SA and the NT and from year 7 to 10 for all other jurisdictions. The apparent retention rate is the percentage of full time students who continued to years 10–12 from respective cohort groups at the commencement of their secondary schooling. Calculations are based on full time student numbers.

(b) Data for WA have been affected by changes in scope and coverage over time.

Table 4A.125 Apparent retention rates of full time secondary students, government schools (per cent) (a)

	<i>NSW</i>	<i>Vic</i>	<i>Qld</i>	<i>WA (b)</i>	<i>SA (c)</i>	<i>Tas (c) (d)</i>	<i>ACT (c) (d)</i>	<i>NT</i>	<i>Aust</i>
(c) The exclusion of part time students from standard apparent retention rate calculations has particular implications for the interpretation of results for SA, Tasmania and the NT.									
(d) The small number of Indigenous students in some jurisdictions (Tasmania and the ACT) can result in large fluctuations in the apparent retention rates when disaggregated by gender and school sectors.

- (a) Completion rates are estimated by calculating the number of students who meet the requirements of a year 12 certificate or equivalent expressed as a percentage of the potential year 12 population. The potential year 12 population is an estimate of a single year age group which could have attended year 12 that year, calculated as the estimated resident population aged 15–19 divided by five.
- (b) Data for 2006 and earlier years has been revised based on finalised ERP rebased following the 2006 Census of Population and Housing.
- (c) The ABS Index of Disadvantage has been used to calculate socioeconomic status on the basis of postcode of students' home addresses.
- (d) Low socioeconomic status is the average of the three lowest deciles, medium socioeconomic status is the average of the four middle deciles and high socioeconomic status is the average of the three highest deciles.
- (e) A common total for socio-economic status and geolocation is selected for reporting all students' rates and this may mean totals for socioeconomic status differ slightly to those in other publications.

(a) Completion rates are estimated by calculating the number of students who meet the requirements of a year 12 certificate or equivalent expressed as a percentage of the potential year 12 population. The potential year 12 population is an estimate of a single year age group which could have attended year 12 that year, calculated as the estimated resident population aged 15–19 divided by five.

(b) Definitions are based on the agreed MCEETYA Geographic Location Classification.

(c) Data for 2006 and earlier years has been revised based on finalised ERP rebased following the 2006 Census of Population and Housing.

(d) There are no very remote areas in Victoria and the ACT. The very remote population in Tasmania is too small to give meaningful results and has been combined with the remote prior to 2007.

(e) The ACT is included in the metropolitan zone. Darwin is included in the provincial zone.

(a) Estimates in italics have relative standard errors greater than 25 per cent and should be used with caution. The majority of ACT and NT estimates are greater than 50 per cent and are considered too unreliable for general use. The 95 per cent confidence interval associated with each estimate is reported with the estimate. Data are not published for some items due to small sample sizes, but these data are included in Australia totals.

(b) The categories for employment and enrolment are not exclusive. That is, for example, people enrolled may also be employed.

(c) The category 'other' includes part-time workers, unemployed people and people not in the labour force.

– nil or rounded to zero. **np** Not published.

- (a) As a result of collecting AVETMISS compliant data for the first time, the 2005 MCEETYA VET in Schools statistics are subject to some data quality problems. These fall into one of four kinds: the number of student records provided to NCVER may be incomplete; there may be some fields that are intended to be used in producing the tables where no data is reported because, for example, it is not captured in school enrolment processes; the use of secondary data sources to determine some measures — for example, data to be obtained on the number of school students undertaking a senior secondary certificate — may not be sufficiently reliable or comparable to the AVETMISS compliant data; and, differences in definitional and compilation practices used by states and territories to populate some fields, for example the nominal hours field, resulting in anomalies between states and territories.
- (b) Students who undertook at least one unit of competency/module in a school-based apprenticeship or traineeship during 2005.

- (a) As a result of collecting AVETMISS compliant data for the first time, the 2005 MCEETYA VET in Schools statistics are subject to some data quality problems. These fall into one of four kinds: the number of student records provided to NCVET may be incomplete; there may be some fields that are intended to be used in producing the tables where no data is reported because, for example, it is not captured in school enrolment processes; the use of secondary data sources to determine some measures — for example, data to be obtained on the number of school students undertaking a senior secondary certificate — may not be sufficiently reliable or comparable to the AVETMISS compliant data; and, differences in definitional and compilation practices used by states and territories to populate some fields, for example the nominal hours field, resulting in anomalies between states and territories.
- (b) Students who successfully completed at least one unit of competency/module in VET in schools during 2005.
- (c) Total includes other providers such as TAFE, community education and private providers, however due to small numbers these are not presented separately.
