Foreword

It gives me great pleasure, as one of my final tasks as Chairman of the Productivity Commission, to write this foreword on behalf of the Steering Committee for the Review of Government Service Provision, which it has been my privilege to chair for the past 14 years.

The Report on Government Services was commissioned in 1993 by Heads of Government (now COAG), to help drive necessary improvements to government services. This is the eighteenth report in the series, the first three having been overseen by my predecessor at the Industry Commission, Bill Scales. Over those years, the Report has grown in scope and content, becoming a comprehensive repository of comparative information on the effectiveness and efficiency of a wide range of services. Visitors from other countries are often astonished at this achievement and its bold and innovative nature.

The conviction of governments that greater transparency about service performance would promote improvements across our federation has by now been vindicated. This reporting series has been remarkable, not only for what it has achieved, but also for the ongoing commitment of heads of government to what is effectively an annual 'report card' on the performance of their administrations.

I pay tribute to the many officials around the country who have contributed to the work of the Review. I have found it personally rewarding to work with the senior officials who have been on the Steering Committee over the past decade and a half. The long-standing cooperative involvement of officers from the ABS and AIHW has also been much appreciated. Last but not least, I acknowledge the commitment and enthusiasm of the people in the Review Secretariat, who are instrumental in producing the Report each year. The Productivity Commission has played a central role in this important exercise from the start, and remains committed to its ongoing success.

Glossary

Access	Measures how easily the community can obtain a delivered service (output).
Appropriateness	Measures how well services meet client needs and also seeks to identify the extent of any underservicing or overservicing.
Constant prices	See ‘real dollars’.
Cost effectiveness	Measures how well inputs (such as employees, cars and computers) are converted into outcomes for individual clients or the community. Cost effectiveness is expressed as a ratio of inputs to outcomes. For example, cost per life year saved is a cost effectiveness indicator reflecting the ratio of expenditure on breast cancer detection and management services (including mammographic screening services, primary care, chemotherapy, surgery and other forms of care) to the number of women’s lives that are saved.
Current prices	See ‘nominal dollars’.
Descriptors	Descriptive statistics included in the Report that relate, for example, to the size of the service system, funding arrangements, client mix and the environment within which government services are delivered. These data are provided to highlight and make more transparent the differences among jurisdictions.
Effectiveness	Reflects how well the outputs of a service achieve the stated objectives of that service (also see program effectiveness).
Efficiency	Reflects how resources (inputs) are used to produce outputs and outcomes, expressed as a ratio of outputs to inputs (technical efficiency), or inputs to outcomes (cost effectiveness). (Also see ‘cost effectiveness’ and ‘technical efficiency’.)

Equity	Measures the gap between service delivery outputs or outcomes for special needs groups and the general population. Equity of access relates to all Australians having adequate access to services, where the term adequate may mean different rates of access for different groups in the community (see chapter 1 for more detail).
Inputs	The resources (including land, labour and capital) used by a service area in providing the service.
Nominal dollars	Refers to financial data expressed ‘in the price of the day’ and which are not adjusted to remove the effects of inflation. Nominal dollars do not allow for inter-year comparisons because reported changes may reflect changes to financial levels (prices and/or expenditure) and adjustments to maintain purchasing power due to inflation.
Output	The service delivered by a service area, for example, a completed episode of care is an output of a public hospital.
Outcome	The impact of the service on the status of individuals or a group, and the success of the service area in achieving its objectives. A service provider can influence an outcome but external factors can also apply. A desirable outcome for a school, for example, would be to add to the ability of the students to participate in, and interact with, society throughout their lives. Similarly, a desirable outcome for a hospital would be to improve the health status of an individual receiving a hospital service.
Process	Refers to the way in which a service is produced or delivered (that is, how inputs are transformed into outputs).
Program effectiveness	Reflects how well the outcomes of a service achieve the stated objectives of that service (also see effectiveness).
Quality	Reflects the extent to which a service is suited to its purpose and conforms to specifications.

Real dollars

Refers to financial data measured in prices from a constant base year to adjust for the effects of inflation. Real dollars allow the inter-year comparison of financial levels (prices and/or expenditure) by holding the purchasing power constant.

Technical efficiency

A measure of how well inputs (such as employees, cars and computers) are converted into service outputs (such as hospital separations, education classes or residential aged care places). Technical efficiency reflects the ratio of outputs to inputs. It is affected by the size of operations and by managerial practices. There is scope to improve technical efficiency if there is potential to increase the quantity of outputs produced from given quantities of inputs, or if there is potential to reduce the quantities of inputs used in producing a certain quantity of outputs.

Unit costs

Measures average cost, expressed as the level of inputs per unit of output. This is an indicator of efficiency.

The Report on Government Services

- 1. The Steering Committee will measure and publish annually data on the equity, efficiency and cost effectiveness of government services through the Report on Government Services (ROGS). Outputs and objectives
- 2. The ROGS facilitates improved service delivery, efficiency and performance, and accountability to governments and the public by providing a repository of meaningful, balanced, credible, comparative information on the provision of government services, capturing qualitative as well as quantitative change. The Steering Committee will seek to ensure that the performance indicators are administratively simple and cost effective.
- 3. The ROGS should include a robust set of performance indicators, consistent with the principles set out in the Intergovernmental Agreement on Federal Financial Relations; and an emphasis on longitudinal reporting, subject to a program of continual improvement in reporting.
- 4. To encourage improvements in service delivery and effectiveness, ROGS should also highlight improvements and innovation.
- 5. The Steering Committee exercises overall authority within the ROGS reporting process, including determining the coverage of its reporting and the specific performance indicators that will be published, taking into account the scope of National Agreement reporting and avoiding unnecessary data provision burdens for jurisdictions. Steering Committee authority
- 6. The Steering Committee will implement a program of review and continuous improvement that will allow for changes to the scope of the ROGS over time, including reporting on new service areas and significant service delivery areas that are jurisdiction-specific.
- 7. The Steering Committee will review the ROGS every three years and advise COAG on jurisdictions' compliance with data provision requirements and of potential improvements in data collection. It may also report on other matters, for example, ROGS's scope, relevance and usefulness; and other matters consistent with the Steering Committee's terms of reference and charter of operations.
